

T A B L E O F C O N T E N T S

| | |
|--|-----------|
| Chapter 1: Definitions and basic facts | 1 |
| § 1. Notations | 1 |
| § 2. Generalized quantifiers | 3 |
| § 3. Decidability | 7 |
| Chapter 2: Elimination of generalized quantifiers | 11 |
| § 1. Eliminability of Q_α | 11 |
| § 2. Decidability | 16 |
| Chapter 3: Abelian groups | 17 |
| § 1. The results of Szmielew | 17 |
| § 2. Pure and basic subgroups | 18 |
| § 3. Elimination of quantifiers | 19 |
| § 4. The new core sentences | 21 |
| § 5. $\text{Th}_\alpha(\text{AG})$ is decidable | 23 |
| § 6. Abelian p-groups and the quantifier Q_α | 25 |
| Chapter 4: Graphs and forests | 28 |
| § 1. Graphs, shrinking types, and n-equivalence for $L(Q_1)$ | 28 |
| § 2. Constructions of forests | 38 |
| § 3. A dense system for the Q_1 -theory of trees | 43 |
| Chapter 5: Linear orderings | 49 |
| § 1. Notations | 49 |
| § 2. Games for linear orderings | 56 |
| § 3. Combinatorics | 67 |
| § 4. Well-orderings | 68 |
| § 5. Terms | 77 |
| § 6. Decidability | 85 |

| | |
|--|------------|
| Chapter 6: Boolean algebras | 91 |
| § 1. General remarks | 91 |
| § 2. Special Boolean algebras and products of Boolean algebras | 95 |
| § 3. Games for Boolean algebras | 100 |
| § 4. Dense systems | 109 |
| 4.1. A dense system for $\text{Th}_0(\text{Ba})$ | 113 |
| 4.2. A dense system for $\text{Th}_\omega(\text{Ba})$ | 118 |
| 4.3. A dense system for $\text{Th}_1(\text{Ba})$ | 137 |
| 4.4. The general case | 146 |
| § 5. The decidability of $\text{Th}_\alpha(\text{Ba})$ | 150 |
| Chapter 7: Pseudo-trees | 175 |
| § 1. Ehrenfeucht's game and limits | 175 |
| § 2. ω -trees and n-equivalence for $L(Q_1)$ | 181 |
| § 3. A dense system for connected ω -trees | 194 |
| § 4. Some consequences, pseudo-trees and trees | 211 |
| Chapter 8: Further quantifiers | 214 |
| § 1. $L(Q_\alpha^{<\omega})$, L^{pos} , L^{neg} , $L(aa)$ | 214 |
| § 2. The quantifier I | 217 |
| References | 220 |
| Index of notations | 230 |
| Subject index | 235 |
