

Contents

PART ONE ■ OVERVIEW

Chapter 1 Introduction

- 1.1 What Operating Systems Do 3
- 1.2 Computer-System Organization 6
- 1.3 Computer-System Architecture 12
- 1.4 Operating-System Structure 15
- 1.5 Operating-System Operations 17
- 1.6 Process Management 20
- 1.7 Memory Management 21
- 1.8 Storage Management 22

Chapter 2 Operating-System Services

- 2.1 Operating-System Services 39
- 2.2 User Operating-System Interface 41
- 2.3 System Calls 43
- 2.4 Types of System Calls 47
- 2.5 System Programs 55
- 2.6 Operating-System Design and Implementation 56

PART TWO ■ PROCESSES

Chapter 3 Processes

- 3.1 Process Concept 81
- 3.2 Process Scheduling 85
- 3.3 Operations on Processes 90
- 3.4 Interprocess Communication 96
- 3.5 Examples of IPC Systems 102

IEW

1.9 Protection and Security	26
1.10 Distributed Systems	28
1.11 Special-Purpose Systems	29
1.12 Computing Environments	31
1.13 Summary	34
Exercises	36
Bibliographical Notes	38

Structures

2.7 Operating-System Structure	58
2.8 Virtual Machines	64
2.9 Operating-System Generation	70
2.10 System Boot	71
2.11 Summary	72
Exercises	73
Bibliographical Notes	78

ESS MANAGEMENT

3.6 Communication in Client-Server Systems	108
3.7 Summary	115
Exercises	116
Bibliographical Notes	125

Chapter 4 Threads

- | | |
|---------------------------|-----|
| 4.1 Overview | 127 |
| 4.2 Multithreading Models | 129 |
| 4.3 Thread Libraries | 131 |
| 4.4 Threading Issues | 138 |

5.1 Basic Concepts 153

- | | |
|-----------------------------------|-----|
| 5.2 Scheduling Criteria | 157 |
| 5.3 Scheduling Algorithms | 158 |
| 5.4 Multiple-Processor Scheduling | 169 |
| 5.5 Thread Scheduling | 172 |

6.1 Background 191

- 6.2 The Critical Section Problem 193
 - 6.3 Peterson's Solution 195
 - 6.4 Synchronization Hardware 197
 - 6.5 Semaphores 200
 - 6.6 Classic Problems of
Synchronization 204

7.1 System Model 245

- | | |
|------------------------------------|-----|
| 7.2 Deadlock Characterization | 247 |
| 7.3 Methods for Handling Deadlocks | 252 |
| 7.4 Deadlock Prevention | 253 |
| 7.5 Deadlock Avoidance | 256 |

— THREE — MEMO

8.1 Background 275

- 8.2 Swapping 282
 - 8.3 Contiguous Memory Allocation 284
 - 8.4 Paging 288
 - 8.5 Structure of the Page Table 297

4.5 Operating-System Examples	143
4.6 Summary	146
Exercises	146
Bibliographical Notes	151

5.6 Operating System Examples	173
5.7 Algorithm Evaluation	181
5.8 Summary	185
Exercises	186
Bibliographical Notes	189

Part II

SYNCHRONIZATION

6.7 Monitors	209
6.8 Synchronization Examples	217
6.9 Atomic Transactions	222
6.10 Summary	230
Exercises	231
Bibliographical Notes	242

Part III

RECOVERY MANAGEMENT

7.6 Deadlock Detection	262
7.7 Recovery From Deadlock	266
7.8 Summary	267
Exercises	268
Bibliographical Notes	271

Part IV

MEMORY MANAGEMENT

8.6 Segmentation	302
8.7 Example: The Intel Pentium	305
8.8 Summary	309
Exercises	310
Bibliographical Notes	312

Chapter 9 Virtual Memory

- 9.1 Background 315
- 9.2 Demand Paging 319
- 9.3 Copy-on-Write 325
- 9.4 Page Replacement 327
- 9.5 Allocation of Frames 340
- 9.6 Thrashing 343
- 9.7 Memory-Mapped Files 348

PART FOUR ■ STORAGE

Chapter 10 File-System Interface

- 10.1 File Concept 373
- 10.2 Access Methods 382
- 10.3 Directory Structure 385
- 10.4 File-System Mounting 395
- 10.5 File Sharing 397

Chapter 11 File-System Implementation

- 11.1 File-System Structure 411
- 11.2 File-System Implementation 413
- 11.3 Directory Implementation 419
- 11.4 Allocation Methods 421
- 11.5 Free-Space Management 429
- 11.6 Efficiency and Performance 431
- 11.7 Recovery 435

Chapter 12 Mass-Storage Structures

- 12.1 Overview of Mass-Storage Structure 451
- 12.2 Disk Structure 454
- 12.3 Disk Attachment 455
- 12.4 Disk Scheduling 456
- 12.5 Disk Management 462
- 12.6 Swap-Space Management 466

Chapter 13 I/O Systems

- 13.1 Overview 495
- 13.2 I/O Hardware 496
- 13.3 Application I/O Interface 505
- 13.4 Kernel I/O Subsystem 511
- 13.5 Transforming I/O Requests to Hardware Operations 518

9.8 Allocating Kernel Memory	353
9.9 Other Considerations	357
9.10 Operating-System Examples	363
9.11 Summary	365
Exercises	366
Bibliographical Notes	370

