

CONTENTS

L. Simon

Lecture 1 :	Hausdorff measure and area/co-area formulae	9
Lecture 2 :	Countably n-rectifiable sets	20
Lecture 3 :	Rectifiable n-varifolds	32
Lecture 4 :	Monotonicity and consequences	42
Lecture 5 :	The Allard regularity theorem and general varifolds	49

R. Hardt

Lecture 1 :	Forms and currents	63
Lecture 2 :	n-dimensional currents in \mathbb{R}^n	75
Lecture 3 :	The deformation theorem and applications	83
Lecture 4 :	The rectifiability and compactness theorems	94
Lecture 5 :	Mass-minimizing currents	105
