

Contents

Preface	v
1. Introduction	1
2. Methods and examples	6
3. Second order operator equations	19
4. Remarks on continuous dependence on boundary data, coefficients, geometry, and values of the operator	24
5. The Cauchy problem for elliptic equations	30
6. "Singular perturbations" in improperly posed problems	35
7. Nonexistence and growth of solutions of Schrödinger-type equations	42
8. Finite escape time; concavity methods	44
9. Finite escape time; other methods	51
10. Miscellaneous results	56
Bibliography	62
