

Contents

Preface	xiii
Guidelines for Using This Book	xv
Acknowledgments	xvii
1 Introduction and Overview	1
Substance Use, Ages 14 to 40, Linked to Educational Success	3
Daily Smoking	3
Marijuana Use	6
Heavy Drinking	10
Studying Complex Causal Relationships in Natural Settings	10
What Is the "Big Picture" Thus Far?	13
Overview of Chapters	14
2 Literature Review: Conceptual and Empirical Overview of Issues	17
Stability of Educational Achievement	18
Educational Successes and Failures Are Connected to Substance Use	19
Cigarette Use	20
Marijuana Use	21
Alcohol Use	22
Other Illicit Drugs and Multiple Substance Use	23
Delinquency and Other Problem Behaviors	24
Exogenous Variable Explanations	26
Long-Term Relations Between Educational Failure and Substance Use	27
Policy and Intervention Implications	29

3	Survey Methods and Analysis Strategies	31
	A Brief History of the MTF Adolescent Panel	32
	Sample Characteristics and Representativeness	34
	Survey Methods	34
	Response Rates	35
	Imputation	37
	Poststratification	38
	Further Weighting of the Sample	39
	Measures Used	39
	Analysis Methods and Rationale	44
	Analysis Strategy	45
	Selectivity	45
	Separate Analyses for Males and Females	46
	Separate Reporting for Different Forms of Substance Use	46
	A Focus on Consistent Findings, Well-Documented	47
4	Educational Success and Failure: Causes and Correlates	49
	Plan for This Chapter	50
	Focusing on Academic Attainment as a Long-Term Outcome	50
	Using Multiple Analysis Methods and Perspectives	51
	Academic Attainment at Age 22: A Snapshot of a Moving Target	51
	Academic Attainment as a Moving Target	53
	How Many Go How Far?	55
	Major Correlates/Predictors of Academic Attainment	56
	Race/Ethnicity	67
	Population Density	68
	Parental Education	68
	Presence of Both Parents in Home	72
	Parental Involvement in Students' Lives	74
	Scholastic Setbacks	75
	Grade Retention (Ever Held Back)	76
	Suspension or Expulsion	76
	Grades and College Plans	78
	Serious Scholastic Setbacks During High School	82
	Additional Correlates/Predictors of Academic Attainment	83
	Delinquency and Other Problem Behaviors	83
	Evenings Out for Fun and Recreation	84
	Actual and Preferred Hours of Work	84
	Religious Attendance and Importance	84

Self-Esteem	85
We Focus on the "Short List" of Predictors	85
A Structural Equation Model of Academic Attainment	85
Background Measures as Exogenous Factors	86
Interconnecting GPA, College Plans, and Academic Attainment	88
Incorporating Serious Scholastic Setbacks Into the Model	90
Incorporating Age-18 Dropout Status Into the Model	91
Structural Model Findings: Background (Exogenous) Factors	91
The Importance of Parents	92
Other Background Factors	94
Structural Model Findings: High School (Endogenous) Factors	95
Grade Point Average	95
College Plans	96
Serious Scholastic Setbacks After Eighth Grade	97
Dropout Status at Age 18	97
Summary and Conclusions	98

5 Delinquency and Other Problem Behaviors Linked With Educational Success and Failure	101
Plan for This Chapter	101
Delinquency in Adolescence and Young Adulthood	102
Constructing a Seven-Category Measure of Delinquent Behavior	106
Major Correlates/Predictors of Adolescent Delinquency	106
Race/Ethnicity and Population Density	116
Parental Education	117
Presence of Both Parents at Home	117
Parental Involvement in Students' Lives	117
Grade Retention, and Suspension or Expulsion, by End of Eighth Grade	117
Grade Point Average	118
College Plans	119
Serious Scholastic Setbacks During High School (After Eighth Grade)	120
Dropping Out of High School by Age 18	120
Additional Correlates/Predictors of Adolescent Delinquency	121
Various Problem Behaviors	121
Evenings Out for Fun and Recreation	121

Actual and Preferred Hours of Work	122
Religious Attendance and Importance	122
Self-Esteem	122
Adding Delinquency to the Structural Equation	
Model of Academic Attainment	123
Locating Delinquency in the Causal Network	123
Structural Model Findings	127
Summary and Conclusions Concerning Delinquency	129
Expanding the Structural Equation Model	
to Include Substance Use	131

6 How Smoking Is Linked With	
Educational Success and Failure	133
Plan for This Chapter	134
Adolescent Smoking Rates in Recent Decades	134
Evidence Based on Cross-Sectional Data	135
Patterns or "Trajectories" of 30-Day Smoking Based on	
Panel Data	138
Major Correlates/Predictors of Adolescent Smoking	143
Race/Ethnicity and Population Density	148
Parental Education	148
Presence of Both Parents at Home	149
Parental Involvement in Students' Lives	150
Grade Retention, and Suspension or Expulsion, by End	
of Eighth Grade	151
Grade Point Average	151
College Plans	153
Serious Scholastic Setbacks During High School	
(After Eighth Grade)	153
Dropping Out of High School by Age 18	154
Additional Correlates/Predictors of Adolescent Smoking	154
Various Problem Behaviors	154
Evenings Out for Fun and Recreation	157
Actual and Preferred Hours of Work	157
Religious Attendance and Importance	158
Self-Esteem	158
A Structural Equation Model Including Academic	
Attainment and Smoking	158
Structural Equation Model Findings	160
Further Analyses Including Friends' Smoking	164
Summary and Conclusions	167

