

Contents

	<i>Preface</i>	<i>page</i>	xi
	<i>Acknowledgments</i>		xv
1	Linguistics: strings		
1.1	String grammars		1
1.2	Semantic rôles		9
1.3	Passives		15
1.4	Pronouns and relative clauses		24
X 1.5	The semantic component		33
2	Logic: trees		
2.1	Tree grammars		46
X 2.2	Logic and meaning		48
2.3	Operator and operand		54
2.4	Categorial grammar		64
2.5	Quantification		75
3	Computer science: graphs		
3.1	Graphs and graph grammars		94
X 3.2	Semantic networks		96
3.3	Conceptual dependency		111
3.4	Frames		122
4	Categorial graphs		
4.1	Scopeways		131
4.2	Converging scope: (1) pronouns		137
4.3	Converging scope: (2) relative clauses		148
4.4	Scope at higher levels		162
4.5	Sub-categorization		168
5	Basic categories: count nouns		
5.1	Frege's categorization of count nouns		176

x	Contents	
5.2	Difficulties in Frege's view	182
5.3	Count nouns as a basic category	193
5.4	Generic propositions	201
6	Basic categories: pointers	
6.1	The category of pointers	211
6.2	Proper names	222
6.3	The relationship of proper names to count nouns	232
7	Quantifiers, pronouns and identity	
7.1	Quantification revisited	239
7.2	Anaphoric pronouns and relative clauses revisited	246
7.3	Plurative and numerical quantifiers	259
7.4	Identity	270
	Epilogue	278
	<i>Bibliography</i>	289
	<i>Index</i>	300