AGE MANAGEMENT

face

10.6 Protection	402
10.7 Summary	407
Exercises	408
Bibliographical Notes	409

lementation

11.8 Log-Structured File Systems	437
11.9 NFS	438
11.10 Example: The WAFL File System	444
11.11 Summary	446
Exercises	447
Bibliographical Notes	449

ucture

12.7 RAID Structure	468
12.8 Stable-Storage Implementation	477
12.9 Tertiary-Storage Structure	478
12.10 Summary	488
Exercises	489
Bibliographical Notes	493

13.6 STREAMS	520
13.7 Performance	522
13.8 Summary	525
Exercises	526
Bibliographical Notes	527

PART FIVE ■ PROTEC

Chapter 14 Protection

- 14.1 Goals of Protection 531
- 14.2 Principles of Protection 532
- 14.3 Domain of Protection 533
- 14.4 Access Matrix 538
- 14.5 Implementation of Access Matrix 542
- 14.6 Access Control 545

Chapter 15 Security

- 15.1 The Security Problem 559
- 15.2 Program Threats 563
- 15.3 System and Network Threats 571
- 15.4 Cryptography as a Security Tool 576
- 15.5 User Authentication 587
- 15.6 Implementing Security Defenses 592
- 15.7 Firewalling to Protect Systems and Networks 599

PART SIX ■ DISTRIBUTED SYSTEMS

Chapter 16 Distributed System

- 16.1 Motivation 611
- 16.2 Types of Distributed Operating Systems 613
- 16.3 Network Structure 617
- 16.4 Network Topology 620
- 16.5 Communication Structure 622
- 16.6 Communication Protocols 628

Chapter 17 Distributed File Systems

- 17.1 Background 641
- 17.2 Naming and Transparency 643
- 17.3 Remote File Access 646
- 17.4 Stateful Versus Stateless Service 651
- 17.5 File Replication 652

PTION AND SECURITY

14.7 Revocation of Access Rights	546
14.8 Capability-Based Systems	547
14.9 Language-Based Protection	550
14.10 Summary	555
Exercises	556
Bibliographical Notes	557

15.8 Computer-Security Classifications	600
15.9 An Example: Windows XP	602
15.10 Summary	604
Exercises	604
Bibliographical Notes	606

TED SYSTEMS

Structures

16.7 Robustness	631
16.8 Design Issues	633
16.9 An Example: Networking	636
16.10 Summary	637
Exercises	638
Bibliographical Notes	640

tems

17.6 An Example: AFS	654
17.7 Summary	659
Exercises	660
Bibliographical Notes	661

Chapter 18 Distributed Coordination

- 18.1 Event Ordering 663
- 18.2 Mutual Exclusion 666
- 18.3 Atomicity 669
- 18.4 Concurrency Control 672
- 18.5 Deadlock Handling 676

PART SEVEN ■ SPECIAL TOPICS

Chapter 19 Real-Time Systems

- 19.1 Overview 695
- 19.2 System Characteristics 696
- 19.3 Features of Real-Time Kernels 698
- 19.4 Implementing Real-Time Operating Systems 700

Chapter 20 Multimedia Systems

- 20.1 What Is Multimedia? 715
- 20.2 Compression 718
- 20.3 Requirements of Multimedia Kernels 720
- 20.4 CPU Scheduling 722
- 20.5 Disk Scheduling 723

PART EIGHT ■ CASE STUDIES

Chapter 21 The Linux System

- 21.1 Linux History 737
- 21.2 Design Principles 742
- 21.3 Kernel Modules 745
- 21.4 Process Management 748
- 21.5 Scheduling 751
- 21.6 Memory Management 756
- 21.7 File Systems 764

Chapter 22 Windows XP

- 22.1 History 783
- 22.2 Design Principles 785
- 22.3 System Components 787
- 22.4 Environmental Subsystems 811
- 22.5 File System 814

ination

18.6 Election Algorithms	683
18.7 Reaching Agreement	686
18.8 Summary	688
Exercises	689
Bibliographical Notes	690

AL-PURPOSE SYSTEMS

6

19.5 Real-Time CPU Scheduling	704
19.6 VxWorks 5.x	710

19.7 Summary	712

ns

20.6 Network Management	725
-------------------------	-----

20.7 An Example: CineBlitz	728
----------------------------	-----

20.8 Summary	730
--------------	-----

Exercises	731
-----------	-----

Bibliographical Notes	733
-----------------------	-----

STUDIES

21.8 Input and Output	770
21.9 Interprocess Communication	773
21.10 Network Structure	774
21.11 Security	777
21.12 Summary	779

Exercises	780
-----------	-----

Bibliographical Notes	781
-----------------------	-----

22.6 Networking	822
22.7 Programmer Interface	829
22.8 Summary	836

Exercises	836
-----------	-----

Bibliographical Notes	837
-----------------------	-----

Chapter 23 Influential Operat

- 23.1 Early Systems 839
- 23.2 Atlas 845
- 23.3 XDS-940 846
- 23.4 THE 847
- 23.5 RC 4000 848
- 23.6 CTSS 849

Appendix A UNIX BSD (cont)

- A.1 UNIX History A855
- A.2 Design Principles A860
- A.3 Programmer Interface A862
- A.4 User Interface A869
- A.5 Process Management A872
- A.6 Memory Management A876

Appendix B The Mach System

- B.1 History of the Mach System A897
- B.2 Design Principles A899
- B.3 System Components A900
- B.4 Process Management A903
- B.5 Interprocess Communication A909
- B.6 Memory Management A914

Appendix C Windows 2000 (co

- C.1 History A925
- C.2 Design Principles A926
- C.3 System Components A927
- C.4 Environmental Subsystems A943
- C.5 File System A945
