Preface	v
Contributors	xiii
Part 1: Modeling of Complex Systems with Asymptotic-enhanced Numerical Methods	1
Asymptotics and Numerics for Laminar Flow over a Finite Flat Plate <i>D. Dijkstra and J. G. M. Kuerten</i>	3
Time-Scale Decoupling for Nearly Periodic Advection-Diffusion Equations <i>A. van Harten</i>	21
Turbulence Modeling from an Asymptotic Point of View <i>H. Herwig</i>	41
Some Applications of Combined Asymptotics and Numerics in Fluid Mechanics and Aerodynamics <i>N. D. Malmuth</i>	53
Asymptotic-Assisted Numerics for Spectral Perturbation in MHD Instability <i>R. B. Paris and A. D. Wood</i>	81
Part 2: Asymptotic-induced Domain Decomposition Methods	91
Domain Decomposition as a Mechanism for Using Asymptotic Methods <i>W. D. Gropp and D. E. Keyes</i>	93
Domain Decomposition: A Blowup Problem and the Ginzburg-Landau Equations <i>Man Kam Kwong</i>	107

Factorization of the Advection-Diffusion Operator and Domain Decomposition Method <i>F. Nataf and F. Rogier</i>	123
Part 3: Multiple-Scale Problems in Scientific Computing	135
Modulated Traveling Waves in Combustion <i>A. Bayliss, B. J. Matkowsky, and H. Riecke</i>	137
Asymptotics and Multiscale Simulation in a Numerical Combustion Laboratory <i>D. Scott Stewart and John B. Bdzil</i>	163
Part 4: Applied and Asymptotic Analysis	189
Viscoelastic Fluid Flow: Critical Parameters and Asymptotics <i>L. Pamela Cook, D. O. Olagunju, and G. F. Schleiniger</i>	191
Exponentially Small Splitting of Homoclinic Orbits in a Water-Wave Problem <i>W. Eckhaus</i>	207
Supersensitive Boundary Value Problems <i>Jacques G. Laforgue and Robert E. O'Malley, Jr.</i>	215
Asymptotics of the Thual-Fauve Pulse <i>Piero de Mottoni and Michelle Schatzman</i>	225
Exponential Convergence of the Galerkin Approximation of the Ginzburg-Landau Equation <i>Arjen Doelman and Edriss S. Titi</i>	241

Part 5: Symbolic Manipulation Tools for Asymptotic Analysis	253
General Asymptotic Scales and Computer Algebra <i>Bruno Salvy</i>	255
Part 6: Numerical Methods, Algorithms, and Architectures	267
Domain Decomposition by the Mortar Element Method <i>C. Bernardi, Y. Maday, and A. T. Patera</i>	269
Multilevel Projection Methods for Partial Differential Equations <i>Steve McCormick</i>	287
A Parallel Adaptive Multigrid Algorithm for the Incompressible Navier-Stokes Equations <i>C. P. Thompson</i>	293
Numerical Approximation of a 2-D Singular-Perturbation Problem Using an Asymptotic Expansion and a Finite Element Method <i>Jacques Baranger, Mohammed El Alami El Ferricha, and Harsan El Amri</i>	311
Internal Boundary Conditions and the Feedback Loop for Nested Two-Way Communication Schemes <i>A. L. Perkins</i>	321
Subdomain Predictor-Corrector Algorithms for Solving the Incompressible Navier-Stokes Equation <i>P. Spiteri and H. C. Boisson</i>	335
Parallel BLAS and BLACS for Numerical Algorithms on a Reconfigurable Network <i>F. Desprez and B. Tourancheau</i>	349
Index	367
