

CONTENTS

Introduction	1
Chapter I: INVARIANT SUBSPACES	3
§ 1. Invariant subspaces and the single-valued extension property	3
§ 2. Analytically invariant subspaces	14
§ 3. Spectral maximal spaces	26
Chapter II: THE GENERAL SPECTRAL DECOMPOSITION	36
§ 4. Operators with spectral decomposition properties	36
§ 5. Operator-valued functions with spectral decomposition properties	45
Chapter III: ASYMPTOTIC SPECTRAL DECOMPOSITIONS	50
§ 6. Analytically decomposable operators	50
§ 7. Weakly decomposable operators	55
§ 8. Spectral capacities	60
§ 9. Decomposable spectrum	64
§ 10. Quasidecomposable operators	69
Chapter IV: DECOMPOSABLE OPERATORS	73
§ 11. Properties and characterizations of decomposable operators	73
§ 12. The duality theory of spectral decompositions	80
§ 13. Spectral decompositions of unbounded operators	97
APPENDIX	106
A.1. An example of an analytically invariant subspace which is not absorbent	106
A.2. The set-spectra of decomposable operators	109
A.3. The approximate point spectrum and the single-valued extension property	112
A.4. Some open problems	114
