

TABLE OF CONTENTS

1. INTRODUCTION	7
2. EQUATIONAL STATEMENTS AND PROOFS	11
2.1. Equational Theories	11
2.2. Proving Equivalence Theorems	17
2.3. Proving Non-Equivalence Theorems	23
2.4. Consistency and Completeness	29
3. GRAMMATICAL THEOREMS	33
3.1. Symbolic Equivalence	35
3.2. Synonymy and Ambiguity	40
3.3. Other Properties and Relations	46
3.3.1. Class-Membership Theorems	47
3.3.2. Analiticity	48
3.3.3. Contradiction	51
3.3.4. Presupposition	54
3.3.5. The Characterization of Linguistically Significant Attributes	60
4. GRAMMATICAL AXIOMS	64
4.1. Equivalence Axioms	75
4.1.1. The Equational Reduction of Directed Rewriting Systems	75
4.1.2. Redundancy Axioms	78
4.1.3. Lexical Axioms	90
4.1.4. Ordering Rules	94

TABLE OF CONTENTS

4.1.5.	Reordering Rules and their Reduction to Ordering Equations	96
4.1.6.	Grouping and Regrouping Axioms . .	100
4.1.7.	Idempotency Axioms	110
4.2.	Non-Equivalence Axioms	122
4.2.1.	The Four-Axiom-Type Equational Theory	122
4.2.2.	The Equational Reduction of Representational Constraints	125
4.2.3.	The Reduction of Relative Derivational Constraints	130
4.2.4.	The Reduction of Exceptionality Constraints	133
4.3.	The Range of Equational Axioms	140
4.3.1.	The Reduction of Lexis	143
4.3.2.	The Reduction of Semantic Amalgamation	151
4.3.3.	The Reduction of Empirical Logic . . .	156
5.	THE EXPLANATORY VALUES OF THE EQUATIONALITY HYPOTHESIS	164
	BIBLIOGRAPHY	182
	INDEX	185
