2	Gen	eral summary statistics	36
	2.1	The purpose of summary statistics	36
	2.2	The mode	36
		Modal class	37
	2.3	The median	38
	2.4	The mean	39
	2.5	Advantages and disadvantages of	
		the mode, mean, and median	41
		Advantages	41
		Disadvantages	41
	2.6	Sigma (Σ) notation	42
	• •	Applications of sigma notation	42
	2.7	The mean of a frequency distribution	44

ix

2.8	The mean of grouped data	44
2.9	Using coded values to simplify	
	calculations	46
2.10	The median of grouped data	50
2.11	Quartiles, deciles and percentiles	51
	Grouped data	51
	Ungrouped data	52
2.12		55
2.13	2	55
	Refined boxplots	56
2.14		58
2.15		59
2.16		59
	Using the divisor n	59
	Using the divisor $(n-1)$	59
	Calculating the variance	60
2.18		61
	Approximate properties of the	
3 10	standard deviation	63
2.19	Variance and standard deviation	
2 20	for frequency distributions	65
2.20	Variance calculations using	
2 21	coded values	66
	Symmetric and skewed data	69
2.22	Standardising to a prescribed mean and standard deviation	٠.
2 22		71
4.23	Calculating the combined mean and	
2.24	variance of several samples Combining proportions	72
	Combining proportions offer summary	73
Chaj	ner summary	75
Spec	ial summary statistics	84
3.1	Standardised birth and death rates	84
3.2	The weighted mean and index	04
	numbers	86
3.3	Price indices	88
3.4	Record prices and record earnings!	89
3.5	Time series	91
	An underlying trend	91
	Periodicity	92
	Cycles	92
	Random variation	93
	Moving averages	93
	4-point and 12-point moving averages	95
	Estimating periodic effects	97
	Predicting the future	98

Chapter summary

4	Data	sources	106
	4.1	Data collection by observation	106
	4.2	Methods of data collection by	
		questionnaire (or survey)	106
		The face-to-face interview	107
		The 'postal' questionnaire	107
		The telephone interview	108
	4.3	Questionnaire design	108
		Some poor questions	108
		Some good questions	109
		The order of questions	109
		Question order and bias	110
		Filtered questions	110
		Open and closed questions	110
		The order of answers for closed	
		questions	110
		The pilot study	111
	4.4	National surveys	111
		National censuses	111
		Government surveys	111
	15	Other national surveys in Britain	112
	4.5 4.6	Government publications The Data Archive	112 113
	4.0	The Data Archive	113
5	Prot	pability	114
	5.1	Relative frequency	114
	5.2	Preliminary definitions	114
	5.3	The probability scale	115
	5.4	Probability with equally likely outcomes	115
	5.5	The complementary event, E'	117
	5.6	Venn diagrams	118
	5.7	Unions and intersections of events	118
	5.8	Mutually exclusive events	121
	5.9	The addition rule	121
	5.10	Exhaustive events	122
	5.11	Probability trees	123
	5.12	Sample proportions and probability Unequally likely possibilities	125
	5.13	1 J F III	127
	0.15	The multiplication rule	127
	5.14		127 130
		Orderings of similar objects	130
	5.15		135
		Sampling with replacement	133
	5.17		138
	Chap	oter summary	143
	•	•	
6	Cond	litional probability	146
	6.1	Notation	140

The generalised multiplication rule

	6.2	Statistical independence	148
	6.3	Mutual and pairwise independence	152
	6.4	The total probability theorem	153
	6.5	Bayes' theorem	157
	Cha	pter summary	163
7	Pro	bability distributions and expectations	167
•	7.1	Notation	
	7.1		167
	1.2	Probability distributions	168
		The probability function	169
		Illustrating probability distributions	169
		Estimating probability distributions The cumulative distribution function	171
	7.2		172
	7.3	Some special discrete probability	
		distributions	173
		The discrete uniform distribution	173
	7.4	The Bernoulli distribution	174
	7.4	The geometric distribution	174
		Cumulative probabilities	175
		A paradox!	176
	7.5	Expectations	177
		Expected value or expected number	179
		Expectations of functions of	
		random variables	181
	7.6	The variance	182
	7.7	The standard deviation	187
	7.8	Greek notation	189
	Cha	pter summary	190
8	Exp	ectation algebra	192
	8.1	E(X+a) and $Var(X+a)$	193
	8.2	E(aX) and $Var(aX)$	195
	8.3	E(aX + b), $Var(aX + b)$ and	173
	0.0	E[g(X) + h(X)]	196
		Alternative expressions for $Var(X)$	197
	8.4	Expectations of functions of more	177
	0	than one variable	197
		Var(X + Y)	198
		$E(X_1 + X_2)$ and $Var(X_1 + X_2)$	200
		The difference between $2X$ and	200
		$X_1 + X_2$	201
	8.5	The expectation and variance of the	201
	0.5	sample mean	203
	8.6	The unbiased estimate of the	203
	0.0		205
	8.7	population variance $E(tX)$ the makehilian parameters	205
	0.7	$E(t^{\chi})$ – the probability generating function	204
			206
		Pgf for the sum of independent	210
	Char	random variables	210
	Cnap	oter summary	213

9	The	binomial distribution	216
	9.1	Derivation	216
	9.2	Notation	223
	9.3	'Successes' and 'failures'	223
	9.4	The shape of the distribution	223
	9.5	Calculating binomial probabilities	225
	9.6	Tables of binomial distributions	227
	9.7	The mean and variance of a	
		binomial distribution	229
	9.8	The probability generating function	231
	9.9	The negative binomial distribution	232
	Chap	oter summary	233
40		.	
10	The	Poisson distribution	236
	10.1	The Poisson process	236
	10.2	The form of the distribution	238
	10.3	The properties of a Poisson	
		distribution	241
		The mean	241
		The variance	241
		The shape of a Poisson	
		distribution	242
	10.4	Calculation of Poisson	
		probabilities	243
	10.5	Tables for Poisson distributions	245
	10.6	The Poisson approximation to	
		the binomial	247
		Derivation of the result	247
	10.7	Sums of independent Poisson	
		random variables	250
	10.8	The National Lottery	251
	10.9	The probability generating function	252
	Chap	ter summary	253
	C 4		250
11	Cont	inuous random variables	258
	11.1	Histograms and sample size	258
	11.2	The probability density function, f	260
		Properties of the pdf	261
	11.3	The cumulative distribution	
		function, F	265
		The median, m	268
	11.4	Expectation and variance	274
	11.5	Obtaining f from F	281
	11.6	The uniform (rectangular)	
		distribution	282
	11.7	The exponential distribution	287
		Shape of the exponential	
		distribution	287
		Expectation and variance of	

the exponential distribution

		Connection with a Poisson	
		process	290
	11.8	The Cauchy distribution	294
	11.9	Moments	295
	11.10	$E(e^{tX})$ – the moment generating	
		function	295
		Mgf of the sum of independent	
		random variables	297

15 Hypothesis tests

The null and alternative

The general test procedure

The null hypothesis

variance unknown

Critical regions and significance

Test for mean, known variance, normal distribution or large sample

Identifying the two hypotheses

The alternative hypothesis

Test for mean, large sample,

Test for large Poisson mean

Test for proportion, large sample
