

# CONTENTS

Preface . . . . .	VII
<b>1. INTRODUCTION</b> . . . . .	1
1.1. The Axiom of Choice . . . . .	1
1.2. A nonmeasurable set of real numbers . . . . .	2
1.3. A paradoxical decomposition of the sphere . . . . .	3
1.4. Problems . . . . .	6
1.5. Historical remarks . . . . .	8
<b>2. USE OF THE AXIOM OF CHOICE</b> . . . . .	9
2.1. Equivalents of the Axiom of Choice . . . . .	9
2.2. Some applications of the Axiom of Choice in mathematics . . . . .	11
2.3. The Prime Ideal Theorem . . . . .	14
2.4. The Countable Axiom of Choice . . . . .	20
2.5. Cardinal numbers . . . . .	23
2.6. Problems. . . . .	25
2.7. Historical remarks . . . . .	29
<b>3. CONSISTENCY OF THE AXIOM OF CHOICE</b> . . . . .	31
3.1. Axiomatic systems and consistency . . . . .	31
3.2. Axiomatic set theory . . . . .	31
3.3. Transitive models of ZF . . . . .	33
3.4. The constructible universe. . . . .	38
3.5. Problems. . . . .	40
3.6. Historical remarks . . . . .	43
<b>4. PERMUTATION MODELS</b> . . . . .	44
4.1. Set theory with atoms . . . . .	44

4.2. Permutation models . . . . .	45
4.3. The basic Fraenkel model . . . . .	48
4.4. The second Fraenkel model . . . . .	48
4.5. The ordered Mostowski model . . . . .	49
4.6. Problems . . . . .	51
4.7. Historical remarks . . . . .	54
<b>5. INDEPENDENCE OF THE AXIOM OF CHOICE . . . . .</b>	<b>55</b>
5.1. Generic models . . . . .	55
5.2. Symmetric submodels of generic models . . . . .	64
5.3. The basic Cohen model . . . . .	66
5.4. The second Cohen model . . . . .	68
5.5. Independence of the Axiom of Choice from the Ordering Principle . . . . .	71
5.6. Problems . . . . .	78
5.7. Historical remarks . . . . .	84
<b>6. EMBEDDING THEOREMS . . . . .</b>	<b>85</b>
6.1. The First Embedding Theorem . . . . .	85
6.2. Refinements of the First Embedding Theorem . . . . .	89
6.3. Problems . . . . .	94
6.4. Historical remarks . . . . .	96
<b>7. MODELS WITH FINITE SUPPORTS . . . . .</b>	<b>97</b>
7.1. Independence of the Axiom of Choice from the Prime Ideal Theorem . . . . .	97
7.2. Independence of the Prime Ideal Theorem from the Ordering Principle . . . . .	100
7.3. Independence of the Ordering Principle from the Axiom of Choice for Finite Sets . . . . .	104
7.4. The Axiom of Choice for Finite Sets . . . . .	107
7.5. Problems . . . . .	112
7.6. Historical remarks . . . . .	117
<b>8. SOME WEAKER VERSIONS OF THE AXIOM OF CHOICE . . . . .</b>	<b>119</b>
8.1. The Principle of Dependent Choices and its generalization . . . . .	119
8.2. Independence results concerning the Principle of Dependent Choices . . . . .	122
8.3. Problems . . . . .	131
8.4. Historical remarks . . . . .	132

<b>9. NONTRANSFERABLE STATEMENTS . . . . .</b>	<b>133</b>
9.1. Statements which imply AC in ZF but are weaker than AC in ZFA . . . . .	133
9.2. Independence results in ZFA . . . . .	134
9.3. Problems . . . . .	138
9.4. Historical remarks . . . . .	140
<b>10. MATHEMATICS WITHOUT CHOICE . . . . .</b>	<b>141</b>
10.1. Properties of the real line . . . . .	141
10.2. Algebra without choice . . . . .	145
10.3. Problems . . . . .	148
10.4. Historical remarks . . . . .	150
<b>11. CARDINAL NUMBERS IN SET THEORY WITHOUT CHOICE . . . . .</b>	<b>151</b>
11.1. Ordering of cardinal numbers . . . . .	151
11.2. Definability of cardinal numbers . . . . .	152
11.3. Arithmetic of cardinal numbers . . . . .	156
11.4. Problems . . . . .	161
11.5. Historical remarks . . . . .	165
<b>12. SOME PROPERTIES CONTRADICTING THE AXIOM OF CHOICE . . . . .</b>	<b>167</b>
12.1. Measurability of $\aleph_1$ . . . . .	167
12.2. Closed unbounded sets and partition properties . . . . .	169
12.3. The Axiom of Determinateness . . . . .	176
12.4. Problems . . . . .	181
12.5. Historical remarks . . . . .	182
<b>APPENDIX . . . . .</b>	<b>183</b>
A.1. Equivalents of the Axiom of Choice . . . . .	183
A.2. Equivalents of the Prime Ideal Theorem . . . . .	183
A.3. Various independence results . . . . .	183
A.4. Miscellaneous examples . . . . .	185
<b>REFERENCES . . . . .</b>	<b>186</b>
<b>AUTHOR INDEX . . . . .</b>	<b>195</b>
<b>SUBJECT INDEX . . . . .</b>	<b>197</b>
<b>LIST OF SYMBOLS . . . . .</b>	<b>200</b>
