

# CONTENTS

Chapter 1. Introduction . . . . .	1
1.1. What is model theory? . . . . .	1
1.2. Model theory for sentential logic . . . . .	4
1.3. Languages, models and satisfaction . . . . .	18
1.4. Theories and examples of theories . . . . .	36
1.5. Elimination of quantifiers . . . . .	49
Chapter 2. Models constructed from constants . . . . .	61
2.1. Completeness and compactness . . . . .	61
2.2. Refinements of the method. Omitting types and interpolation theorems . . . . .	76
2.3. Countable models of complete theories . . . . .	93
Chapter 3. Further model-theoretic constructions . . . . .	107
3.1. Elementary extensions and elementary chains . . . . .	107
3.2. Applications of elementary chains . . . . .	123
3.3. Skolem functions and indiscernibles . . . . .	141
3.4. Some examples . . . . .	155
Chapter 4. Ultraproducts . . . . .	164
4.1. The fundamental theorem . . . . .	164
4.2. Measurable cardinals . . . . .	179
4.3. Regular ultrapowers . . . . .	200
Chapter 5. Saturated and special models . . . . .	214
5.1. Saturated and special models . . . . .	214
5.2. Preservation theorems . . . . .	227

5.3. Applications of special models to the theory of definability.	244
5.4. Applications to field theory . . . . .	263
5.5. Application to Boolean algebras . . . . .	293
<b>Chapter 6. More about ultraproducts and generalizations . . . . .</b>	<b>305</b>
6.1. Ultraproducts which are saturated . . . . .	305
6.2. Direct products, reduced products, and Horn sentences . . . . .	326
6.3. Direct products, reduced products, and Horn sentences (continued) . . . . .	341
6.4. Limit ultrapowers and complete extensions . . . . .	368
6.5. Iterated ultrapowers . . . . .	381
<b>Chapter 7. Selected topics . . . . .</b>	<b>401</b>
7.1. Categoricity in power . . . . .	401
7.2. An extension of Ramsey's theorem and applications; some two-cardinal theorems . . . . .	427
7.3. Models of large cardinality . . . . .	450
7.4. Large cardinals and the constructible universe . . . . .	474
<b>Appendix A. Set theory . . . . .</b>	<b>494</b>
<b>Appendix B. Open problems in classical model theory . . . . .</b>	<b>512</b>
<b>Historical notes . . . . .</b>	<b>515</b>
<b>References . . . . .</b>	<b>532</b>
<b>Index of definitions . . . . .</b>	<b>543</b>
<b>Index of symbols . . . . .</b>	<b>549</b>
