

## Contents

|  |     |
|--|-----|
| § I. General theory of strong ILB-Lie groups and subgroups-----                        | 1   |
| § II. Groups of diffeomorphisms-----   | 27  |
| § III. Basic theorems I.-----  | 41  |
| § IV. Vector bundles over strong ILB-Lie groups-----                                   | 53  |
| § V. Review of the smooth extension theorem and a remark on<br>elliptic operators----- | 68  |
| § VI. Basic theorems II. ( Frobenius theorem )-----                                    | 75  |
| § VII. Frobenius theorem on strong ILB-Lie groups-----                                 | 83  |
| § VIII. Miscellaneous examples-----  | 95  |
| § IX. Primitive transformation groups-----   | 114 |
| § X. Lie Algebras of vector fields-----  | 123 |
| § XI. Linear groups and groups of diffeomorphisms-----                                 | 140 |
