

Contents

1.	Various Aspects of the Energy and Raw Material Supply	1
1.1.	Present and Predictable Energy Requirements	2
1.2.	Availability of Individual Sources	3
1.2.1.	Oil	3
1.2.2.	Natural Gas	4
1.2.3.	Coal	5
1.2.4.	Nuclear Fuels	5
1.3.	Prospects for the Future Energy Supply	7
1.4.	Present and Anticipated Raw Material Situation	8
1.4.1.	Petrochemical Primary Products	8
1.4.2.	Coal Conversion Products	11
2.	Basic Products of Industrial Syntheses	15
2.1.	Synthesis Gas	15
2.1.1.	Generation of Synthesis Gas	15
2.1.1.1.	Synthesis Gas <i>via</i> Coal Gasification	16
2.1.1.2.	Synthesis Gas <i>via</i> Cracking of Natural Gas and Oil	19
2.1.2.	Synthesis Gas Purification and Use	21
2.2.	Production of the Pure Synthesis Gas Components	24
2.2.1.	Carbon Monoxide	24
2.2.2.	Hydrogen	26
2.3.	C ₁ -Units	30
2.3.1.	Methanol	30
2.3.1.1.	Manufacture of Methanol	30
2.3.1.2.	Applications and Potential Applications of Methanol	32
2.3.2.	Formaldehyde	37
2.3.2.1.	Formaldehyde from Methanol	38
2.3.2.2.	Uses and Potential Uses of Formaldehyde	40
2.3.3.	Formic Acid	42
2.3.4.	Hydrocyanic Acid	46
2.3.5.	Methylamines	51
2.3.6.	Halogen Derivatives of Methane	52
3.	Olefins	59
3.1.	Historical Development of Olefin Chemistry	59

3.2.	Olefins <i>via</i> Cracking of Hydrocarbons	59
3.3.	Special Manufacturing Processes for Olefins	63
3.3.1.	Ethylene, Propene	63
3.3.2.	Butenes	66
3.3.3.	Higher Olefins.....	74
3.3.3.1.	Unbranched Higher Olefins	75
3.3.3.2.	Branched Higher Olefins	83
3.4.	Olefin Metathesis.....	85
4.	Acetylene.....	91
4.1.	Present Significance of Acetylene	91
4.2.	Manufacturing Processes for Acetylene	93
4.2.1.	Manufacture Based on Calcium Carbide	93
4.2.2.	Thermal Processes	94
4.3.	Utilization of Acetylene.....	98
5.	1,3-Diolefins.....	107
5.1.	1,3-Butadiene	107
5.1.1.	Historical Syntheses of 1,3-Butadiene	108
5.1.2.	1,3-Butadiene from C ₄ Cracking Fractions	109
5.1.3.	1,3-Butadiene from C ₄ Alkanes and Alkenes	111
5.1.4.	Utilization of 1,3-Butadiene.....	114
5.2.	Isoprene.....	117
5.2.1.	Isoprene from C ₅ Cracking Fractions.....	117
5.2.2.	Isoprene from Synthetic Reactions	119
5.3.	Chloroprene	122
5.4.	Cyclopentadiene.....	125
6.	Syntheses involving Carbon Monoxide	127
6.1.	Hydroformylation of Olefins	127
6.1.1.	The Chemical Basis of Hydroformylation	128
6.1.2.	Industrial Operation of Hydroformylation	131
6.1.3.	Catalyst Modifications in Hydroformylation	134
6.1.4.	Utilization of oxo Products	136
6.1.4.1.	Oxo Alcohols	136
6.1.4.2.	Oxo Carboxylic Acids	138
6.1.4.3.	Aldol and Condensation Products of the oxo Aldehydes.....	139
6.2.	Carbonylation of Olefins.....	141
6.3.	The Koch Carboxylic Acid Synthesis.....	143

