CHAPTER 1 INTRODUCTION: STATISTICAL INFERENCE AND DECISION-MAKING 1

- 1.1 *What is Statistics?* 1
- 1.2 *Probability models* 3
- 1.3 *Relevant information* 7
- 1.4 *Statistical inference and decision-making* 13
- 1.5 *Different approaches* 16
- 1.6 *Arbitrariness and controversy* 18
 - Historical comment and References* 22

CHAPTER 2 AN ILLUSTRATION OF THE DIFFERENT APPROACHES 27

- 2.1 *A practical example* 27
- 2.2 *Sample data as the sole source of information: the classical approach* 30
 - 2.2.1 *Batch quality* 31
 - 2.2.2 *Component lifetimes* 40
- 2.3 *Relevant prior information: the Bayesian approach* 44
 - 2.3.1 *Prior information on batch quality* 44
 - 2.3.2 *Prior attitudes about component lifetimes!* 50
- 2.4 *Costs and consequences: simple decision theory ideas* 51
- 2.5 *Comment and comparisons* 60
 - References* 61

CHAPTER 3 PROBABILITY 62

- 3.1 *Types of probability* 62
- 3.2 *'Classical' probability* 70
- 3.3 *The frequency view* 72
- 3.4 *Logical probability* 76
- 3.5 *Subjective probability* 80
- 3.6 *Other viewpoints* 86
- 3.7 *Some historical background* 86

| | | |
|-----|--------------------|----|
| 3.8 | <i>And so ...</i> | 88 |
| 3.9 | <i>And yet ...</i> | 88 |
| | <i>References</i> | 88 |

CHAPTER 4 UTILITY, AND DECISION-MAKING 90

| | | |
|-------|--|-----|
| 4.1 | <i>Setting a value on rewards, and consequences</i> | 92 |
| 4.2 | <i>The rational expression of preferences</i> | 97 |
| 4.3 | <i>Preferences for prospects, and mixtures of prospects</i> | 98 |
| 4.4 | <i>The numerical assessment of prospects</i> | 100 |
| 4.5 | <i>The measurement of utilities</i> | 101 |
| 4.5.1 | <i>Formal construction of utilities</i> | 101 |
| 4.5.2 | <i>Personal expression of utilities</i> | 103 |
| 4.6 | <i>Decision-making</i> | 104 |
| 4.7 | <i>The utility of money</i> | 105 |
| 4.8 | <i>Comment: mathematical refinements: distinctions of attitude</i> | 109 |
| | <i>References</i> | 110 |

CHAPTER 5 CLASSICAL INFERENCE 111

| | | |
|-------|--|-----|
| 5.1 | <i>Basic aims and concepts</i> | 113 |
| 5.1.1 | <i>Information and its representation</i> | 114 |
| 5.2 | <i>Estimation and hypothesis testing—the dual aims</i> | 117 |
| 5.3 | <i>Point estimation</i> | 119 |
| 5.3.1 | <i>Criteria for point estimators</i> | 119 |
| 5.3.2 | <i>Optimum estimators</i> | 123 |
| 5.3.3 | <i>Methods of constructing estimators</i> | 130 |
| 5.4 | <i>Hypothesis testing</i> | 137 |
| 5.4.1 | <i>Criteria for hypothesis tests</i> | 138 |
| 5.4.2 | <i>Uniformly most powerful tests</i> | 142 |
| 5.4.3 | <i>Construction of tests</i> | 149 |
| 5.5 | <i>Region and interval estimates</i> | 152 |
| 5.6 | <i>Comment and controversy</i> | 156 |
| 5.6.1 | <i>Initial and final precision</i> | 157 |
| 5.6.2 | <i>Hypothesis tests, and decisions</i> | 159 |
| 5.6.3 | <i>Counter criticism</i> | 161 |
| | <i>References</i> | 163 |

CHAPTER 6 BAYESIAN INFERENCE 164

| | | |
|-----|------------------------------|-----|
| 6.1 | <i>Thomas Bayes</i> | 164 |
| 6.2 | <i>The Bayesian method</i> | 165 |
| 6.3 | <i>Particular techniques</i> | 169 |
| 6.4 | <i>Prior ignorance</i> | 177 |
| 6.5 | <i>Vague prior knowledge</i> | 181 |

- 6.6 *Substantial prior knowledge* 183
 - 6.6.1 *Conjugate prior distributions* 184
- 6.7 *Empirical Bayes' methods; meta-prior distributions* 189
 - 6.7.1 *Empirical Bayes' methods* 189
 - 6.7.2 *Meta-prior distributions* 191
- 6.8 *Comment and controversy* 193
 - 6.8.1 *Interpretation of prior and posterior distributions* 193
 - 6.8.2 *Sufficiency, likelihood and unbiasedness* 196
 - 6.8.3 *Controversy* 198
 - References* 199

CHAPTER 7 DECISION THEORY 201

- 7.1 *An illustrative example* 203
- 7.2 *Basic concepts and principles* 211
 - 7.2.1 *The decision theory model* 214
 - 7.2.2 *The no-data situation* 214
 - 7.2.3 *Sample data* 215
- 7.3 *Attainment and Implementation* 219
 - 7.3.1 *Admissibility and unbiasedness* 220
 - 7.3.2 *Determination of Bayes' decision rules* 224
 - 7.3.3 *Minimax decision rules* 228
 - 7.3.4 *Estimation and hypothesis testing* 229
- 7.4 *Problems with finite numbers of actions, and states of nature* 233
 - 7.4.1 *The no-data problem* 234
 - 7.4.2 *The use of sample data* 235
- 7.5 *Extensions and modifications* 237
- 7.6 *Critical comment* 239
 - References* 242

CHAPTER 8 SOME OTHER APPROACHES 243

- 8.1 *Fiducial inference* 244
- 8.2 *Likelihood inference* 251
- 8.3 *Structural inference* 256
- 8.4 *Information* 263
- 8.5 *The 'Mathematics of Philosophy'* 266
 - References* 268
