Preface	v
0 Introduction and Examples	1
Notes	22
Problems and Exercises	23
1 Polytopes, Polyhedra, and Cones	27
1.1 The “Main Theorem”	27
1.2 Fourier-Motzkin Elimination: An Affine Sketch	32
1.3 Fourier-Motzkin Elimination for Cones	37
1.4 The Farkas Lemma	39
1.5 Recession Cone and Homogenization	43
1.6 Carathéodory’s Theorem	45
Notes	47
Problems and Exercises	49
2 Faces of Polytopes	51
2.1 Vertices, Faces, and Facets	51
2.2 The Face Lattice	55
2.3 Polarity	59
2.4 The Representation Theorem for Polytopes	64
2.5 Simplicial and Simple Polytopes	65
2.6 Appendix: Projective Transformations	67
Notes	69
Problems and Exercises	70

3	Graphs of Polytopes	77
3.1	Lines and Linear Functions in General Position	77
3.2	Directing the Edges (“Linear Programming for Geometers”)	80
3.3	The Hirsch Conjecture	83
3.4	Kalai’s Simple Way to Tell a Simple Polytope from Its Graph	93
3.5	Balinski’s Theorem: The Graph is d -Connected	95
	Notes	96
	Problems and Exercises	97
4	Steinitz’ Theorem for 3-Polytopes	103
4.1	3-Connected Planar Graphs	104
4.2	Simple ΔY Transformations Preserve Realizability	107
4.3	Planar Graphs are ΔY Reducible	109
4.4	Extensions of Steinitz’ Theorem	113
	Notes	115
	Problems and Exercises	119
5	Schlegel Diagrams for 4-Polytopes	127
5.1	Polyhedral Complexes	127
5.2	Schlegel Diagrams	132
5.3	d -Diagrams	138
5.4	Three Examples	139
	Notes	143
	Problems and Exercises	145
6	Duality, Gale Diagrams, and Applications	149
6.1	Circuits and Cocircuits	150
	(a) Affine Dependences	150
	(b) Affine Functions	153
6.2	Vector Configurations	156
6.3	Oriented Matroids	157
	(a) Axiomatics	159
	(b) Equivalence	160
	(c) Duality	163
	(d) Deletion and Contraction	163
6.4	Dual Configurations and Gale Diagrams	165
6.5	Polytopes with Few Vertices	171
	(a) A Nonrational 8-Polytope	172
	(b) Facets of 4-Polytopes Cannot be Prescribed	173
	(c) 2-Faces of 5-Polytopes Cannot be Prescribed	175
	(d) Polytopes Violating the Isotopy Conjecture	177
6.6	Rigidity and Universality	179
	Notes	182
	Problems and Exercises	184

7 Fans, Arrangements, Zonotopes, and Tilings	191
7.1 Fans	191
7.2 Projections and Minkowski Sums	195
7.3 Zonotopes	198
7.4 Nonrealizable Oriented Matroids	208
7.5 Zonotopal Tilings	217
Notes	224
Problems and Exercises	225
8 Shellability and the Upper Bound Theorem	231
8.1 Shellable and Nonshellable Complexes	232
8.2 Shelling Polytopes	239
8.3 h -Vectors and Dehn-Sommerville Equations	246
8.4 The Upper Bound Theorem	254
8.5 Some Extremal Set Theory	258
8.6 The g -Theorem and Its Consequences	268
Notes	275
Problems and Exercises	281
9 Fiber Polytopes, and Beyond	291
9.1 Polyhedral Subdivisions and Fiber Polytopes	292
9.2 Some Examples	299
9.3 Constructing the Permuto-Associahedron	310
9.4 Toward a Category of Polytopes?	319
Notes	320
Problems and Exercises	321
References	325
Index	365
