

Contents

Introduction	5
Chapter I. Introduction to Alternative Set Theory	15
Section 1. Sets	17
Section 2. Classes	27
Section 3. Semisets	33
Section 4. Countable classes	39
Section 5. Codable classes	46
Section 6. Uncountable classes	51
Chapter II. Some traditional mathematical structures	55
Section 1. Natural numbers	57
Section 2. Rational and real numbers	64
Section 3. Ordinal numbers	68
Section 4. Ultrafilters	73
Section 5. Basic languages	77
Chapter III. Topological shapes	82
Section 1. Equivalences of indiscernibility	83
Section 2. Figures	87
Section 3. Connectedness	93
Chapter IV. Motion	97
Section 1. Motions of points	98
Section 2. Pointwise motions of sets	102
Chapter V. Similarities	109
Section 1. Automorphisms	111
Section 2. Endomorphisms	118
Bibliography	120
