

## Table of Contents

### Chapter 1     A Functional-Typological Approach to Concessive Conditionals

|        |                                          |    |
|--------|------------------------------------------|----|
| 1.1.   | Introduction .....                       | 9  |
| 1.1.1. | Concessive Conditionals .....            | 9  |
| 1.1.2. | Functional Typology.....                 | 11 |
| 1.1.3. | Problems of Terminology .....            | 13 |
| 1.2.   | Overview of the Present Work .....       | 15 |
| 1.2.1. | Issues, Procedure and Main Results ..... | 15 |
| 1.2.2. | Language Sample and Data .....           | 16 |

### Chapter 2     Meaning and Form in Concessive Conditionals

|          |                                                                          |    |
|----------|--------------------------------------------------------------------------|----|
| 2.1.     | The Meaning of Concessive Conditionals .....                             | 19 |
| 2.1.1.   | Concessive Conditionals as Conditionals .....                            | 19 |
| 2.1.2.   | Between Conditionality and Concessivity .....                            | 23 |
| 2.1.2.1. | Semifactuality 23 – 2.1.2.2. The Concessive Presupposition 26            |    |
| 2.1.3.   | The Three Domains of Clause-Linkage .....                                | 28 |
| 2.2.     | The Subordinators .....                                                  | 30 |
| 2.2.1.   | Scalar Concessive Conditionals .....                                     | 30 |
| 2.2.1.1. | Conditional plus Focus Particle 30 – 2.2.1.2. Embedded Interrogatives 32 |    |
| 2.2.2.   | Alternative Concessive Conditionals .....                                | 33 |
| 2.2.2.1. | 'Whether ... or' 33 – 2.2.2.2. The Prefixes 35                           |    |
| 2.2.3.   | Universal Concessive Conditionals .....                                  | 36 |
| 2.2.3.1. | The WH + Particle Construction 36 – 2.2.3.2. WH plus Prefix 40 –         |    |
| 2.2.3.3. | The WH Phrase 41 – 2.2.3.4. Non-WH-Based Constructions 43                |    |
| 2.3.     | (Lack of) Clause-Integration .....                                       | 45 |
| 2.3.1.   | Main Clause Word Order .....                                             | 45 |
| 2.3.2.   | Intonation and Punctuation .....                                         | 47 |
| 2.3.3.   | Exceptions to Disintegration .....                                       | 49 |

### Chapter 3     Issues in the Study of Concessive Conditionals

|        |                                                   |    |
|--------|---------------------------------------------------|----|
| 3.1.   | Hypotaxis as Building-Site .....                  | 51 |
| 3.1.1. | A Prototype Approach to Hypotaxis .....           | 51 |
| 3.1.2. | Emergence by Grammaticalization .....             | 53 |
| 3.2.   | Concessive Conditionals as Emerging Grammar ..... | 56 |
| 3.2.1. | Subordinators .....                               | 56 |
| 3.2.2. | Lack of Clause-Integration .....                  | 58 |
| 3.2.3. | Ellipsis .....                                    | 59 |

