W. EBELING, M. PESCHEL Introductory Remarks	9
<hr/> Part I: Theory of the Lotka-Volterra Approach	
YU. M. SVIREZHEV, D.O. LOGOFET Complicated dynamics in simple models of ecological systems	13
E. AMANN, J. HOFBAUER Permanence in Lotka-Volterra and Replicator Equations	23
J. COSTE Dynamical regression in complex systems-Ecological examples	35
M. PESCHEL, W. MENDE, W. JANSEN, F. ALBRECHT Chain decomposition of growth functions and structure models of ecological systems	45
W. EBELING, R. FEISTEL Continuous Lotka-Volterra models for evolution processes	55
K. SIGMUND The Maximum Principle for Replicator Equations	63
A.M. MOLTSCHANOV Bilinear and Hamilton Systems, Macro dynamics	72
<hr/> Part II: Julia Sets and Strange Attractors	
H.O. PEITGEN, M. PRÜFER, P.H. RICHTER Phase Transitions and Julia Sets	81
H.G. BOTHE Geometry of Attractors, some rigorous results	103
<hr/> Part III: Dynamic Systems and Information Problems	
W. JANSEN, U. KRIEGEL Some problems of the parameter identification of strange attractors	114
J.S. NICOLIS, I. TSUDA Chaotic dynamics of Information Processing: The 'magic number seven plus-minus two'revisited	123
G. CZAJKOWSKI Information-theoretical methods in the stochastic theory of open systems	133
<hr/> Part IV: Application of the Lotka-Volterra Approach and other interaction structures	
CH. J. LUMSDEN Lotka-Volterra Statistical Mechanics in cell-membrane/ cellmetabolism systems	143
H. HERZEL, W. EBELING, L. SCHIMANSKY-GEIER, E.E. SEL'KOV The influence of noise on an biochemical oscillator	152
K.P. HADELER Models for parasitic deseases	162
A. HUNDING Spontaneous biological pattern formation in three dimensions - The morphogene prepattern theory of mitosis and cytokinesis	170

K.R. SCHNEIDER	
Existence of wave trains in reaction-diffusion systems	182
P.M. ALLEN, G. ENGELEN	
Modelling the spatial evolution of population and employment - The case of the United States	191

Part V: Poster Contributions

U. GROTE	
Qualitative analysis of Volterra Equations and its Riccati Transformation with special regard to bifurcation behaviour	213
R. FUNKE	
Robustness of the solution of stochastic Volterra differential equations	217
B. STRAUBE	
An attempt of a fuzzy approach to Volterra systems	220
TH. SCHULMEISTER, W. MEISKE	
Chaos in a Lotka-Volterra-System - A numerical study	224
H.M. VOIGT	
Structuring and Evolution Processes	228
U. KRIEGEL, W. MENDE, M. GRAUER	
Investigation of World Energy consumption and World Population in terms of a Hyperlogistic Evolution Model	232
K.F. ALBRECHT, W. MENDE, M. PESCHEL	
Chain structures in 1-st order differential equations	236
B. HEINRITZ, TH. BLEY	
State Models - An appropriate tool for improving the efficiency of biotechnical processes	241
H. SCHILLING	
Imigrating and Emigrating organisms in a finite Volterra World	245
A. ENGEL	
Discreteness in a continuous model of biological evolution	248
H. MALCHOW	
Dissipative structures in an ionic Lotka-Volterra type chemical reaction system	252
L. SCHIMANSKY-GEIER, A.S. MIKHAILOV	
Effect of fluctuations on front propagation in nonequilibrium systems	258

Late Paper:

W. MENDE	
The evolon growth model and its application to natural growth processes	261
