| Abstract | viii |
| Kurzfassung | x |
| 1 Introduction and State of the Art in Geometric Calibration of Machining Centers | 1 |
| 1.1 Geometric errors of machining centers | 2 |
| 1.1.1 Location errors | 2 |
| 1.1.2 Number of axis location errors | 4 |
| 1.1.3 Component errors | 5 |
| 1.1.4 Interdependencies of geometric errors | 7 |
| 1.2 State of the art in geometric machine tool calibration | 9 |
| 1.2.1 Geometric measurements | 9 |
| 1.2.2 Kinematic measurements | 13 |
| 1.2.3 Model-based calibration | 14 |
| 1.3 Deficiencies of the state of the art | 16 |
| 2 Error Compensation by Spatial Grid Measurements | 19 |
| 2.1 The “3D Ball Plate” artefact | 20 |
| 2.1.1 Work principle and benefits of the artefact | 21 |
| 2.1.2 Calibration of the artefact | 24 |
| 2.1.3 Design details of the artefact | 27 |
| 2.1.4 Uncertainty estimation for the artefact | 31 |

| | | |
|----------|---|-----------|
| 2.2 | The 3D probing system for machine tools | 34 |
| 2.2.1 | Work principle of the probing system | 35 |
| 2.2.2 | Probe calibration | 35 |
| 2.2.3 | Uncertainty estimation for the probing system | 37 |
| 2.3 | Characterization of “3D Ball Plate” calibrations | 38 |
| 2.4 | Measurement examples | 40 |
| 2.4.1 | Conventional 3-axes machining center | 41 |
| 2.4.2 | Space Error Compensation for the PKM Hexaglide | 46 |
| 3 | Identification of Error Interdependencies Effects | 51 |
| 3.1 | The 3D probing system for machine tools with rotary axes | 52 |
| 3.1.1 | Calibration and uncertainty estimation | 52 |
| 3.1.2 | Sphere center offset compensation | 53 |
| 3.2 | General kinematic modeling of a machining center | 54 |
| 3.2.1 | Kinematic transformation | 54 |
| 3.2.2 | Error modeling | 55 |
| 3.3 | Parameter uncertainty estimation | 55 |
| 3.4 | Error interdependencies effects on kinematic measurements | 58 |
| 3.4.1 | Error identification | 58 |
| 3.4.2 | Calibration example | 58 |
| 3.5 | Error interdependencies effects on model-based calibrations | 61 |
| 3.5.1 | Possibilities of dealing with geometric machine errors | 61 |
| 3.5.2 | Planning model-based calibration methods | 62 |
| 3.5.3 | Error identification | 63 |
| 3.5.4 | Evaluating the mathematical condition of a model-based calibration | 64 |
| 3.5.5 | Parameter uncertainty estimation of model-based calibration approaches with Monte-Carlo simulations | 67 |
| 3.5.6 | Experimental testing of the calibration quality | 68 |
| 3.5.7 | Calibration example: conventional 5-axes machining center | 68 |

| | |
|---|------------|
| 3.5.8 Calibration example: parallel kinematic Hexaglide | 79 |
| 4 Conclusion and Outlook | 102 |
| 4.1 Conclusion | 102 |
| 4.2 Outlook | 104 |
| Appendix: Modeling of geometric errors | 105 |
| A.1 Modeling of geometric errors 5-axes machining centers | 105 |
| A.2 Modeling of geometric errors Hexaglide | 109 |
| Bibliography | 119 |
