

TABLE OF CONTENTS

Participants	vii
Scientific Program of the Conference	ix
Preface	xi
Characterizations of Balls and Strips via Harmonic Quadrature <i>D. H. Armitage and M. Goldstein</i>	1
Better than Uniform Approximation on Closed Sets by Harmonic Functions with Singularities and Applications <i>D. H. Armitage and M. Goldstein</i>	11
Uniform Approximation by Global Harmonic Functions <i>T. Bagby and P. M. Gauthier</i>	15
Weighted L^p Approximation by Holomorphic Functions <i>A. Boivin, J. Mateu and J. Verdera</i>	27
Boundary Correspondence of Univalent Harmonic Mappings from the Unit Disc onto a Jordan Domain <i>D. Bshouty and W. Hengartner</i>	51
Finely Open Sets in the Limit Set of a Finely Generated Kleinian Group <i>A. E. Eremenko and T. J. Lyons</i>	61
Rational Approximation to the Fresnel Integral <i>W. H. J. Fuchs and W. K. Hayman</i>	69
Axiomatic Approximation <i>P. M. Gauthier, J. Heinonen and D. Zwick</i>	79
Characterization of Open Strips by Harmonic Quadrature <i>M. Goldstein, W. Haussmann and L. Rogge</i>	87
Mean Value Theorems and Best L^1 -Approximation <i>W. Haussmann, L. Wehrend and K. Zeller</i>	93
Mapping Properties of the Wave Operators in Scattering Theory <i>A. Jensen</i>	103

Harmonicity Modulus and Applications to the Approximation by Polyharmonic Functions <i>O. I. Kounchev</i>	111
A Comparison of Harmonic and Maximal Measures for Rational Functions <i>M. Lyubich and A. Volberg</i>	127
The Role of the Hilbert Transform in 2-Dimensional Aerodynamics <i>T. Murai</i>	141
Approximation by Harmonic Functions and the Dirichlet Problem <i>I. Netuka</i>	155
On the Existence-Problem for Gauß-Quadrature on the Sphere <i>M. Reimer</i>	169
A Bibliographic Survey of the Pompeiu Problem <i>L. Zalcman</i>	185
Problems	195
