Introduction	3
Chapter 1 – What do you want to know?	9
Who? Why? What? How?	9
Answering your questions. Three examples.	13
Chapter 2 – Paradigms, theories, methods and evidence	19
Basic concepts	19
Explaining the drug phenomenon	23
Paradigms of the drug phenomenon and their implications	26
Concepts and definitions of epidemiology	34
Chapter 3 – Evolution of epidemiology and drugs research in Europe	45
Broad themes	45
History	49
Chapter 4 – What do we know and what lessons have we learned?	57
Who are “we”, what does “known” mean and who has learned?	57
Understanding the drug phenomenon – what do we know?	58
How has this progress been useful to policy and practice?	61
Lessons learned	65
Implications	65
Chapter 5 – What don't we know (but need to) and why don't we know it?	69
What don't we know (but need to)?	69
Why don't we know it?	77
Implications	79
Chapter 6 – Challenges for research, policy and practice	81
Challenges for epidemiological and other social research on drugs	81
Strengthening the research base for policy-making	83
Connecting research, policy and practice	85
Source material and further reading	89
