## Preface

<b>1. Elliptic systems in the plane</b>	<b>1</b>
1.1 First-order elliptic systems in the plane	1
1.1.1 Introduction	1
1.1.2 The Riemann problem for the general first-order elliptic equation	7
1.1.3 The Schwartz problem in a multiply connected domain	15
1.1.4 The Riemann-Hilbert problem in a multiply connected domain	21
1.2 Second-order elliptic systems in the plane	35
1.2.1 Introduction	35
1.2.2 Conjugation problems for second-order elliptic equations	39
1.2.3 The Dirichlet and Neumann problems	47
1.2.4 The Problem $A_n$ for the inhomogeneous Laplace equation	60
1.2.5 The Problem $(A_n)$ for the general elliptic equation	69
1.2.6 The Problem $B_n$ for the general second-order equation	82
<b>2. Higher-dimensional linear elliptic systems</b>	<b>91</b>
2.1 First-order systems	91
2.1.1 Introduction	91
2.1.2 Conjugation problems for first-order elliptic systems	97
2.1.3 Schwartz-type boundary-value problems	100
2.1.4 Riemann-Hilbert-type boundary-value problems	109
2.1.5 Application to the problem with oblique component for the stationary Maxwell equation and with oblique derivative for the inhomogeneous Laplace equation	119
2.1.6 On the boundary-value problem for the equation $\operatorname{curl} u + \lambda u = h$	124
2.2 Second-order systems	130
2.2.1 Conjugation problems for second-order systems	130
2.2.2 Boundary-value problems in bounded domains for second-order systems	133

<b>3. Degenerate elliptic problems</b>	<b>140</b>
3.1 Introduction	140
3.2 The Cauchy problem for the inhomogeneous Cauchy-Riemann equation and its higher-order generalization	147
3.3 Kernel matrices in $\mathbb{R}^3$ and $\mathbb{R}^4$	154
3.4 Cauchy problems for the inhomogeneous equations $\bar{\partial}_x \mu = f$ , $\partial_{\bar{z}} \mu = f$	171
3.5 First-order elliptic systems degenerate at the boundary	177
3.6 The boundary-value problem for a second-order elliptic system degenerate at the boundary	191
3.7 Nonelliptic degenerations	194
3.8 Elliptic systems in a plane, degenerate on a line	203
3.9 Elliptic systems in $\mathbb{R}^3$ degenerate on a line and on a plane	208
<b>4. Nonstationary systems</b>	<b>214</b>
4.1 First-order hyperbolic systems in $\mathbb{R}^3$ and $\mathbb{R}^4$	214
4.2 Initial-boundary-value problems for first-order hyperbolic systems	218
4.3 Modified initial-boundary-value problem for first-order hyperbolic systems	224
4.4 Initial-boundary-value problem for second-order hyperbolic systems	229
4.5 Degenerate hyperbolic systems	233
4.6 Mixed type first-order systems of equations	234
<b>5. First-order overdetermined systems</b>	<b>247</b>
5.1 Introduction	247
5.2 Elliptic overdetermined systems in $\mathbb{R}^{n+1}$	251
5.3 Degenerate overdetermined elliptic systems	257
5.4 Boundary-value problems	259
5.5 Nonelliptic first-order overdetermined systems	263
<b>6. The statement of well-posed problems for degenerate systems of partial differential equations</b>	<b>276</b>
6.1 Introduction	276
6.2 Boundary-value problems for first-order systems	279
6.3 Initial-boundary-value problems for first-order systems	300
6.4 The boundary-value problem for second-order systems	309
<b>References</b>	<b>313</b>
