Part I Introduction

1 Introduction.....	1
U. Schiewer	
1.1 The Baltic Sea	1
1.1.1 Geological Background	3
1.1.2 Climate, Hydrology and Chemistry	4
1.1.3 Catchment Area, Eutrophication and Pollution	6
1.1.4 Ecological Structure and Function	10
1.2 Pelagial	10
1.3 Benthic	12
1.4 Conversion of Substances	16
1.5 Spatial and Temporal Variations in the Baltic Sea	18
1.6 Protection	20
References	20
2 The Baltic Coastal Zones	23
U. Schiewer	
2.1 Coastal Structures and Types	23
2.2 Coastal Dynamics	25
2.3 Ecology of Coastal Waters	29
2.4 Anthropogenic Loads and Protection Measures	30
References	33

Part II Ecological Case Studies

Part II.A Southern Baltic Coast

3 Darß-Zingst Boddens, Northern Rügener Boddens and Schlei	35
U. Schiewer	
3.1 Introduction	35
3.2 Boddens	35
3.3 Schlei	35

3.2.1	Environmental Characteristics	35
3.2.2	Planktonic Communities	44
3.2.3	Benthic Communities	52
3.2.4	Benthic–Pelagic Coupling and Eutrophication	59
3.3	Northern Rügener Boddens	63
3.3.1	Environmental Characteristics	63
3.3.2	Planktonic Communities	65
3.3.3	Benthic Communities	68
3.3.4	Benthic–Pelagic Coupling and Eutrophication	70
3.4	Schlei	71
3.4.1	Environmental Characteristics	71
3.4.2	Planktonic Communities	73
3.4.3	Benthic Communities	76
3.4.4	Benthic–Pelagic Coupling and Eutrophication	78
3.5	Conclusions and Protection Measures	80
	References	81
4	Greifswalder Bodden, Wismar-Bucht and Salzhaff	87
	U. Schiewer	
4.1	Introduction	87
4.2	Greifswalder Bodden	87
4.2.1	Environmental Characteristics	87
4.2.2	Planktonic Communities	96
4.2.3	Benthic Communities	100
4.2.4	Benthic–Pelagic Coupling and Eutrophication	102
4.3	Wismar-Bucht and Salzhaff	104
4.3.1	Environmental Characteristics	106
4.3.2	Planktonic Communities	108
4.3.3	Benthic Communities	109
4.3.4	Benthic–Pelagic Coupling and Eutrophication	111
4.3.5	Protection Measures	111
4.4	Conclusions and Summary	111
	References	112
5	The Szczecin (Oder-) Lagoon	115
	T. Radziejewska and G. Schernewski	
5.1	Introduction	115
5.2	Environmental Characteristics	116
5.3	Pelagic Communities	120
5.4	Benthic Communities	121
5.5	Eutrophication and Benthic–Pelagic Coupling	123
5.6	Summary and Conclusions	125
	References	126

6	Near-Shore Zones: Koserow and Tromper Wiek	131
	U. Schiewer	
6.1	Introduction	131
6.2	Environmental Characteristics	131
6.3	Results	132
6.4	Discussion and Conclusions	133
	References	138

Part II.B Eastern Baltic Coast

7	Gulf of Gdańsk and Puck Bay	139
	L. Kruk-Dowgiałło and A. Szaniawska	
7.1	Introduction	139
7.2	Gulf of Gdańsk	140
7.2.1	Environmental characteristics	140
7.2.2	Planktonic Communities	147
7.2.3	Benthic Communities	150
7.3	Puck Bay	154
7.3.1	Environmental Characteristics	154
7.3.2	Planktonic Communities	156
7.3.3	Benthic Communities	157
7.3.4	Fish Communities	159
7.4	Eutrophication and Benthic–Pelagic Coupling	160
7.5	Conclusions	162
	References	162
8	The Vistula Lagoon	167
	B. Chubarenko and P. Margoński	
8.1	Environmental Characteristics	167
8.1.1	Lagoon Morphometry	167
8.1.2	Lagoon Hydrography	168
8.1.3	Transboundary Aspects	169
8.1.4	Lagoon Hydrology	169
8.1.5	Lagoon Water Dynamics	172
8.1.6	Hydrological–Hydrodynamical Typology of the Vistula Lagoon System	173
8.1.7	Sediment Regime	174
8.2	Eutrophication	174
8.2.1	Water Quality	174
8.2.2	Limitation of Primary Production	178
8.2.3	Trophic State Index	178
8.3	Planktonic Communities	179

