Introduction viii

Bibliographical Note xiv

1 **Plane Rectilinear Geometry** 1

1.1 Hilbert's Geometry and Its Interpretation 1

1.2 Book I of the *Elements* 11

1.3 Geometry and Algebra: Book II, Propositions 1–7 41
Notes 52

2 **Euclidean Arithmetic** 58

2.1 Book VII 58

2.2 Books VIII and IX 83

2.3 Arithmetic and Algebra; Applications of Arithmetic
in Book X 107

Notes 113

3 **Magnitudes in Proportion** 118

3.1 Book V 118

3.2 Problems in the Interpretation of Book V 134

Notes 148

4 **Proportion and the Geometry of Plane Rectilinear
Figures** 152

Notes 174

5 **The Circle and Its Relation to the Triangle,
the Square, and the Regular Pentagon, Hexagon,
and *Pentekaidekagon*** 177

5.1 The Circle 177

5.2 Rectilinear Figures and the Circle 189

Notes 205

6

Elementary Solid Geometry and the Method of Exhaustion 207

6.1 The Foundations 207
6.2 Solids and Their Volumes 216
6.3 The Method of Exhaustion 230
Notes 247

7

The Investigation of the Platonic Solids 251

7.1 Pyramid, Cube, Octahedron, Icosahedron 251
7.2 The Edge Value of the Icosahedron and Book X 260
7.3 The Dodecahedron 295
Notes 303

Appendix 1 Symbols and Abbreviations 307

Appendix 2 Euclidean Assumptions 312

Appendix 3 Additional Propositions 315

Appendix 4 The Contents of the *Elements* 317

Notes 370

Bibliography 371
