

TABLE OF CONTENTS

INTRODUCTION	1
1* Motivation	1
2* Summary	5
3* Preliminaries on categories	7
I. VECTOR SPACES	11
§1 Pairs of dual vector spaces and regular linear systems (Categories Π, T ; Functor $\mathfrak{u}$)	12
§2 Regular linear systems and weakly topologized vector spaces (Categories T, H ; Functor $\mathfrak{z}$)	16
II. SEMIGROUPS	19
§3 Dense extension of primitive regular semigroups (Categories Σ, Σ_1, M, M_1)	20
§4 Pairs of dual vector spaces and completely 0-simple semigroups (Categories Π_i, Σ_i ; Functors $\mathfrak{E}_i, i = 3, 5$)	26
§5 Primitive regular semigroups and their maximal dense extensions (Categories $\Sigma_i, M_i, i = 3, 5$; Functors $\mathfrak{u}, \mathfrak{u}_i, \mathfrak{E}, \mathfrak{E}_i, i = 1-5$)	31
III. RINGS	39
§6 Semisimple atomic rings and their maximal essential extensions	

(Categories P, P_i, M, M_i ; Functors $\mathfrak{U}, \mathfrak{U}_i, \mathfrak{C}, \mathfrak{C}_i, i = 1-5$). 40

§7 Maximal essential extensions of rings and maximal
dense extensions of semigroups
(Functors $\mathfrak{S}_i, i = 2-5$) 47

IV. LATTICES 50

§8 Subprojective lattices
(Categories $\Lambda, \Lambda_i, i = 1-5$) 51

§9 Semisimple atomic rings and subprojective lattices
(Functors $\mathfrak{R}, \mathfrak{R}_i, i = 1-5$) 56

V. PROJECTIVE SPACES 63

§10 Generalities
(Category $\mathbf{1}$) 64

§11 Subprojective lattices and pairs of dual projective spaces
(Category Λ' ; Functors $\mathfrak{M}, \mathfrak{N}$) 73

§12 Properties of functors $\mathfrak{M}$ and $\mathfrak{N}$
(Categories $\mathbf{1}_i$; Functors $\mathfrak{M}_i, \mathfrak{N}_i, i = 4, 5$) 83

§13 Regular linear systems and pairs of dual projective
spaces
(Categories $\mathfrak{U}_5, \mathfrak{F}_5, \mathfrak{T}_5$; Functor $\mathfrak{R}_5$) 92

VI. THE LOOP 99

§14 Commutativity of the loop
(Functor $\mathfrak{E}_5$) 99

§15 The equivalence of P_i and Λ_i for $i = 4, 5$
(Functors $\mathfrak{R}_4, \mathfrak{R}_5$) 106

VII. ANTIAUTOMORPHISMS

114

- §16 Antiautomorphisms of semigroups
(Categories Σ_i, M_i ; Functors $\mathfrak{A}_i, \mathfrak{B}_i$, $i = 6-8$) 116
- §17 Antiautomorphisms of rings
(Categories P_i, N_i, M_i ; Functors $\mathfrak{U}_i, \mathfrak{G}_i, \mathfrak{R}_i$, $i = 6-8$) 122
- §18 Antiautomorphisms of lattices
(Categories P_i, Λ_i ; Functors $\mathfrak{R}_i$, $i = 6-8$) 125
- §19 Correlations and subprojective lattices
(Categories Γ_i, Λ_i ; Functors $\mathfrak{M}_i, \mathfrak{N}_i$, $i = 6-8$) 131
- §20 Scalar products and correlations
(Categories Π_i, Γ_i ; Functors $\mathfrak{R}_i$, $i = 6-8$) 140
- §21 Scalar products and antiautomorphisms of semigroups
(Categories Π_i, Σ_i ; Functors $\mathfrak{C}_i$, $i = 6-8$) 151
- §22 Commutativity of the loop
(Functors $\mathfrak{C}_i$, $i = 6-8$) 158
- §23 The equivalence of P_i and Λ_i for $i = 6-8$
(Functors $\mathfrak{R}_i$, $i = 6-8$) 161

VIII. SPECIAL CASES

168

- §24 Vector spaces, semigroups and rings
(Categories $\Pi_i, \Sigma_i, M_i, P_i, N_i$;
Functors $\mathfrak{C}_i, \mathfrak{A}_i, \mathfrak{B}_i, \mathfrak{U}_i, \mathfrak{G}_i, \mathfrak{R}_i$, $i = 9, 10$) 169
- §25 Rings and lattices
(Categories P_i, Λ_i ; Functors $\mathfrak{R}_i$, $i = 9, 10$) 175
- §26 Lattices, vector and projective spaces
(Categories $\Lambda_i, \Gamma_i, \Pi_i$; Functors $\mathfrak{M}_i, \mathfrak{N}_i, \mathfrak{R}_i$, $i = 9, 10$) 182
