<b>Introduction</b>	<b>1</b>
Disturbance Decoupling Problem for Finite Dimensional Systems	4
Disturbance Decoupling Problem for Infinite Dimensional Systems	11
Outline of this Monograph	14
 <b>Chapter I: Invariance Concepts</b>	 <b>15</b>
I.1: $A$ - and $T_A(t)$ -Invariance	15
I.2: The Relation between $T_A(t)$ -Invariance and the Spectrum of $A$	18
 <b>Chapter II: System Invariance Concepts</b>	 <b>20</b>
II.1: System Invariance Concepts	21
II.2: Open Loop Invariance	23
II.3: Frequency Invariance	32
II.4: Equivalence	41
 <b>Chapter III: Disturbance Decoupling Problem</b>	 <b>47</b>
III.1: DDP in Frequency Domain	48
III.2: DDP in Time-Domain	57
III.3: Properties of Controlled Invariant Subspaces	59
 <b>Chapter IV: Controlled Invariance for Discrete Spectral Systems</b>	 <b>62</b>
IV.1: Discrete Spectral Operators	64
IV.2: Zeros and Invariance	69
IV.3: Characterization of all Invariant Subspaces for Spectral Systems	72
IV.4: Examples	78
 <b>Chapter V: The Disturbance Decoupling Problem with Measurement             Feedback</b>	 <b>87</b>
V.1: Conditioned Invariance and $(C, A, B)$ -Pairs	88
V.2: Disturbance Decoupling Problem with Measurement Feedback	97

<b>Chapter VI: The Disturbance Decoupling Problem with Measurement</b>	
<b>Feedback and Stability</b>	107
VI.1: Stability, Stabilizability and Stabilizability Subspaces	107
VI.2: Disturbance Decoupling Problem with Measurement Feedback and Stability	116
<b>Appendix E: Examples</b>	127
E.1: Spectral Realisations of Delay Equations	127
E.2: The Relation between $\mathcal{V}^*(K)$ , $\mathcal{V}_\alpha(K)$ and $\mathcal{V}_E(K)$	133
E.3: On the Sum of two Controlled Invariant Subspaces	138
<b>Conclusions</b>	144
<b>References</b>	147
<b>List of all Invariance Concepts and their Relation</b>	153
<b>Notation</b>	154
<b>Index</b>	156
