

Contents

<i>Foreword</i>	v
<i>Notations</i>	ix
Chapter I DEFINITION OF FORMAL GROUPS	1
§1. <i>C</i> -groups and <i>C</i> -cogroups	1
§2. Formal groups and their bigebras	7
§3. Elementary theory of formal groups	23
Chapter II INFINITESIMAL FORMAL GROUPS	39
§1. The decomposition theorem	39
§2. The structure theorem for stable infinitesimal formal groups	44
§3. Reduced infinitesimal formal groups	76
Chapter III INFINITESIMAL COMMUTATIVE GROUPS	117
§1. Generalities	117
§2. Free commutative bigebras	121
§3. Modules of hyperexponential vectors	140
§4. Distinguished modules over a Hilbert-Witt ring	155
§5. The case of an algebraically closed field	174
§6. Applications to commutative reduced infinitesimal groups	191
Chapter IV REPRESENTABLE REDUCED INFINITESIMAL GROUPS	203
<i>Bibliography</i>	259
<i>Index</i>	263
