

# CONTENTS

## CHAPTER 1. PRELIMINARIES

<b>1.1.</b>	Probability	1
<b>1.2.</b>	Random Variables	5
<b>1.3.</b>	Expected Value	7
<b>1.4.</b>	Moment Generating, Characteristic Functions, and Laplace Transforms	11
<b>1.5.</b>	Conditional Expectation	14
<b>1.6.</b>	The Exponential Distribution, Lack of Memory, and Hazard Rate Functions	23
<b>1.7.</b>	Limit Theorems	26
<b>1.8.</b>	Stochastic Processes Problems	26 27
	Notes and References	30

## CHAPTER 2. THE POISSON PROCESS

<b>2.1.</b>	The Poisson Process	31
<b>2.2.</b>	Interarrival and Waiting Time Distributions	34
<b>2.3.</b>	Conditional Distribution of the Arrival Times 2.3.1. The $M/G/1$ Busy Period	36 41
<b>2.4.</b>	Nonhomogeneous Poisson Process	46
<b>2.5.</b>	Compound Poisson Process	48
<b>2.6.</b>	Conditional Poisson Process Problems	49 50
	References	54

## CHAPTER 3. RENEWAL THEORY

<b>3.1.</b>	Introduction and Preliminaries	55
<b>3.2.</b>	Distribution of $N(t)$	56
<b>3.3.</b>	Some Limit Theorems 3.3.1. Wald's Equation 3.3.2. Back to Renewal Theory	57 59 60

## CONTENTS

<b>3.4.</b>	<b>The Key Renewal Theorem and Applications</b>	<b>63</b>
3.4.1.	Alternating Renewal Processes	66
3.4.2.	Limiting Mean Excess and Expansion of $m(t)$	70
3.4.3.	Age-Dependent Branching Processes	72
<b>3.5.</b>	<b>Delayed Renewal Processes</b>	<b>74</b>
<b>3.6.</b>	<b>Renewal Reward Processes</b>	<b>77</b>
3.6.1.	A Queueing Application	82
<b>3.7.</b>	<b>Regenerative Processes</b>	<b>84</b>
3.7.1.	The Symmetric Random Walk and the Arc Sine Laws	85
<b>3.8.</b>	<b>Stationary Point Processes</b>	<b>90</b>
Problems	93	
Notes and References	98	

## CHAPTER 4. MARKOV CHAINS

<b>4.1.</b>	<b>Introduction and Examples</b>	<b>100</b>
<b>4.2.</b>	<b>Chapman–Kolmogorov Equations and Classification of States</b>	<b>103</b>
<b>4.3.</b>	<b>Limit Theorems</b>	<b>107</b>
<b>4.4.</b>	<b>Transitions Among Classes and the Gambler’s Ruin Problem</b>	<b>114</b>
<b>4.5.</b>	<b>Branching Processes</b>	<b>116</b>
<b>4.6.</b>	<b>Applications of Markov Chains</b>	<b>118</b>
4.6.1.	A Markov Chain Model of Algorithmic Efficiency	118
4.6.2.	An Application to Runs—A Markov Chain with a Continuous State Space	120
4.6.3.	List Ordering Rules—Optimality of the Transposition Rule	122
<b>4.7.</b>	<b>Time-Reversible Markov Chains</b>	<b>126</b>
<b>4.8.</b>	<b>Semi-Markov Processes</b>	<b>130</b>
Problems	134	
Notes and References	140	

## CHAPTER 5. CONTINUOUS-TIME MARKOV CHAINS

<b>5.1.</b>	<b>Introduction</b>	<b>141</b>
<b>5.2.</b>	<b>Continuous-Time Markov Chains</b>	<b>141</b>
<b>5.3.</b>	<b>Birth and Death Processes</b>	<b>143</b>
<b>5.4.</b>	<b>The Kolmogorov Differential Equations</b>	<b>147</b>
<b>5.5.</b>	<b>Limiting Probabilities</b>	<b>152</b>
<b>5.6.</b>	<b>Time Reversibility</b>	<b>156</b>
5.6.1.	Tandem Queues	158
5.6.2.	A Stochastic Population Model	160

