Introduction

<i>Cornelia Zelinsky-Wibbelt</i>	1
--	---

1. Lexicalization patterns of prepositions

The Dutch spatial preposition “in”: A cognitive-semantic analysis

<i>Hubert Cuyckens</i>	27
----------------------------------	----

Dividing up physical and mental space into conceptual categories by means of English prepositions

<i>René Dirven</i>	73
------------------------------	----

On the grammar of lexical and non-lexical prepositions in English

<i>Gisa Rauh</i>	99
----------------------------	----

Prepositions:

patterns of polysemization and strategies of disambiguation

<i>John R. Taylor</i>	151
---------------------------------	-----

2. Semantic categorization of prepositions and context

Prepositions and object concepts:

A contribution to cognitive semantics

<i>Priska-Monika Hottenroth</i>	179
---	-----

Semantic and conceptual aspects of the preposition *durch*

<i>Ingrid Kaufmann</i>	221
----------------------------------	-----

The meaning of German projective prepositions:

A two-level approach

<i>Ewald Lang</i>	249
-----------------------------	-----

3. Contrastive implications of prepositions

German temporal prepositions from an English perspective

<i>Martin Durrell – David Brée</i>	295
--	-----

On universality and variability in the semantics of spatial adpositions

<i>Bruce W. Hawkins</i>	327
-----------------------------------	-----

Interpreting and translating prepositions:

A cognitively based formalization

Cornelia Zelinsky-Wibbelt 351

4. Image understanding and prepositions

A three-level approach to the semantics of space

Michel Aurnague — Laure Vieu 393

Computing the meaning of localization expressions involving
prepositions: The role of concepts and spatial context

Simone Pribbenow 441

A contribution to reference semantics of spatial prepositions:

The visualization problem and its solution in VITRA

Jörg R. J. Schirra 471
