

Contents

1.General introduction and main findings	13
2.The poverty and distributional impact of “opening-up”: Urban Colombia in the early 1990s.....	23
2.1. Introduction.....	23
2.2. Colombia in the early 1990s: “Apertura” and a non-tradable boom	25
2.3. Capturing the transmission channels: Methodology.....	28
2.4. The poverty and distributional impact of “Apertura”.....	34
2.5. Conclusions.....	43
2.6. Appendices.....	45
2.6.1. Additional figures	45
2.6.2. Additional tables	46
3.Resource booms, inequality, and poverty: The case of gas in Bolivia.....	51
3.1. Introduction.....	51
3.2. The gas boom and other resource shocks	52
3.3. The modelling framework	58
3.3.1. The CGE model.....	58
3.3.2. The microsimulation model	62
3.4. Results.....	67
3.4.1. Stylized simulations for link variables.....	67
3.4.2. Gas shock simulations.....	69
3.5. Concluding remarks.....	73
3.6. Appendices.....	76
3.6.1. Additional figures	76
3.6.2. Additional tables	80

4.Structural change and poverty reduction in Brazil: The impact of the Doha Round	83
4.1. Introduction.....	83
4.2. Background and motivation.....	84
4.3. The modeling framework.....	88
4.3.1. The macro model	88
4.3.2. The micro model	96
4.4. Brazil in the next decade: How trade policy affects a Business as Usual scenario?	107
4.4.1. The Business as Usual macro results	107
4.4.2. Distributional and poverty results for the BaU	109
4.4.3. Macro results for the full liberalization and the Doha trade policy shocks.....	114
4.4.4. Trade scenarios' distributional and poverty results	121
4.5. Conclusions.....	131
4.6. Appendices.....	133
4.6.1. Additional tables	133
5.Conclusions, policy relevance, and future research.....	141
6.References.....	147

List of Figures

Figure 2.1:	Composition of income by source by income vintile	35
Figure 2.2:	Growth incidence curves, real data vs. historical simulation 1988-95 (5 th to 95 th percentile)	37
App. Figure 2.1:	Complete growth incidence curves, real data vs. historical simulation 1988-95	45
App. Figure 2.2:	Growth incidence curves, simulations II and III	45
App. Figure 2.3:	Growth incidence curves, simulations IV and V	46
Figure 3.1:	Major gas-related resource flows in percent of GDP, 1990- 2003	54
Figure 3.2:	Composition of exports in percent, 1990-2004	55
Figure 3.3:	Real exchange rate (right scale, 1995=100) and balance-of- payments items (in percent of GDP, left scale), 1990-2003	56
Figure 3.4:	Sectoral shares in GDP, 1992-1997-2001	57
App. Figure 3.1:	The construction sector, 1995 = 100	76
App. Figure 3.2:	Growth incidence curve, 5 point decline in formal employment for unskilled labor.....	77
App. Figure 3.3:	Growth incidence curve, 5 point decline in formal employment for skilled labor.....	78
App. Figure 3.4:	Growth incidence curve, 10 percent increase in transfers to all households	79
Figure 4.1:	Growth incidence curves, BaU, all, agricultural, and non- agricultural households.....	111
Figure 4.2:	Decomposition of poverty changes, BaU, all households.....	113
Figure 4.3:	Growth incidence curves for the BaU and Trade scenarios, poorest 30 percent of all households	123

List of Tables

Table 2.1:	Trade Liberalization in Colombia	26
Table 2.2:	Labor force composition in 1988 and 1995.....	35
Table 2.3:	Real wages and self-employment income, 1988 and 1988-95 evolution	36
Table 2.4:	Poverty and distributional simulation results, real data vs. historical simulation 1988-95.....	38
Table 2.5:	Overview of simulation scenarios	41
Table 2.6:	Poverty and distributional simulation results	41
App. Table 2.1:	Composition of the labor force by gender and skill	46
App. Table 2.2:	Estimation results of wage equations and profit function	47
App. Table 2.3:	Estimation results of the choice models, average marginal effects	48
App. Table 2.4:	Percentage point changes in sectoral employment composition, urban labor force, 1988-95	50
App. Table 2.5:	Shares of manufacturing wage-employment across labor market segments	50
App. Table 2.6:	Sectoral shares of wage-employment and skill intensity (wage-employment, 1988 and 1995	50
Table 3.1:	Structural Characteristics of the Bolivian Economy	60
Table 3.2:	Sectoral Deviations from average wages	61
Table 3.3:	Overview of the income generation model	64
Table 3.4:	Marginal effects of changes in link variables on urban inequality and poverty (point differences)	68
Table 3.5:	CGE results for link variables (shocks compared to BaU).....	72
Table 3.6:	Poverty and distributional results (point differences to BaU)	73
Table 3.7:	Poverty and distributional impact of increases in public transfers	73

App. Table 3.1:	Estimation results for the logit choice models, choices are dichotomous variables with formal = 1, informal = 1	80
App. Table 3.2:	Estimation results for the wage and profit equations	81
App. Table 3.3:	Business as Usual (BaU) scenario	82
Table 4.1:	CGE Model accounts.....	89
Table 4.2:	Medium term labor market structural adjustments, 2001-2015	108
Table 4.3:	Employment shares and wage ratios in 2001 and 2015	108
Table 4.4:	BaU's output and trade sectoral growth rates, and employment intensities	109
Table 4.5:	Poverty and inequality in the BaU scenario, by sectors	110
Table 4.6:	Poverty and inequality in a distributionally neutral scenario ..	112
Table 4.7:	Trade shock – Tariff reductions and international prices changes	115
Table 4.8:	Initial (year 2001) structure of the Brazilian economy	116
Table 4.9:	Brazil' structural adjustment, percent changes in the final year between BaU and trade shocks.....	117
Table 4.10:	Effects on imports, exports and real GDP due to combined or partial shock (Indices, BaU = 100 in 2015)	120
Table 4.11:	Factor markets effects.....	121
Table 4.12:	Poverty and Distributional Impact of Trade, all households...	122
Table 4.13:	Poverty and inequality in the Doha scenario, by sector	123
Table 4.14:	Poverty and inequality in the Full scenario, by sector.....	124
Table 4.15:	Poverty impact of trade, agri stayers	125
Table 4.16:	Poverty impact of trade, sectoral movers	126
Table 4.17:	Poverty impact of trade, non-agri stayers.....	126
Table 4.18:	Poverty and inequality impact of trade, urban and rural	127
Table 4.19:	Poverty impact of trade, by region	128
Table 4.20:	Poverty impact of trade, agricultural stayers by owning land	129
Table 4.21:	Poverty impact of trade, by educational levels.....	129
Table 4.22:	Poverty impact of trade, by occupation	130

App. Table 4.1: Estimation results, mover-stayer model for heads	133
App. Table 4.2: Estimation results, mover-stayer model for non-heads	134
App. Table 4.3: Estimation results, wage/profit equations.....	135
App. Table 4.4: Estimation results, labor market segmentation.....	137
