

Vorwort/Preface	1
Contents	7
I. Introduction: A Set of Experiments and their Aims	9
A. Butcher & K. Kohler	9
1. Investigating coarticulation and articulatory control	9
2. Experiments leading to a reconsideration of the fortis/lenis dichotomy in plosives	16
3. Experiments investigating nasal and oral plosions	20
4. Experiments analysing the modification of plosives and fricatives in connected speech	24
II. The Production of Plosives	30
K. Kohler	
1. The fortis/lenis dichotomy. A reappraisal.	30
1.0. Historical notes and a new outlook	30
1.1. Articulatory oral air flow in the closing phase	34
1.2. Articulatory oral air flow during the closure	35
1.3. Oral air flow at the release	42
1.4. Durations of vowels and following stops	43
1.5. Vocal-cord vibrations during the closure	45
1.6. Muscular activity in the formation and release of stops	49
1.6.1. Activity to raise the tongue and lip	49
1.6.2. Muscular activity for velic movement	54
2. Nasal and oral plosions	67
2.1. Introductory remarks	67
2.2. Nasal air flow	68
2.2.1. Data from the experiments in I.2.2.	68
2.2.2. Data from the experiments in I.3.2.	76
2.3. Timing and intensity of muscular activity	81
2.3.1. The palatoglossus maximum in the vowel	81
2.3.2. The onset of levator activity for the plosive	85
2.3.3. The occurrence of the levator maximum and its level	90
2.3.4. The timing of the palatoglossus activity and the level of its maximum for the nasal	91

2.4.	Durations of the plosive occlusion and of the vowel preceding it	95
3.	Conclusions	99
III.	A Photo-electric Investigation of Velar Height during Vowel Articulation: First Applications of the Velograph	111
	Hermann J. Kuenzel	
IV.	Relative Velar Height and Velar Timing in Orally and Nasally Released Stops A Preliminary Report	132
	Hermann J. Kuenzel	
V.	Coarticulation in Intervocalic Voiceless Plosives and Fricatives in Connected Speech	154
	A. Butcher	
0.	Data analysis	154
1.	Plosives	155
1.1.	Speed and stress	156
1.2.	Closing phase	157
1.3.	Voicing	158
1.4.	Closure	162
1.5.	Plosion	169
2.	Fricatives	171
2.1.	Speed and stress	171
2.2.	Voicing	172
2.3.	Constriction	175
3.	Plosive and fricative compared	191
3.1.	Glottal differences	191
3.2.	Supraglottal differences	192
3.3.	Coarticulatory differences	198
4.	A note on ingressive air flows	203
VI.	Bibliography of Work on Plosives	213
