TABLE OF CONTENTS

ACKNOWLEDGMENTS xi

I / INTRODUCTION 1
- I. The Pre-Euclidean Theory of Incommensurable Magnitudes 1
- II. General Methodological Observations 5
- III. Indispensable Definitions 14

II / THE SIDE AND THE DIAMETER OF THE SQUARE 21
- I. The Received Proof of the Incommensurability of the Side and Diameter of the Square 22
- II. *Anthyphairesis* and the Side and Diameter 29
- III. Impact of the Discovery of Incommensurability 36
- IV. Summary of the Early Studies 49

III / PLATO'S ACCOUNT OF THE WORK OF THEODORUS 62
- I. Formulation of the Problem: δυνάμεις 65
- II. The Role of Diagrams: γράφειν 69
- III. The Ideal of Demonstration: ἀποφαίνειν 75
- IV. Why Separate Cases? 79
- V. Why Stop at Seventeen? 81
- VI. The Theorems of Theaetetus 83
- VII. Theodorus' Style of Geometry 87
- VIII. Summary of Interpretive Criteria 96

IV / A CRITICAL REVIEW OF RECONSTRUCTIONS OF THEODORUS' PROOFS 109
- I. Reconstruction via Approximation Techniques 109
- II. Algebraic Reconstruction 111
- III. Anthyphairetic Reconstruction 118

V / THE PYTHAGOREAN ARITHMETIC OF THE FIFTH CENTURY 131
I. Pythagorean Studies of the Odd and the Even 134
II. The Pebble-Representation of Numbers 135
III. The Pebble-Methods Applied to the Study of the Odd and the Even 137
IV. The Theory of Figured Numbers 142
V. Properties of Pythagorean Number Triples 154

VI / THE EARLY STUDY OF INCOMMENSURABLE MAGNITUDES: THEODORUS 170
I. Numbers Represented as Magnitudes 171
II. Right Triangles and the Discovery of Incommensurability 174
III. The Lesson of Theodorus 181
IV. Theodorus and *Elements* II 193

VII / THE ARITHMETIC OF INCOMMENSURABILITY: THEAETETUS AND ARCHYTAS 211
I. The Theorem of Archytas on Epimoric Ratios 212
II. The Theorems of Theaetetus 225
III. The Arithmetic Proofs of the Theorems of Theaetetus 227
IV. The Arithmetic Basis of Theaetetus' Theory 233
V. Observations on Pre-Euclidean Arithmetic 238

VIII / THE GEOMETRY OF INCOMMENSURABILITY: THEAETETUS AND EUDOXUS 252
I. The Theorems of Theaetetus: Proofs of the Geometric Part 252
II. *Anthyphairesis* and the Theory of Proportions 255
III. The Theory of Proportions in *Elements* X 261
IV. Theaetetus and Eudoxus 273
V. Summary of the Development of the Theory of Irrationals 286

IX / CONCLUSIONS AND SYNTHESES 298
I. The Pre-Euclidean Theory of Incommensurable Magnitudes 298
II. The Editing of the *Elements* 303
III. The Pre-Euclidean Foundations-Crises 306

APPENDICES
A. On the Extension of Theodorus' Method 314
B. On the Anthyphairetic Proportion Theory 332

A LIST OF THE THEOREMS IN CHAPTERS V–VIII AND THE APPENDICES 345

REFERENCING CONVENTIONS AND BIBLIOGRAPHY 353
I. Referencing Conventions 353
II. Abbreviations used in the Notes and the Bibliography 353
III. Bibliography of Works Consulted: Ancient Authors 355
IV. Modern Works: Books 357
V. Modern Works: Articles 360

INDEX OF NAMES 366

INDEX OF PASSAGES CITED FROM ANCIENT WORKS 369
