

# Table of Contents

<b>Chapter 0. Preliminaries . . . . .</b>	1
0.1 Weak* Topology and Lower Semi-continuity . . . . .	1
0.2 Fundamentals of Harmonic Functions . . . . .	6
0.3 Series Representations of Harmonic Functions . . . . .	9
0.4 Poisson's Formula and Applications . . . . .	12
0.5 Superharmonic Functions . . . . .	18
<b>Chapter I. Weighted Potentials . . . . .</b>	23
I.1 The Energy Problem . . . . .	24
I.2 Minimum Principle, Dirichlet Problem . . . . .	35
I.3 The Extremal Measure . . . . .	43
I.4 The Equilibrium Potential . . . . .	49
I.5 Fine Topology and Continuity of Equilibrium Potentials . . . . .	58
I.6 Weighted Capacity . . . . .	63
I.7 Notes and Historical References . . . . .	74
<b>Chapter II. Recovery of Measures, Green Functions and Balayage . . . . .</b>	81
II.1 Recovering a Measure from Its Potential . . . . .	83
II.2 The Unicity Theorem . . . . .	97
II.3 Riesz Decomposition Theorem and Principle of Domination . . . . .	100
II.4 Green Functions and Balayage Measures . . . . .	108
II.5 Green Potentials . . . . .	123
II.6 Notes and Historical References . . . . .	137
<b>Chapter III. Weighted Polynomials . . . . .</b>	141
III.1 Weighted Fekete Points, Transfinite Diameter and Fekete Polynomials . . . . .	142
III.2 Where Does the Sup Norm of a Weighted Polynomial Live? . . . . .	153
III.3 Weighted Chebyshev Polynomials . . . . .	162
III.4 Zero Distribution of Polynomials of Asymptotically Minimal Weighted Norm . . . . .	169

III.5	The Function of Leja and Siciak . . . . .	177
III.6	Where Does the $L^p$ Norm of a Weighted Polynomial Live? . . . . .	180
III.7	Notes and Historical References . . . . .	187
<b>Chapter IV. Determination of the Extremal Measure . . . . .</b>		191
IV.1	The Support $S_w$ of the Extremal Measure . . . . .	192
IV.2	The Fourier Method and Smoothness Properties of the Extremal Measure $\mu_w$ . . . . .	209
IV.3	The Integral Equation . . . . .	221
IV.4	Behavior of $\mu_w$ . . . . .	227
IV.5	Exponential and Power-Type Functions . . . . .	238
IV.6	Circular Symmetric Weights . . . . .	245
IV.7	Some Problems from Physics . . . . .	246
	IV.7.1 Contact Problem of Elasticity . . . . .	246
	IV.7.2 Distribution of Energy Levels of Quantum Systems . . . . .	249
	IV.7.3 An Electrostatic Problem for an Infinite Wire . . . . .	251
IV.8	Notes and Historical References . . . . .	254
<b>Chapter V. Extremal Point Methods . . . . .</b>		257
V.1	Leja Points and Numerical Determination of $\mu_w$ . . . . .	257
V.2	The Extremal Point Method for Solving Dirichlet Problems . . . . .	267
V.3	The Extremal Point Method for Determining Green Functions and Conformal Mappings . . . . .	273
V.4	Notes and Historical References . . . . .	275
<b>Chapter VI. Weights on the Real Line . . . . .</b>		277
VI.1	The Approximation Problem . . . . .	278
VI.2	Approximation with Varying Weights . . . . .	301
VI.3	Fast Decreasing Polynomials . . . . .	313
VI.4	Discretizing a Logarithmic Potential . . . . .	326
VI.5	Norm Inequalities for Weighted Polynomials with Exponential Weights . . . . .	334
VI.6	Comparisons of Different Weighted Norms of Polynomials . . . . .	343
VI.7	$n$ -Widths for Weighted Entire Functions . . . . .	349
VI.8	Notes and Historical References . . . . .	352
<b>Chapter VII. Applications Concerning Orthogonal Polynomials . . . . .</b>		359
VII.1	Zero Distribution and $n$ -th Root Asymptotics for Orthogonal Polynomials with Exponential Weights . . . . .	359
VII.2	Strong Asymptotics . . . . .	364
VII.3	Weak* Limits of Zeros of Orthogonal Polynomials . . . . .	373
VII.4	Notes and Historical References . . . . .	379

<b>Chapter VIII. Signed Measures . . . . .</b>	381
VIII.1 The Energy Problem for Signed Measures . . . . .	382
VIII.2 Basic Theorems for Equilibrium Potentials and Measures Associated with Signed Measures . . . . .	388
VIII.3 Rational Fekete Points and a Weighted Variant of a Problem of Zolotarjov . . . . .	394
VIII.4 Examples . . . . .	403
VIII.5 Rational Approximation of Signum Type Functions . . . . .	409
VIII.6 Conformal Mapping of Ring Domains . . . . .	421
VIII.7 A Discrepancy Theorem for Simple Zeros of Polynomials . . . . .	426
VIII.8 Notes and Historical References . . . . .	442
<b>Appendix A. The Dirichlet Problem and Harmonic Measures . . . . .</b>	449
A.1 Regularity with Respect to Green Functions . . . . .	449
A.2 Regularity with Respect to Dirichlet Problems . . . . .	454
A.3 Harmonic Measures and the Generalized Poisson Formula . . . . .	458
<b>Appendix B. Weighted Approximation in <math>\mathbf{C}^N</math> . . . . .</b>	465
B.1 Pluripotential Theory . . . . .	466
B.2 Weighted Polynomials in $\mathbf{C}^N$ . . . . .	471
B.3 Fekete Points . . . . .	478
B.4 Notes and Historical References . . . . .	480
<b>Basic Results of Potential Theory . . . . .</b>	483
<b>Bibliography . . . . .</b>	485
<b>List of Symbols . . . . .</b>	495
<b>Index . . . . .</b>	501