|                  |                                                                                                                                                                   |     |
|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 3.3.             | Synchronic Emergence .....                                                                                                                                        | 62  |
| 3.3.1.           | Constraints and Motivations .....                                                                                                                                 | 62  |
| 3.3.2.           | A "Dialogue Type of Discourse" .....                                                                                                                              | 63  |
| 3.3.3.           | Motivations for Hypotaxis .....                                                                                                                                   | 68  |
| 3.4.             | Diachronic Emergence .....                                                                                                                                        | 71  |
| 3.4.1.           | Pathways towards Concessive Conditionals .....                                                                                                                    | 71  |
| 3.4.2.           | Clause-Integration .....                                                                                                                                          | 74  |
| <b>Chapter 4</b> | <b>Concessive Conditionals Based on Interrogatives</b>                                                                                                            |     |
| 4.1.             | On Predicates of Indifference .....                                                                                                                               | 77  |
| 4.1.1.           | Form and Meaning .....                                                                                                                                            | 77  |
| 4.1.2.           | Origo-Identification .....                                                                                                                                        | 78  |
| 4.2.             | Discourse Basis .....                                                                                                                                             | 79  |
| 4.2.1.           | Underlying Dialogical Pattern .....                                                                                                                               | 79  |
| 4.2.2.           | Monological Extensions .....                                                                                                                                      | 81  |
| 4.2.2.1.         | Weighting of Propositions 81 – 4.1.2.2. Clause Arrangement 83                                                                                                     |     |
| 4.2.3.           | Rhetorical Dialogues .....                                                                                                                                        | 87  |
| 4.3.             | The Transition to Hypotaxis .....                                                                                                                                 | 90  |
| 4.3.1.           | The Protasis Desententialized .....                                                                                                                               | 90  |
| 4.3.2.           | Discourse Functions .....                                                                                                                                         | 91  |
| 4.3.2.1.         | Distribution of Forms 91 – 4.3.2.2. Coherence Bridging 93 – 4.3.2.3. Strengthening and Related Functions 97                                                       |     |
| 4.3.3.           | The Role of Rhetorical Dialogues .....                                                                                                                            | 100 |
| <b>Chapter 5</b> | <b>Concessive Conditionals with WH + Particle</b>                                                                                                                 |     |
| 5.1.             | Concessive Conditionals and Nonspecific Free Relatives .....                                                                                                      | 105 |
| 5.1.1.           | Sources of Universal Concessive Conditionals .....                                                                                                                | 105 |
| 5.1.2.           | Distinctions and Ambiguities .....                                                                                                                                | 106 |
| 5.1.3.           | Universal Concessive Conditionals as "Recalcitrant Structures" .....                                                                                              | 109 |
| 5.2.             | Meaning and Function .....                                                                                                                                        | 112 |
| 5.2.1.           | Free-Choice Quantification .....                                                                                                                                  | 112 |
| 5.2.1.1.         | Heimian Indefinites and Unselective Binding 112 – 5.2.1.2. Exhaustive Variation and i-Indifference 113 – 5.2.1.3. Modal Particles and <i>Nescio</i> -Readings 116 |     |
| 5.2.2.           | Discourse Functions .....                                                                                                                                         | 117 |
| 5.2.2.1.         | Coherence Bridging 117 – 5.2.2.2. Strengthening and Related Functions 121                                                                                         |     |

|        |                                                              |     |
|--------|--------------------------------------------------------------|-----|
| 5.3.   | Universal Concessive Conditionals and Left-Dislocation ..... | 125 |
| 5.3.1. | Preliminaries .....                                          | 125 |
| 5.3.2. | Crosslinguistic Observations .....                           | 126 |
| 5.3.3. | "Hanging Topics" .....                                       | 129 |
| 5.4.   | Outlook .....                                                | 133 |

## Chapter 6      Issues of Directionality

|          |                                                                                             |     |
|----------|---------------------------------------------------------------------------------------------|-----|
| 6.1.     | From Nonspecific Free Relative to Universal Concessive Conditional? .....                   | 134 |
| 6.1.1.   | 'So WH so' and WH-'ever / also' .....                                                       | 134 |
| 6.1.1.1. | Historical Development 134 – 6.1.1.2. Origin and Meaning 137                                |     |
| 6.1.2.   | The Problem of Directionality .....                                                         | 140 |
| 6.1.2.1. | English 140 – 6.1.2.2. German and Dutch 143                                                 |     |
| 6.2.     | From Embedded Interrogative to Concessive Conditional? .....                                | 147 |
| 6.2.1.   | The Early Development of Predicates of Indifference .....                                   | 147 |
| 6.2.1.1. | Lexical Renovation 147 – 6.2.1.2. Lexicalization 149 – 6.2.1.3. Idiomatization 150          |     |
| 6.2.2.   | The Formation of (Universal) Concessive Conditionals .....                                  | 151 |
| 6.2.2.1. | Grammaticalization – Reanalysis – Actualization 151 – 6.2.2.2. Chronology and Embedding 153 |     |
| 6.3.     | The Special Case(s) of 'Whether ... or' .....                                               | 154 |
| 6.3.1.   | English <i>whether</i> and Its Cognates .....                                               | 154 |
| 6.3.2.   | German <i>ob</i> and the Notion of "Secondary Emergence" .....                              | 160 |

## Chapter 7      Conclusion: The Building-Site Nature of Concessive Conditionals

|        |                                                                |     |
