

Contents

Preface	iii
Contributors	ix
1. Background and Preliminaries on Zero-Dimensional Rings <i>Robert Gilmer</i>	1
2. Zero-Dimensionality and Products of Commutative Rings <i>Robert Gilmer</i>	15
3. Zero-Dimensional Extension Rings and Subrings <i>Robert Gilmer</i>	27
4. Residue Fields of Zero-Dimensional Rings <i>Robert Gilmer</i>	41
5. Dimensions of Extension Rings <i>William J. Heinzer</i>	57
6. Picard Groups, Cancellation, and the Multiplicative Structure of Fields <i>Robert M. Guralnick and Roger Wiegand</i>	65
7. Derivations and Deformations of Zero-Dimensional Rings and Algebras <i>Aleksandr G. Aleksandrov</i>	81
8. The Ring $R[X, r/X]$ <i>Daniel D. Anderson and David F. Anderson</i>	95
9. P. M. Cohn's Completely Primal Elements <i>Daniel D. Anderson and Muhammad Zafrullah</i>	115

10.	Some Factorization Properties of the Ring of Integer-Valued Polynomials <i>David F. Anderson, Paul-Jean Cahen, Scott T. Chapman, and William W. Smith</i>	125
11.	On the Nonuniversality of Weak Normalization <i>David F. Anderson, David E. Dobbs, and Marco Fontana</i>	143
12.	A Visit to Valuation and Pseudo-Valuation Domains <i>Ayman Badawi</i>	155
13.	Answer to a Question on the Principal Ideal Theorem <i>Paul-Jean Cahen, Evan G. Houston, and Thomas G. Lucas</i>	163
14.	On the Davenport Constant, the Cross Number, and Their Application in Factorization Theory <i>Scott T. Chapman</i>	167
15.	The Picard Group of a Polynomial Ring <i>Jim Coykendall</i>	191
16.	Integral Extensions with Fibers of Prescribed Cardinality <i>David E. Dobbs</i>	201
17.	Homological Dimensions of Localizations of Polynomial Rings <i>Sarah Glaz</i>	209
18.	Splitting Rings for p -Local Torsion-Free Groups <i>Sarah Glaz, Charles Vinsonhaler, and William Wickless</i>	223
19.	Prime Ideals in Birational Extensions of Polynomial Rings II <i>William J. Heinzer, David C. Latz, and Sylvia M. Wiegand</i>	241
20.	Duals of Ideals in Pullback Constructions <i>Evan G. Houston, Salah Kabbaj, Thomas G. Lucas, and A. Mimouni</i>	263
21.	Cancellation and Prime Spectra <i>Jon L. Johnson</i>	277
22.	The Ascending Chain Condition on n -Generated Submodules <i>David C. Lantz</i>	281
23.	More Almost Dedekind Domains and Prüfer Domains of Polynomials <i>K. Alan Loper</i>	287
24.	Direct Limits of Finite Products of Fields <i>Andy R. Magid</i>	299

25.	Eisenstein-Type Irreducibility Criteria <i>Joe L. Mott</i>	307
26.	On Integer-Valued Polynomials <i>S. B. Mulay</i>	331
27.	The Prime Spectrum of an Infinite Product of Zero-Dimensional Rings <i>Jay Shapiro</i>	347
28.	When Is a Self-Injective Ring Zero-Dimensional? <i>Jinzhong Xu</i>	357
29.	Some Problems in Commutative Ring Theory <i>Daniel D. Anderson</i>	363
	Index	373
