

Table of Contents

Preface	
<i>by S.-T. Yau</i>	3
Energy in General Relativity	
<i>Robert Bartnik</i>	5
The Calabi flow $\frac{\partial \lambda}{\partial t} = \Delta R$ on Einstein manifolds	
<i>Shun-Cheng Chang</i>	29
Existence and convergence of solutions	
<i>Shun-Cheng Chang</i>	41
Closed Geodesics	
<i>Chiun-Chuan Chen and Jenn-Fang Hwang</i>	51
On the Chern conjecture for minimal hypersurface	
<i>Shiu Yuen Cheng</i>	59
Eigenvalues and diameters for manifolds and graphs	
<i>F.R.K. Chung, A. Grigor'yan and S.-T. Yau</i>	79
A combinatorial trace formula	
<i>F.R.K. Chung and S.-T. Yau</i>	107
Lecture one: Mean curvature evolution	
<i>Gerhard Huisken</i>	117
Lecture two: Singularities of the mean curvature flow	
<i>Gerhard Huisken</i>	125
Lecture three: An evolution equation for isoperimetric problem	
<i>Gerhard Huisken</i>	131
Lecture four: An evolution of metrics by the Ricci curvature	
<i>Gerhard Huisken</i>	137
On the estimate of the gap between the first two eigenvalues	
<i>Ying-Ji Hong</i>	145
Minimal surfaces and Teichmueller theory	
<i>Jürgen Jost</i>	149
Harmonic maps and superrigidity	
<i>Jürgen Jost and Shing-Tung Yau</i>	213
Estimates for heat Kernel and Green's function	
<i>N.C. Lee</i>	247
Harmonic maps of complete manifolds	
<i>Peter Li</i>	259
Harmonic functions on complete Riemannian manifolds	
<i>Peter Li</i>	265
A note on the exhaustion function for complete manifolds	
<i>Chih-Hsiu Lin and Mu-Tao Wang</i>	269
Lectures on singularities of variational problems	
<i>Leon Simon</i>	279
Sobolev inequality for measure spaces	
<i>S.-T. Yau</i>	299

A note on the distribution of critical points of eigenfunctions	
<i>Shing Tung Yau</i>	315
Exhaustions of Complete Manifolds of Bounded Curvature	
<i>Michael Dafermos</i>	319