7.	Oxidation Products of Ethylene.....	145
7.1.	Ethylene Oxide	145
7.1.1.	Ethylene Oxide by the Chlorohydrin Process	146
7.1.2.	Ethylene Oxide by Direct Oxidation.....	146
7.1.2.1.	Chemical Principles	146
7.1.2.2.	Process Operation	148
7.1.2.3.	Potential Developments in Ethylene Oxide Manufacture.....	149
7.2.	Secondary Products of Ethylene Oxide	151
7.2.1.	Ethylene Glycol and Higher Ethylene Glycols	152
7.2.1.1.	Potential Developments in Ethylene Glycol Manufacture.....	153
7.2.1.2.	Uses of Ethylene Glycol	155
7.2.1.3.	Secondary Products – Glyoxal, Dioxolane, 1,4-Dioxane	156
7.2.2.	Polyethoxylates.....	158
7.2.3.	Ethanolamines and Secondary Products	159
7.2.4.	Ethylene Glycol Ethers	162
7.2.5.	Additional Products from Ethylene Oxide.....	164
7.3.	Acetaldehyde	165
7.3.1.	Acetaldehyde <i>via</i> Oxidation of Ethylene	166
7.3.1.1.	Chemical Basis	166
7.3.1.2.	Process Operation	168
7.3.2.	Acetaldehyde from Ethanol	169
7.3.3.	Acetaldehyde by C ₃ /C ₄ Alkane Oxidation	170
7.4.	Secondary Products of Acetaldehyde	171
7.4.1.	Acetic Acid	171
7.4.1.1.	Acetic Acid by Oxidation of Acetaldehyde	172
7.4.1.2.	Acetic Acid by Oxidation of Alkanes and Alkenes	174
7.4.1.3.	Carbonylation of Methanol to Acetic Acid.....	177
7.4.1.4.	Potential Developments in Acetic Acid Manufacture.....	179
7.4.1.5.	Use of Acetic Acid.....	180
7.4.2.	Acetic Anhydride and Ketene	182
7.4.3.	Aldol Condensation of Acetaldehyde and Secondary Products.....	186
7.4.4.	Ethyl Acetate.....	188
7.4.5.	Pyridine and Alkylpyridines	190
8.	Alcohols.....	193
8.1.	Lower Alcohols.....	193
8.1.1.	Ethanol	193
8.1.2.	2-Propanol.....	198
8.1.3.	Butanols	201
8.1.4.	Amyl Alcohols.....	205
8.2.	Higher Alcohols.....	205
8.2.1.	Oxidation of Paraffins to Alcohols	209

8.2.2.	Alfol Synthesis.....	210
8.3.	Polyhydric Alcohols	212
8.3.1.	Pentaerythritol.....	212
8.3.2.	Trimethylolpropane	213
8.3.3.	Neopentyl Glycol.....	214
9.	Vinyl-Halogen and Vinyl-Oxygen Compounds.....	217
9.1.	Vinyl-Halogen Compounds	217
9.1.1.	Vinyl Chloride	217
9.1.1.1.	Vinyl Chloride from Acetylene	218
9.1.1.2.	Vinyl Chloride from Ethylene	219
9.1.1.3.	Potential Developments in Vinyl Chloride Manufacture.....	222
9.1.1.4.	Uses of Vinyl Chloride and 1,2-Dichloroethane.....	223
9.1.2.	Vinyldene Chloride.....	225
9.1.3.	Vinyl Fluoride and Vinylidene Fluoride.....	225
9.1.4.	Trichloro- and Tetrachloroethylene	227
9.1.5.	Tetrafluoroethylene.....	229
9.2.	Vinyl Esters and Ethers.....	230
9.2.1.	Vinyl Acetate	230
9.2.1.1.	Vinyl Acetate Based on Acetylene or Acetaldehyde	230
9.2.1.2.	Vinyl Acetate Based on Ethylene	231
9.2.1.3.	Possibilities for Development of Vinyl Acetate Manufacture	235
9.2.2.	Vinyl Esters of Higher Carboxylic Acids	236
9.2.3.	Vinyl Ethers	237
10.	Components for Polyamides	239
10.1.	Dicarboxylic Acids	240
10.1.1.	Adipic Acid.....	241
10.1.2.	1,12-Dodecanedioic Acid	245
10.2.	Diamines and Aminocarboxylic Acids	246
10.2.1.	Hexamethylenediamine.....	246
10.2.1.1.	Manufacture of Adiponitrile	247
10.2.1.2.	Hydrogenation of Adiponitrile.....	251
10.2.1.3.	Potential Developments in Adiponitrile Manufacture	252
10.2.2.	ω -Aminoundecanoic Acid	252
10.3.	Lactams	253
10.3.1.	ϵ -Caprolactam.....	253
10.3.1.1.	ϵ -Caprolactam from the Cyclohexanone Oxime Route	254
10.3.1.2.	Alternative Manufacturing Processes for ϵ -Caprolactam	258
10.3.1.3.	Possibilities for Development in ϵ -Caprolactam Manufacture	260
10.3.1.4.	Uses of ϵ -Caprolactam	262
10.3.2.	Lauryl Lactam.....	264