8.3.1	Primary Production	179
8.3.2	Bacterioplankton	179
8.3.3	Phytoplankton	180
8.3.4	Zooplankton	182
8.4	Benthic Communities	184
8.4.1	Macrophytes	184
8.4.2	Macrozoobenthos	185
8.5	Fish and Fisheries	187
8.6	Conclusions and Summary	190
	References	191
9	The Curonian Lagoon	197
	Z.R. Gasiūnaitė, D. Daunys, S. Olenin, and A. Razinkovas	
9.1	Environmental Characteristics	197
9.2	Historical Overview	201
9.3	Phytoplankton	202
9.4	Zooplankton	204
9.5	Fish	206
9.6	Benthic Communities	207
9.7	Biological Processes and Interactions	209
9.8	Protection	210
9.9	Summary	211
	References	211
10	Gulf of Riga and Pärnu Bay	217
	J. Kotta, V. Lauringson, G. Martin, M. Simm, I. Kotta, K. Herkül, and H. Ojaveer	
10.1	Environmental Characteristics	217
10.2	Plankton Communities	222
10.3	Benthic Communities	228
10.4	Benthic–Pelagic Coupling and Eutrophication	233
10.5	Conclusions and Summary	239
	References	239
11	Haapsalu and Matsalu Bays	245
	J. Kotta, A. Jaanus, and I. Kotta	
11.1	Environmental Characteristics	245
11.2	Plankton Communities	249
11.3	Benthic Communities	252
11.4	Benthic–Pelagic Coupling and Eutrophication	253
11.5	Conclusions and Summary	257
	References	257

Part II.C Northeastern Baltic Coast

12 The Neva Estuary Ecosystem.	259
I.V. Telesh, S.M. Golubkov, and A.F. Alimov	
12.1 Environmental Characteristics.	259
12.2 Planktonic Communities	264
12.2.1 Phytoplankton	264
12.2.2 Bacterioplankton	267
12.2.3 Zooplankton.	268
12.3 Fish Communities	271
12.4 Benthic Communities	272
12.5 Benthic–Pelagic Coupling, “Biological Pollution” and Eutrophication.	276
12.6 Functional Response of Aquatic Communities to Anthropogenic Stress.	278
12.7 Conclusions	280
References.	281
13 The Gulf of Finland	285
H. Pitkänen, J. Lehtoranta, and H. Peltonen	
13.1 Introduction	285
13.2 An Infinite Estuary Sensitive to Physical Forcing.	286
13.3 Geomorphology and Hydrodynamics	287
13.4 External Nutrient Loading	290
13.5 Water Column Nutrients	291
13.5.1 Strong Vertical and Seasonal Variations	291
13.5.2 Temporal Trends: Increasing for P, Decreasing for N.	294
13.5.3 Trends in Eutrophication	296
13.6 Internal Nutrient Fluxes.	298
13.6.1 Sediment–Water Exchange and Denitrification.	298
13.6.2 The Role of Benthic Macrofauna.	300
13.7 Nutrient Dynamics are Reflected in the Phytoplankton	301
13.8 Fish Assemblages and Environmental Conditions	302
13.9 Conclusions – Is Recovery Possible?	304
References.	304

