J. ADÁMEK <i>see</i> V. TRNKOVÁ and J. ADÁMEK	
H. ANDRÉKA and I. NÉMETI, Direct limits and filtered colimits are strongly equivalent in all categories	75-88
V. A. ARTAMONOV, Nonfree projectives in products of group varieties	7-13
H.-J. BANDELT, On regularity classes of binary relations	329-333
JU. A. BAHTURIN, On basic and axiomatic ranks of nilpotent varieties of Lie algebras	21-30
S. L. BLOOM, Iterative and metric algebraic theories	209-224
J. BROWKIN, The functor K_2 for the ring of integers of a number field	187-195
D. VAN DALEN, The creative subject and Heyting's arithmetic	379-382
K. DENECKE, Präprimale Algebren, die arithmetische Varietäten erzeugen	391-398
D. DORNINGER and G. EIGENTHALER, On compatible and order-preserving functions on lattices	97-104
G. EIGENTHALER <i>see</i> D. DORNINGER and G. EIGENTHALER	
M. FITTING, A generalization of elementary formal systems	89-96
K. GLAZEK and T. KATRIŇÁK, Weak homomorphisms of distributive p -algebras	383-390
H.-J. HOEHNKE, Heterogeneous monoid automata and admissible bisystems	347-368
K. ISÉKI, Some problems of BCK-algebras and griss type algebras	423-430
L. ITURRIOS, Modal operators on symmetrical Heyting algebras	289-303
J. JAKUBÍK, Projectable kernel of a lattice ordered group	105-112
M. F. JANOWITZ, Applications of the theory of partially ordered sets to cluster analysis	305-319
T. KATRIŇÁK <i>see</i> K. GLAZEK and T. KATRIŇÁK	
M. KOLIBIAR, Intervals, convex sublattices and subdirect representations of lattices	335-339
P. KÖHLER, Brouwerian semilattices: The lattice of total subalgebras	47-56
J. KREMPA, Homomorphisms of group rings	233-255
A. A. LAŠHI, Projections of mixed Lie rings	57-66
K. D. MAGILL, JR., Some open problems and directions for further research in semigroups of continuous selfmaps	439-454
I. NÉMETI <i>see</i> H. ANDRÉKA and I. NÉMETI	
W. NÖBAUER, Local polynomial functions: Results and problems	197-202
A. OBTULOWICZ and A. WIWĘGER, Categorical, functorial and algebraic aspects of the type-free lambda calculus	399-422
H. ONO and C. RAUSZER, On an algebraic and Kripke semantics for intermediate logics	431-438
J. PŁONKA, On bounding congruences in some algebras having the lattice structure	203-207
L. POLÁK, Weak automorphisms of 1-unary algebras	273-275

C. RAUSZER <i>see</i> H. ONO and C. RAUSZER	
I. RIVAL and B. SANDS, How many four-generated simple lattices?	67-72
M. ROCZEN, The concept of (ν)-equivalence in algebraic deformation theory	121-126
K. ROSENBAUM, Induzierte symplektische Moduln	321-328
J. RYŠLINKOVÁ and T. STURM, Two closure operators which preserve <i>m</i> -compacticity	113-119
I. SAIN, On classes of algebraic systems closed with respect to quotients	127-131
V. N. SALII, Regular elements in complete uniquely complemented lattices	15-19
B. SANDS <i>see</i> I. RIVAL and B. SANDS	
K. SEGERBERG, A completeness theorem in the modal logic of programs	31-46
M. SEKANINA, On system of subobject functors in the category of ordered sets	225-232
D. SKORDEV, An algebraic treatment of flow diagrams and its application to generalized recursion theory	277-287
L. A. SKORNJAKOV, On the wreath product of monoids	181-185
M. STERN, On the theory of Baer lattices	73-74
T. STURM <i>see</i> J. RYŠLINKOVÁ and T. STURM	
S. K. THOMASON, Undecidability of the completeness problem of modal logic	341-345
V. TRNKOVÁ and J. ADÁMEK, Analyses of languages accepted by varietor machines in category	257-272
J. C. VARLET, Regularity in p -algebras and p -semilattices	369-378
H. WERNER, Sheaf constructions in universal algebra and model theory	
A. WIWEGER <i>see</i> A. OBTUŁOWICZ and A. WIWEGER	133-179