11.	Propene Conversion Products	267
11.1.	Oxidation Products of Propene	268
11.1.1.	Propylene Oxide	268
11.1.1.1.	Propylene Oxide from the Chlorohydrin Process	268
11.1.1.2.	Indirect Oxidation Routes to Propylene Oxide	269
11.1.1.3.	Possibilities for Development in the Manufacture of Propylene Oxide.....	273
11.1.2.	Secondary Products of Propylene Oxide	277
11.1.3.	Acetone	279
11.1.3.1.	Direct Oxidation of Propene	279
11.1.3.2.	Acetone from Isopropanol	280
11.1.4.	Secondary Products of Acetone	281
11.1.4.1.	Acetone Aldolization and Secondary Products.....	282
11.1.4.2.	Methacrylic Acid and Ester	283
11.1.5.	Acrolein	287
11.1.6.	Secondary Products of Acrolein	289
11.1.7.	Acrylic Acid and Esters	291
11.1.7.1.	Traditional Acrylic Acid Manufacture.....	291
11.1.7.2.	Acrylic Acid from Propene	293
11.1.7.3.	Possibilities for Development in Acrylic Acid Manufacture	295
11.2.	Allyl Compounds and Secondary Products	296
11.2.1.	Allyl Chloride	296
11.2.2.	Allyl Alcohol and Esters.....	299
11.2.3.	Glycerol from Allyl Precursors.....	301
11.3.	Acrylonitrile.....	304
11.3.1.	Traditional Acrylonitrile Manufacture	305
11.3.2.	Ammoxidation of Propene	306
11.3.2.1.	Sohio Acrylonitrile Process	307
11.3.2.2.	Other Propene/Propane Ammonoxidation Processes.....	308
11.3.3.	Possibilities for Development of Acrylonitrile Manufacture	309
11.3.4.	Uses and Secondary Products of Acrylonitrile	310
12.	Aromatics – Production and Conversion.....	313
12.1.	Importance of Aromatics	313
12.2.	Sources of Feedstocks for Aromatics.....	314
12.2.1.	Aromatics from Coking of Hard Coal.....	315
12.2.2.	Aromatics from Reformate and Pyrolysis Gasoline.....	316
12.2.2.1.	Isolation of Aromatics.....	319
12.2.2.2.	Special Separation Techniques for Non-Aromatic/ Aromatic and Aromatic Mixtures	320
12.2.3.	Possibilities for Development of Aromatic Manufacture	325
12.2.4.	Condensed Aromatics	326
12.2.4.1.	Naphthalene	327
12.2.4.2.	Anthracene	328

12.3.	Conversion Processes for Aromatics	331
12.3.1.	Hydrodealkylation	331
12.3.2.	<i>m</i> -Xylene Isomerization.....	332
12.3.3.	Disproportionation, Transalkylation and Methylation	334
13.	Benzene Derivatives	337
13.1.	Alkylation and Hydrogenation Products of Benzene.....	337
13.1.1.	Ethylbenzene.....	337
13.1.2.	Styrene	341
13.1.3.	Cumene	344
13.1.4.	Higher Alkylbenzenes.....	345
13.1.5.	Cyclohexane	347
13.2.	Oxidation and Secondary Products of Benzene	349
13.2.1.	Phenol	349
13.2.1.1.	Manufacturing Processes for Phenol.....	350
13.2.1.2.	Potential Developments in Phenol Manufacture.....	357
13.2.1.3.	Uses and Secondary Products of Phenol.....	360
13.2.2.	Dihydroxybenzenes	363
13.2.3.	Maleic Anhydride	367
13.2.3.1.	Maleic Anhydride from Oxidation of Benzene.....	368
13.2.3.2.	Maleic Anhydride from Oxidation of Butene	370
13.2.3.3.	Maleic Anhydride from Oxidation of Butane	371
13.2.3.4.	Uses and Secondary Products of Maleic Anhydride	372
13.3.	Other Benzene Derivatives	375
13.3.1.	Nitrobenzene	375
13.3.2.	Aniline	376
13.3.3.	Diisocyanates	379
14.	Oxidation Products of Xylene and Naphthalene	387
14.1.	Phthalic Anhydride	387
14.1.1.	Oxidation of Naphthalene to Phthalic Anhydride	387
14.1.2.	Oxidation of <i>o</i> -Xylene to Phthalic Anhydride	389
14.1.3.	Esters of Phthalic Acid	391
14.2.	Terephthalic Acid	394
14.2.1.	Manufacture of Dimethyl Terephthalate and Terephthalic Acid	395
14.2.2.	Fiber Grade Terephthalic Acid	397
14.2.3.	Other Manufacturing Routes to Terephthalic Acid and Derivatives.....	399
14.2.4.	Uses of Terephthalic Acid and Dimethyl Terephthalate	402
15.	Appendix.....	407
15.1.	Process and Product Schemes	407

15.2.	Definitions of Terms used in Characterizing Chemical Reactions	449
15.3.	Abbreviations for Firms.....	451
15.4.	Sources of Information	452
15.4.1.	General Literature	452
15.4.2.	More Specific Literature (publications, monographs)	453
Index.....		467
