

Contents

1.	BASIC CONCEPTS AND MODELS	1
1.1	Introduction, 1	
1.2	Basic Concepts of Lifetime Distributions, 8	
1.3	Some Important Models, 13	
1.4	Censoring and Statistical Methods, 31	
1.5	Problems and Supplements, 44	
2.	LIFE TABLES, GRAPHS, AND RELATED PROCEDURES	52
2.1	Introduction, 52	
2.2	Life Tables, 53	
2.3	Nonparametric Estimation of the Survivor Function, 71	
2.4	Plotting Procedures, 81	
2.5	Least Squares Estimation of Parameters, 91	
2.6	Problems and Supplements, 94	
3.	INFERENCE PROCEDURES FOR EXPONENTIAL DISTRIBUTIONS	100
3.1	Single Samples: Complete or Type II Censored Data, 101	
3.2	Single Samples: Type I Censored Data, 105	
3.3	Comparison of Exponential Distributions, 111	
3.4	Experimental Plans and Life Test Procedures, 117	
3.5	The Two-Parameter Exponential Distribution, 126	
3.6	Cautionary Remarks, 133	
3.7	Problems and Supplements, 134	

4.	INFERENCE PROCEDURES FOR WEIBULL AND EXTREME VALUE DISTRIBUTIONS	141
4.1	Single Samples: Complete or Type II Censored Data, 142	
4.2	Single Samples: Type I Censored Data, 169	
4.3	Comparison of Weibull or Extreme Value Distributions, 178	
4.4	Additional Problems, 190	
4.5	Problems and Supplements, 197	
5.	INFERENCE PROCEDURES FOR SOME OTHER MODELS	203
5.1	The Gamma Distribution, 203	
5.2	Log-Normal and Normal Distributions, 220	
5.3	The Generalized Gamma Distribution, 237	
5.4	Polynomial Hazard Function and Other Models, 252	
5.5	Grouped Data From Continuous Models, 259	
5.6	Problems and Supplements, 265	
6.	PARAMETRIC REGRESSION MODELS	272
6.1	Introduction, 272	
6.2	Residual Analysis and Other Model Checks, 277	
6.3	Exponential Regression Models, 282	
6.4	Weibull and Extreme Value Regression Models, 298	
6.5	Normal and Log-Normal Regression Models, 313	
6.6	Gamma and Log-Gamma Regression Models, 322	
6.7	Least Squares Estimation, 328	
6.8	Problems and Supplements, 336	
7.	DISTRIBUTION-FREE METHODS FOR THE PROPORTIONAL HAZARDS AND RELATED REGRESSION MODELS	343
7.1	Introduction, 343	
7.2	Statistical Methods for the Continuous PH Model, 344	
7.3	Regression Methods for Grouped Data, 372	
7.4	Some Other Problems, 390	
7.5	Problems and Supplements, 396	

8.	NONPARAMETRIC AND DISTRIBUTION-FREE METHODS	401
8.1	Nonparametric Estimation of Survivor Functions and Quantiles, 401	
8.2	Rank Tests for Comparing Distributions, 412	
8.3	Problems and Supplements, 427	
9.	GOODNESS OF FIT TESTS	431
9.1	Some General Methods of Testing Fit, 432	
9.2	Tests of Fit for Specific Distributions, 444	
9.3	Model Choice and Statistical Methods, 468	
9.4	Problems and Supplements, 470	
10.	MULTIVARIATE AND STOCHASTIC PROCESS MODELS	475
10.1	Multivariate Models, 475	
10.2	Some Stochastic Process Models, 491	
10.3	Problems and Supplements, 503	
	APPENDICES	508
A.	Glossary of Notation, Abbreviations, and Other Concepts, 508	
B.	The Gamma and Some Related Functions, 511	
C.	Asymptotic Variance Formulas, 516	
D.	Order Statistics, 518	
E.	Maximum Likelihood Large-Sample Theory, 522	
F.	Optimization Methods for Maximum Likelihood, 528	
G.	Inference in Location-Scale Parameter Models, 533
