

# Contents

I. Preliminaries . . . . .	1
II. Pick Functions . . . . .	18
III. Pick Matrices and Loewner Determinants . . . . .	34
IV. Fatou Theorems . . . . .	42
V. The Spectral Theorem . . . . .	50
VI. One-Dimensional Perturbations . . . . .	63
VII. Monotone Matrix Functions . . . . .	67
VIII. Sufficient Conditions . . . . .	78
IX. Loewner's Theorem . . . . .	85
X. Reproducing Kernels . . . . .	88
XI. Nagy-Koranyi Proof of Loewner's Theorem . . . . .	94
XII. The Cauchy Interpolation Problem . . . . .	100
XIII. Interpolation by Pick Functions . . . . .	117
XIV. The Interpolation of Monotone Matrix Functions . . . . .	128
XV. Almost Positive Matrices . . . . .	134
XVI. The Analytic Continuation of Bergman Kernels . . . . .	140
XVII. The Loewner-FitzGerald Theorem . . . . .	146
XVIII. Loewner's Differential Equation . . . . .	154
XIX. More Analytic Continuation . . . . .	165
Notes and Comment . . . . .	170
Bibliography . . . . .	176
Index . . . . .	181
