

CONTENTS

Introduction	1
PART I. FORMALIZED RECURSIVE FUNCTIONALS	
§ 1. Computation tree numbers	2
§ 2. p-terms and p-functors; $r \simeq s$ (definition and basic properties)	22
§ 3. Representation of p-terms by proper indices	53
§ 4. The recursion theorem; the normal form theorem; $\{\tau\}[\alpha]$ and $\wedge \alpha u[\alpha]; !R \ \& \ [A(R)]$	67
PART II. FORMALIZED REALIZABILITY	
§ 5. Intuitionistically provable formulas are realizable and \textcircled{q} -realizable	77
