CHAPTER 1. NUMERICAL-ANALYTIC METHOD OF INVESTIGATION OF PERIODIC SOLUTIONS FOR SYSTEMS WITH AFTEREFFECT

1

§1.	Notations and Basic Ideas. Auxiliary Lemmas	2
§2.	Algorithm for Finding Periodic Solutions of Nonlinear Systems with Lag	6
§3.	Existence of Periodic Solutions	13
§4.	Construction of an Approximate Periodic Solution	18
§5.	Periodic Problem of Control for Systems with Lag	26
§6.	The Concrete Example of Application of the Numerical-Analytic Method	27
§7.	Periodic Solutions of Differential Equations of the Second Order with Retarded Argument	30
§8.	Periodic Solutions for Countable Systems of Differential Equations with Lag	38
§9.	Periodic Solutions for Nonlinear Systems of Differential Equations of the Neutral Type	42
§10.	Investigation of Periodic Solutions for Some Classes of Systems of Integro-Differential Equations	45
§11.	Periodic Solutions of Nonlinear Systems of Difference Equations	55
§12.	Bilateral Approximations to Periodic Solutions of Systems with Lag	59
§13.	Periodic Solutions of Operator-Differential Equations	71

CHAPTER 2. INVESTIGATION OF PERIODIC SOLUTIONS OF SYSTEMS WITH AFTEREFFECT BY BUBNOV- GALERKIN'S METHOD

77

§1.	Preliminary Remarks. Auxiliary Statements	77
§2.	Green's Function for the Problem of Periodic Solutions of Linear Systems with Lag. Properties of This Function	83
§3.	The Main Properties of the Jacobian Matrix for Determining Equations for Galerkin's Approximations	87

§4.	Existence and Convergence of Bubnov-Galerkin's Approximations	93
§5.	Existence of Periodic Solutions for Systems of Differential Equations with Lag	98
§6.	Applications of Bubnov-Galerkin's Method to the Investigation of Periodic Solutions for Some Classes of Systems of Integro-Differential Equations	101
CHAPTER 3. QUASIPERIODIC SOLUTIONS OF SYSTEMS WITH LAG. BUBNOV-GALERKIN'S METHOD		107
§1.	Definitions and Auxiliary Statements	107
§2.	Construction of Quasiperiodic Solutions of Systems with Lag by Bubnov-Galerkin's Method	114
§3.	Construction of Quasiperiodic Solutions of Perturbed Systems with Lag by Bubnov-Galerkin's Method	123
CHAPTER 4. EXISTENCE OF INVARIANT TOROIDAL MANIFOLDS FOR SYSTEMS WITH LAG. INVESTIGATION OF THE BEHAVIOR OF TRAJECTORIES IN THEIR VICINITIES		135
§1.	Existence of Invariant Toroidal Manifolds with Loss of Smoothness	135
§2.	Existence of Lipschitz Tori for Nonlinear Systems with Lag	150
§3.	Invariant Toroidal Sets for the Systems of Differential Equations with Lag Under Pulse Influence	169
§4.	Behavior of Solutions of Nonlinear Systems with Lag in the Vicinity of Exponentially Stable Toroidal Manifolds	185
CHAPTER 5. REDUCIBILITY OF LINEAR SYSTEMS OF DIFFERENCE EQUATIONS WITH QUASIPERIODIC COEFFICIENTS		201
§1.	Statement of the Problem and Auxiliary Statements	201
§2.	Theorem on Reducibility	206
§3.	Reducibility of Linear Systems of Difference Equations with a Smooth Right-Hand Side	214

CHAPTER 6. INVARIANT TOROIDAL SETS FOR SYSTEMS OF DIFFERENCE EQUATIONS. INVESTIGATION OF THE BEHAVIOR OF TRAJECTORIES ON TOROI- DAL SETS AND IN THEIR VICINITIES	223
§1. Auxiliary Lemmas	223
§2. Periodic Solutions to Some Classes of Functional Equations	229
§3. Existence of Invariant Toroidal Sets for Nonlinear Systems of Difference Equations	236
§4. Reducibility of Systems of Difference Equations on the Toroidal Set	245
§5. Reducibility of Nonlinear Systems of Difference Equations in the Vicinity of the Toroidal Set	253
References	263
Index	279