## CONTENTS

<b>5.7.</b>	<b>Applications of the Reversed Chain to Queueing Theory</b>	<b>164</b>
5.7.1.	Network of Queues	165
5.7.2.	The Erlang Loss Formula	168
5.7.3.	The $M/G/1$ Shared Processor System	171
<b>5.8.</b>	<b>Uniformization</b>	<b>174</b>
Problems		178
References		182

## **CHAPTER 6. BROWNIAN MOTION AND OTHER MARKOV PROCESSES**

<b>6.1.</b>	<b>Introduction and Preliminaries</b>	<b>184</b>
<b>6.2.</b>	<b>Hitting Times, Maximum Variable, and Arc Sine Laws</b>	<b>190</b>
<b>6.3.</b>	<b>Variations on Brownian Motion</b>	<b>192</b>
6.3.1.	Brownian Motion Absorbed at a Value	192
6.3.2.	Brownian Motion Reflected at the Origin	193
6.3.3.	Geometric Brownian Motion	193
6.3.4.	Integrated Brownian Motion	194
<b>6.4.</b>	<b>Brownian Motion with Drift</b>	<b>196</b>
<b>6.5.</b>	<b>Backward and Forward Diffusion Equations</b>	<b>204</b>
<b>6.6.</b>	<b>Applications of the Kolmogorov Equations to Obtaining Limiting Distributions</b>	<b>205</b>
6.6.1.	Semi-Markov Processes	205
6.6.2.	The $M/G/1$ Queue	207
6.6.3.	A Ruin Problem in Risk Theory	211
<b>6.7.</b>	<b>A Markov Shot Noise Process</b>	<b>212</b>
<b>6.8.</b>	<b>Stationary Processes</b>	<b>214</b>
Problems		217
References		220

## **CHAPTER 7. RANDOM WALKS AND MARTINGALES**

Introduction	221	
<b>7.1.</b>	<b>Duality in Random Walks</b>	<b>222</b>
7.1.1.	Some Remarks Concerning Exchangeable Random Variables	226
<b>7.2.</b>	<b>Martingales</b>	<b>228</b>
<b>7.3.</b>	<b>Back to Random Walks</b>	<b>233</b>
<b>7.4.</b>	<b>Applications to <math>G/G/1</math> Queues and Ruin Problems</b>	<b>236</b>
7.4.1.	The $G/G/1$ Queue	236
7.4.2.	A Ruin Problem	238

## CONTENTS

<b>7.5.</b>	<b>Blackwell's Theorem on the Line</b>	<b>239</b>
<b>7.6.</b>	<b>More on Martingales</b>	<b>242</b>
	Problems	246
	Notes and References	249

## **CHAPTER 8. STOCHASTIC ORDER RELATIONS**

	Introduction	251
<b>8.1.</b>	<b>Stochastically Larger</b>	<b>251</b>
<b>8.2.</b>	<b>Coupling</b>	<b>255</b>
8.2.1.	Stochastic Monotonicity Properties of Birth and Death Processes	257
8.2.2.	Exponential Convergence in Markov Chains	258
<b>8.3.</b>	<b>Hazard Rate Ordering and Applications to Counting Processes</b>	<b>260</b>
<b>8.4.</b>	<b>Likelihood Ratio Ordering</b>	<b>266</b>
<b>8.5.</b>	<b>Stochastically More Variable</b>	<b>270</b>
<b>8.6.</b>	<b>Applications of Variability Orderings</b>	<b>273</b>
8.6.1.	Comparison of $G/G/1$ Queues	274
8.6.2.	A Renewal Process Application	275
8.6.3.	A Branching Process Application	277
	Problems	279
	Notes and References	283

<b>ANSWERS AND SOLUTIONS TO SELECTED PROBLEMS</b>	<b>285</b>
<b>INDEX</b>	<b>307</b>
