

Contents

1.	Steel – the material for today and tomorrow	2
1.1	Innovations in steel	2
1.2	Fundamentals	5
1.3	Various grades of steel	9
	<i>General classification</i>	9
	<i>Nomenclature systems for steels</i>	10
	<i>Steel names</i>	10
	<i>Steel numbers</i>	11
	<i>Steel groups</i>	11
2.	Raw materials for the production of iron and steel	16
2.1	Iron ores	16
	<i>Types of iron ore</i>	17
	<i>Quality requirements and the assessment of ores</i>	18
	<i>Pre-treatment of the ores</i>	20
2.2	Scrap	24
2.3	Reducing agents	24
2.4	Fluxes	25
2.5	Refractories	26
3.	From ore to steel	27
3.1	Blast furnace – converter route	27
	<i>Coke metallurgy</i>	27
	<i>Coal metallurgy</i>	28
3.2	The electric arc furnace route	28
	<i>DRI metallurgy</i>	28
	<i>Scrap metallurgy</i>	29
3.3	Secondary metallurgy	29
3.4	Special developments	29
4.	Reduction of iron ores	30
4.1	Hot metal production	30
	<i>Blast furnace plant</i>	30
	<i>Processes within the blast furnace</i>	34
	<i>Products of the blast furnace</i>	37
	<i>Material and mass balance of the blast furnace</i>	38
	<i>Process control</i>	39
	<i>Future prospects</i>	40
4.2	Direct reduction processes	40
	<i>Gas reduction processes</i>	41
	<i>Solid-state reduction processes</i>	45
4.3	Smelting reduction processes	47
4.4	Hot metal pre-treatment	51
5.	Steelmaking	52
5.1	Charge materials	52
5.2	The refining process	53
5.3	Current state of refining process development	54
5.4	Oxygen steelmaking	55
	<i>Refining with pure oxygen</i>	56
	<i>Process automation</i>	61
5.5	Electric steelmaking	61
	<i>The electric arc furnace</i>	62

	<i>The melting process</i>	64
	<i>Current status of the electric steelmaking process</i>	65
	<i>Other electric steelmaking processe</i>	68
5.6	The open-hearth process	69
5.7	Secondary metallurgy	69
	<i>Basic principles</i>	69
	<i>Secondary metallurgy processes</i>	70
	<i>Vacuum treatment</i>	72
	<i>Special refining processes</i>	74
	<i>Special melting purposes</i>	75
5.8	Outlook	76
6.	Steel casting processes	78
6.1	Continuous casting	79
	<i>The continuous casting process</i>	80
	<i>Types of continuous casting plant</i>	82
	<i>Automation</i>	82
	<i>Near-net-shape casting</i>	83
	<i>Horizontal continuous casting</i>	87
6.2	Ingot casting	87
6.3	Spray forming	88
7.	Iron and steel castings	89
7.1	Cast iron	89
	<i>Grey cast iron</i>	89
	<i>Spheroidal graphite cast iron</i>	89
	<i>Malleable cast iron</i>	90
7.2	Cast steel	90
8.	The forming of steel	92
8.1	The basics of steel rolling	92
	<i>Deformation</i>	92
	<i>Rolling</i>	93
8.2	Rolled steel products	97
8.3	Rolling mill facilities	100
	<i>Rolling stands</i>	100
	<i>Rolling stand terminology</i>	100
	<i>Rolling-mill rolls</i>	102
	<i>Rolling mills</i>	102
	<i>Rolling trains</i>	103
	<i>Dressing and finishing department</i>	105
8.4	Production stages in the hot-rolling of steel	106
	<i>Rolling of semi-finished</i>	106
	<i>Rolling of finished products</i>	106
8.5	Other steel forming processes	111
	<i>Manufacture of seamless steel tube</i>	111
	<i>Manufacture of welded steel tube</i>	112
	<i>Forging and pressing</i>	113
	<i>Open-die forging</i>	113
	<i>Radial-axial ring rolling</i>	117
	<i>Closed-die forging</i>	119
	<i>Extrusion</i>	119

8.6	The cold-forming of steel	120
	<i>Cold-rolling</i>	120
	<i>Integration of pickling line and tandem mill</i>	123
	<i>Rolling of tailored roll blanks (flexible rolling)</i>	123
	<i>Bright steel</i>	123
	<i>Cold-drawing</i>	126
	<i>Other methods of cold-forming steel (examples)</i>	127
8.7	Steel parting techniques	128
8.8	Steel joining techniques	128
8.9	Coatings and barrier layers for the protection of steel against corrosion	134
	<i>Organic coatings</i>	135
	<i>Inorganic coatings</i>	136
	<i>Metallic coatings</i>	137
	<i>Conversion coatings</i>	141
8.10	Heat treatment of steel	143
	<i>Annealing</i>	144
	<i>Hardening</i>	144
	<i>Tempering</i>	145
	<i>Quenching and tempering</i>	145
9.	Materials	146
9.1	Fundamental principles	146
	<i>Service requirements</i>	146
	<i>Causes of failure</i>	146
	<i>Fracture mechanics</i>	146
	<i>Factors that influence characteristic material properties</i>	146
9.2	Materials	147
	<i>Test methods</i>	148
10.	Quality management	153
11.	Plant management	154
12.	Sustainable resource utilization with environmental protection and energy management	156
	<i>Dusts and sludges</i>	156
	<i>The steel cycle</i>	156
	<i>Slags and other by-products</i>	157
	<i>Energy</i>	157
	<i>CO₂ emissions and air pollution control</i>	158
	<i>Sustainability – more than just environmental protection</i>	159
	<i>Summary</i>	161
13.	The uses of steel	162
	<i>Huge range of applications</i>	162
	<i>Steel grades and system solutions</i>	163
	<i>Steel meets highest requirements</i>	166
	<i>Wide range of processing properties for modern technologies</i>	177
14.	A brief history of iron and steelmaking	178
	Chart: From ore to steel	185