7 How Marijuana Use Is Linked With Educational Success and Failure	171
Plan for This Chapter	172
Marijuana Use in Recent Decades	172
The Close Link Between Cigarette and Marijuana Use in Adolescence	174
Major Correlates/Predictors of Adolescent Marijuana Use	176
Race/Ethnicity	177
Urban Density	182
Parental Education	182
Presence of Both Parents in the Home	182
Parental Involvement in Students' Lives	183
Grade Retention, and Suspension or Expulsion, by End of Eighth Grade	183
Delinquent Behavior	184
Grade Point Average	188
College Plans	189
Serious Scholastic Setbacks During High School (After Eighth Grade)	189
Dropping Out of High School by Age 18	192
Additional Correlates/Predictors of Adolescent Marijuana Use	192
Delinquency and Other Problem Behaviors	192
Evenings Out for Fun and Recreation	192
Actual and Preferred Work Hours	193
Religious Attendance and Importance	193
Self-Esteem	193
Structural Equation Model: Academic Attainment and Marijuana Use	194
Structural Model Findings	195
Summary and Conclusions	202
 8 How Cocaine Use Is Linked With Educational Success and Failure	 205
Plan for This Chapter	205
Cocaine Use in Recent Decades	205
How Cocaine Use Is Linked With Use of Marijuana and Cigarettes	206
Major Correlates/Predictors of Adolescent Cocaine Use	208
Race/Ethnicity	210

Urban Density	210
Parental Education	210
Presence of Both Parents in the Home	210
Parental Involvement in Students' Lives	210
Grade Retention, and Suspension or Expulsion, by End of Eighth Grade	211
Delinquent Behavior	211
Grade Point Average	217
College Plans	217
Serious Scholastic Setbacks During High School (After Eighth Grade)	217
Dropping Out of High School by Age 18	222
Additional Correlates/Predictors of Adolescent Cocaine Use	222
Various Problem Behaviors	222
Evenings Out for Fun and Recreation	222
Actual and Preferred Work Hours	222
Religious Attendance and Importance	223
Self-Esteem	223
Structural Equation Model: Academic Attainment and Cocaine Use	223
Structural Model Findings	224
Summary and Conclusions	228
9 How Alcohol Use Is Linked With Educational Success and Failure	231
Plan for This Chapter	232
Alcohol Use in Recent Decades	233
Major Correlates/Predictors of Adolescent Alcohol Use	234
Race/Ethnicity	235
Urban Density	235
Parental Education	235
Presence of Both Parents in the Home	235
Parental Involvement in Students' Lives	235
Grade Retention, and Suspension or Expulsion, by End of Eighth Grade	244
Delinquent Behavior	244
Grade Point Average	244
College Plans	245
Serious Scholastic Setbacks During High School (After Eighth Grade)	245
Dropping Out of High School by Age 18	245

Additional Correlates/Predictors of Adolescent Alcohol Use	246
Various Problem Behaviors	246
Evenings Out for Fun and Recreation	246
Actual and Preferred Work Hours	247
Religious Attendance and Importance	247
Self-Esteem	247
The Pattern of Weaker Correlations With Increasing Age	248
Structural Equation Model: Academic Attainment and Alcohol Use	248
Structural Model Findings	249
Summary and Conclusions	253
10 Summary, Conclusions, and Implications	257
Three Goals of This Book	258
Sorting Out Causal Connections	259
Presenting Descriptively Accurate Findings	260
Using Multiple Analysis Methods	262
Summary of Findings: What We Think We Have Learned	264
In Adolescence, Substance Use Is Negatively Linked With Educational Success	264
Similar Correlates for Delinquency Suggest a Problem Behavior Syndrome	265
Background Factors That Contribute to Educational Success Also Protect Against Problem Behaviors	265
Other Factors Linked With Educational Success or Failure Are Also Linked With Problem Behaviors	270
Educational Experiences During Adolescence Have Impacts on Problem Behaviors as Well as Long-Term Academic Attainment	272
There Are Important Differences Across Types of Substance Use	274
Conclusions and Implications	276
The "Big Picture" Revisited	276
Policy Implications	277
Appendix	281
<i>N</i> —Or, What's in a Number? The Quest for Practical and Realistic Values of <i>N</i> to Use in Estimating Sample Precision	281

Raw N Versus Initial Selection Weighted N	283
Effects of Poststratification	285
Impacts of Imputation	286
"Effective N Weighting" to the Rescue	289
Design Effects	290
Sampling and Survey Procedures	292
Samples and Surveys of Eighth-Grade Students	292
Initial Stratification for Selecting Target Panel Samples	293
Follow-Up Procedures	294
Poststratification Details	295
Structural Equation Model Technical	
Decisions and Rationale	297
Appendix Tables and Figures	299
References	407
Author Index	419
Subject Index	425
