

CONTENTS

Preface	xi
Acknowledgments	xiii
1. Graph Theoretic Foundations	1
1.1. Introduction	1
1.2. Some basic definitions	2
1.3. Planar graphs	6
1.4. Euler's formula	9
1.5. Kuratowski's theorem	11
1.6. Dual graphs	15
1.7. Bounds for planar graphs	19
2. Algorithmic Foundations	23
2.1. What is an algorithm?	23
2.2. Machine model and complexity	24
2.3. <i>NP</i> -complete	25
2.4. Data structure and graph representation	27
2.5. Exploring a graph	29
2.5.1. Depth-first search	29
2.5.2. Breadth-first search	31
3. Planarity Testing and Embedding	33
3.1. Introduction	33
3.2. Planarity testing	34
3.3. Embedding algorithm	49
3.3.1. Algorithm for extending A_u into Adj	50
3.3.2. Algorithm for constructing A_u	53

4. Drawing Planar Graphs	65
4.1. Introduction	65
4.2. Convex drawing	66
4.3. Convex testing	70
4.3.1. Definitions	71
4.3.2. Condition II	73
4.3.3. Testing algorithm	75
4.4. Example	80
5. Vertex-Coloring	83
5.1. Introduction	83
5.2. Proof of the five-coloring theorem and the $O(n^2)$ algorithm	84
5.3. Batch processing algorithm	87
5.4. Sequential processing algorithm	95
6. Edge-Coloring	99
6.1. Introduction	99
6.2. Algorithm COLOR	100
6.3. Algorithm ALCOLOR	104
6.3.1. Planar graphs	108
6.3.2. Series-parallel graphs	111
6.3.3. Random graphs	112
6.4. Edge-coloring multigraphs	113
7. Independent Vertex Sets	121
7.1. Introduction	121
7.2. Approximation algorithm	122
7.3. Baker's algorithm	134
8. Listing Subgraphs	137
8.1. Introduction	137
8.2. Arboricity and efficient edge-searching	138

8.3. Listing triangles	140
8.4. Listing quadrangles	142
8.5. Listing maximal cliques	144
9. Planar Separator Theorem	149
9.1. Introduction	149
9.2. Preliminary	149
9.3. Planar separator theorem	151
9.4. Applications of the planar separator theorem	160
9.5. Maximum matching	164
9.6. Minimum vertex cover	168
10. Hamiltonian Cycles	171
10.1. Introduction	171
10.2. Proof of Tutte's theorem	172
10.3. Algorithm and $O(n^2)$ bound	182
10.4. Hamiltonian walk	184
11. Flows in Planar Graphs	185
11.1. Introduction	185
11.2. Definition of multicommodity flows	186
11.3. Planar single-commodity flow	189
11.4. Multicommodity flows for C_1	191
11.4.1. Preliminary	192
11.4.2. Feasibility	195
11.4.3. Algorithm DELTAFLOW	197
11.4.4. Algorithm MULTIFLOW1	201
11.4.5. Time and space of MULTIFLOW1	205
11.5. Multicommodity flows for C_a	210
11.5.1. Feasibility	210
11.5.2. Algorithm MULTIFLOW2	214
11.5.3. Refinement and complexity	218
References	221
