

Table of Contents

Chapter I. Generalities on Compact Lie Groups and G -Spaces	1
§ 1. General Properties of Compact Topological Groups	1
§ 2. Generalities of Fibre Bundles and Free G -Spaces	6
§ 3. The Existence of Slice and its Consequences on General G -Space	10
§ 4. General Theory of Compact Connected Lie Groups	13
Chapter II. Structural and Classification Theory of Compact Lie Groups and Their Representations	17
§ 1. Orbit Structure of the Adjoint Action	17
§ 2. Classification of Compact Connected Lie Groups	23
§ 3. Classification of Irreducible Representations	30
Chapter III. An Equivariant Cohomology Theory Related to Fibre Bundle Theory	33
§ 1. The Construction of $H_G^*(X)$ and its Formal Properties	33
§ 2. Localization Theorem of Borel-Atiyah-Segal Type	39
Chapter IV. The Orbit Structure of a G -Space X and the Ideal Theoretical Invariants of $H_G^*(X)$	43
§ 1. Some Basic Fixed Point Theorems	43
§ 2. Torsions of Equivariant Cohomology and F -Varieties of G -Spaces . . .	54
§ 3. A Splitting Theorem for Poincaré Duality Spaces	65
Chapter V. The Splitting Principle and the Geometric Weight System of Topological Transformation Groups on Acyclic Cohomology Manifolds or Cohomology Spheres	70
§ 1. The Splitting Principle and the Geometric Weight System for Actions on Acyclic Cohomology Manifolds	71
§ 2. Geometric Weight System and Orbit Structure	75
§ 3. Classification of Principal Orbit Types for Actions of Simple Compact Lie Groups on Acyclic Cohomology Manifolds.	83

§ 4. Classification of Connected Principal Orbit Types for Actions of (General) Compact Connected Lie Groups on Acyclic Cohomology Manifolds	91
§ 5. A Basis Fixed Point Theorem	95
§ 6. Low Dimensional Topological Representations of Compact Connected Lie Groups	97
§ 7. Concluding Remarks Related to Geometric Weight System	101
 Chapter VI. The Splitting Theorems and the Geometric Weight System of Topological Transformation Groups on Cohomology Projective Spaces	105
§ 1. Transformation Groups on Cohomology Complex Projective Spaces	106
§ 2. Transformation Groups on Cohomology Quaternionic Projective Spaces	112
§ 3. Structure Theorems for Actions of $\mathbb{Z}_p$ -Tori on $\mathbb{Z}_p$ -Cohomology Projective Spaces (p Odd Primes)	118
§ 4. Structure Theorems for Actions of $\mathbb{Z}_2$ -Tori on $\mathbb{Z}_2$ -Cohomology Projective Spaces	121
 Chapter VII. Transformation Groups on Compact Homogeneous Spaces	129
§ 1. Topological Transformation Groups on Spaces of the Rational Homotopy Type of Product of Odd Spheres	134
§ 2. Degree of Symmetry of Compact Homogeneous Spaces	148