Part II.D Western Baltic Coast

14 The Stockholm Archipelago	309
C. Hill and K. Wallström	
14.1 Environmental Characteristics	309
14.2 The Pelagic Zone	314
14.2.1 Nutrient Cycles	314
14.2.2 Plankton	315
14.2.3 Fish	316
14.2.4 Seabirds	318
14.2.5 Marine Mammals	318
14.3 Benthic Communities	318
14.3.1 Bottom Substrate	318
14.3.2 Vegetation of Hard Bottoms	319
14.3.3 Macrozoobenthos of Hard Bottoms	320
14.3.4 Vegetation of Soft Bottoms	320
14.3.5 Macrozoobenthos of Soft Bottoms	322
14.4 Effects of Eutrophication and Other Anthropogenic Disturbances	322
14.5 Environmental Pollutants	325
14.6 Physical Exploitation and Erosion of Shorelines	327
14.7 The Spread of Alien Species	327
14.8 Recruitment Failure in Coastal Fish	328
14.9 Abnormal Mortality in Seabirds	328
14.10 Nature Conservation	328
14.11 Summary and Conclusions	329
14.11.1 Final Remarks	331
References	331
15 The Askö Area and Himmerfjärden	335
H. Kautsky	
15.1 Askö Area	335
15.1.1 Environmental Characteristics	335
15.1.2 Planktonic Communities	339
15.1.3 Benthic Communities	342
15.1.4 Long-Term Change	348
15.1.5 No Recent Increase in Eutrophication	348
15.1.6 Production and Energy Flow	352
15.2 Himmerfjärden Area	355
15.2.1 Environmental Characteristics	355
15.2.2 Eutrophication	356
References	357

16	Odense Fjord and Kerteminde Fjord/Kertinge Nor	361
	H.U. Riisgård, M.H. Jensen, and N. Rask	
16.1	Introduction	361
16.2	Case Study: Odense Fjord	361
16.2.1	Basic Characteristics	361
16.2.2	Nutrient Loads	367
16.2.3	Nutrients in Water and Sediment	367
16.2.4	Phytoplankton	371
16.2.5	Macrophytes	372
16.2.6	Benthic Filter-Feeders and Grazing Impact	373
16.2.7	Fish	377
16.2.8	Impacts of Hazardous Substances	377
16.3	Case Study: Kerteminde Fjord/Kertinge Nor	378
16.3.1	Basic Characteristics	378
16.3.2	Nutrients and Phytoplankton	379
16.3.3	Biological Structure and Nutrient Dynamics in Kertinge Nor	380
16.3.4	Implications of Density-Driven Currents for Predation Impact by Jellyfish	385
16.3.5	Density-Driven Currents and Grazing Impact of Filter-Feeding Benthos	386
16.3.6	Biogeochemistry, Microphytobenthos and Macrozoobenthos	388
16.3.7	Fish	390
16.4	Odense Fjord and Kerteminde Fjord/Kertinge Nor: Protection Measures and Environmental Objectives	390
16.4.1	International Protection Measures	390
16.4.2	National Protection Measures	391
	References	392

Part III Synthesis

17	Synthesis	395
	U. Schiewer	
17.1	Common Features and Differences	395
17.1.1	Type 1: Open Coast/Near Shore	397
17.1.2	Type 2: Big Bays	398
17.1.3	Type 3: Good Water Exchange with the Baltic	399
17.1.4	Type 4: Impeded Exchange with the Baltic	399
17.1.5	Type 5: Coastal Waters Dominated by River Inflow	399
17.1.6	Characteristics of Baltic Coastal Waters	400

17.2	Eutrophication	405
17.2.1	Zooplankton	406
17.2.2	Protozooplankton	406
17.2.3	Fish Populations	407
17.2.4	Submersed Macrophytes	407
17.2.5	Sediments	408
17.2.6	Microbial Food Webs and Aggregates/ Fluffy-Sediment-Layer	408
17.2.7	Benthos	410
17.3	Other Threats	410
17.4	Buffer and Filter Capacity	411
17.5	Ecosystem Stability	412
17.6	Knowledge Gaps	413
17.7	Protection Measures	413
17.8	Conclusions and Outlook	415
	References	416
	Index	419
