

CONTENTS

Preface	5
E. ALBRECHT, Several variable spectral theory in the noncommutative case	9-30
B. AUPETIT, Some uses of subharmonicity in functional analysis	31-37
H. BAUMGÄRTEL, A decoupling approach to resonances for multiparticle quantum scattering systems	39-43
H. BEHNCKE, Summary of three lectures (Functions acting on weighted l^p -algebras, Local completeness in operator algebras, Stability of deficiency indices)	45-48
M. BURNAT, The spectral properties of the Schrödinger operator in nonseparable Hilbert spaces	49-56
—, The spectral cutting problem	57-62
M. D. CHOI and Ch. DAVIS, Dilations to systems of matrix units	63-75
I. CIORĂNESCU and L. ZSIDÓ, ω -ultradistributions and their application to operator theory	77-220
D. N. CLARK, Sz.-Nagy-Foiaş theory and similarity for a class of Toeplitz operators	221-229
H. G. DALES, Embedding $C(X)$ in an algebra of analytic functions	231-236
M. DEMUTH, On resonances in mathematical scattering theory	237-240
Y. DOMAR, On the ideal structure of commutative Banach algebras	241-249
J. ESTERLE, Discontinuous homomorphisms from $\mathcal{E}(K)$	251-262
Ş. FRUNZĂ, Some results on duality for spectral decompositions	263-279
—, Generalized weights for operator Lie algebras	281-287
K. GUSTAFSON, The singular sequence problem	289-294
T. ICHINOSE, On the spectral properties of tensor products of linear operators in Banach spaces	295-300
P. JONAS, On spectral distributions of definitizable operators in Krein space	301-311
R. KÜHNE, Fixed points of semigroups of positive operators in KB-spaces	313-320
R. LEVI, Notes on the Taylor joint spectrum of commuting operators	321-332
S. LEVI, The structure of a class of Banach algebras generated by a Banach space	333-335
B. В. ЛОГИНОВ, Д. Г. РАХИМОВ, О методе ложных возмущений	337-341
C. С. МИРЗОЕВ, Кратная полнота части корневых векторов полиномиальных операторных пучков	343-346
W. MLAK, A note on general dilation theorems	347-352
V. MÜLLER, On Jordan models of C_0 -contractions	353-354
L. PAGE, The Szegő and Beurling theorems and operator factorizations	355-360
A. PIETSCH, Distribution of eigenvalues and nuclearity	361-365
V. PRÁK, Survey of some results in spectral theory obtained in Prague	367-371
—, Universal estimates of the spectral radius	373-387
P. ROSENTHAL, On the equations $X = KXS$ and $AX = XK$	389-391
—, A perturbation of Lomonosov's theorem	393-394
J. ROVNYAK, Some questions in operator theory and applications in analysis	395-396
Z. SŁODKOWSKI and W. ŻELAZKO, A note on semicharacters	397-402

M. R. F. SMYTH, Fredholm theory in Banach algebras	403-414
Ș. STRĂTILĂ and D. VOICULESCU, A survey on representations of the unitary group $U(\infty)$	415-434
I. SUCIU and I. VALUȘESCU, Linear predictor for stationary processes in complete correlated actions	435-447
F. H. SZAFRANIEC, Boundedness in dilation theory	449-453
S. TELEMAN, On the Choquet and Bishop-de Leeuw theorems	455-466
T. V. TONEV, Algebras of generalized analytic functions	467-470
F.-H. VASILESCU, A multi-dimensional spectral theory in C^* -algebras	471-491
E. VESENTINI, Invariant distances and invariant differential metrics in locally convex spaces	493-512
L. WAELEBROECK, The holomorphic functional calculus as an operational calculus	513-552
—, Quotient Banach spaces	553-562
—, Quotient Banach spaces; multilinear theory	563-571
—, The Taylor spectrum and quotient Banach spaces	573-578
J. ZEMÁNEK, Properties of the spectral radius in Banach algebras	579-595
Problems	597-603
