Section I CVB Genetics

Coxsackieviruses and Quasispecies Theory: Evolution of Enteroviruses	3
E. Domingo, V. Martin, C. Perales, and C. Escarmis	
Comparative Genomics of the Coxsackie B Viruses and Related Enteroviruses	33
M. S. Oberste	
Group B Coxsackievirus Virulence	49
S. Tracy and C. Gauntt	

Section II CVB Entry and Replication

The Coxsackievirus and Adenovirus Receptor	67
P. Freimuth, L. Philipson, and S. D. Carson	
Coxsackievirus B RNA Replication: Lessons from Poliovirus	89
P. Sean and B. L. Semler	
CVB Translation: Lessons from the Polioviruses	123
J. M. Bonderoff and R. E. Lloyd	
Preferential Coxsackievirus Replication in Proliferating/ Activated Cells: Implications for Virus Tropism, Persistence, and Pathogenesis	149
R. Feuer and J. L. Whitton	

Section III Host-Virus Interaction

The Impact of CVB3 Infection on Host Cell Biology	177
D. Marchant, X. Si, H. Luo, B. McManus, and D. Yang	

Coxsackieviruses and Quasispecies Theory: Evolution of Enteroviruses

E. Domingo(✉), V. Martin, C. Perales, and C. Escarmis

1	Introduction to Quasispecies: Mutation Rates and Mutant Spectra.....	4
2	Why Quasispecies?	7
3	Molecular Basis of Mutation and Recombination	8
3.1	Role of Mutation and Recombination in RNA Virus Evolution.....	11
4	The Diversity of Enteroviruses: Species, Quasispecies, and Variation in Disease Manifestations	12
5	Mutation and Recombination as Mechanisms of Enterovirus Evolution	15
6	Evolution of Virulence in Enteroviruses.....	18
7	Enterovirus Evolution in the Course of Persistent Infections	20
8	Mutant Spectrum Complexity as a Factor in Viral Pathogenesis.....	20
9	Implications of Quasispecies Dynamics for Viral Disease Prevention and Treatment.....	22
10	Overview, Connections, Challenges, and Trends.....	23
	References.....	25

Comparative Genomics of the Coxsackie B Viruses and Related Enteroviruses

M. S. Oberste

1	Overview	34
2	Picornavirus Genomics	34
2.1	5'-NTR Diversity	36
2.2	3'-NTR Diversity	36
2.3	Polyprotein	37
2.4	Capsid Sequence Diversity	37
2.5	Nonstructural Region	39
2.6	Cis-Acting Replication Element	41
3	Conclusions	42
4	Future Directions	42
	References	43

Group B Coxsackievirus Virulence

S. Tracy(✉) and C. Gauntt

1	Introduction.....	49
2	Virulence in the CVB.....	50
3	Virulence and Attenuating Mutations	52
4	How Might Virulent CVB Phenotypes Occur?.....	53
4.1	CVB and Pancreatitis.....	55
4.2	CVB and Neonatal Encephalomyocarditis Syndrome.....	56
4.3	CVB and Type 1 (Insulin-Dependent) Diabetes	57
5	Understanding Virulence in the CVB	58
6	Summary.....	59
	References.....	60

The Coxsackievirus and Adenovirus Receptor

P. Freimuth, L. Philipson, and S. D. Carson(✉)

1	Introduction.....	68
2	The CAR Gene, mRNA, and Protein.....	68
3	CAR Expression in Cells and Tissues.....	76
4	CAR Accessibility, CAR Interaction with CVB, and CVB Cell Penetration.....	78
5	Puzzles for the Next Edition	81
6	Postscript.....	82
	References.....	83

Coxsackievirus B RNA Replication: Lessons from Poliovirus

P. Sean and B. L. Semler(✉)

1	Introduction.....	90
2	Background.....	90
2.1	Cap-Independent Translation.....	91
3	Viral Proteins Involved in RNA Replication.....	91
3.1	Proteins of P2:2A, 2BC, 2B, and 2C	92
3.2	Proteins of P3:3AB, 3A, 3B, 3CD, 3C, and 3D ^{pol}	94
4	RNA Secondary Structures Involved in Enterovirus RNA Replication.....	97
4.1	Stem-Loop I and Negative-Strand 3' Stem-Loop I.....	98
4.2	cre and VPg Uridylylation.....	99
4.3	3' NCR and Poly(A) Tract.....	101
5	Cellular Proteins Involved in RNA Replication.....	103
5.1	PCBP.....	103
5.2	PABP.....	104
5.3	hnRNP C.....	104
6	Membranous Vesicles	105
7	Transition from Translation to RNA Replication.....	106
8	Enterovirus RNA Replication	108
8.1	Negative-Strand RNA Synthesis.....	110
8.2	Positive-Strand RNA Synthesis	111
9	Summary	113
	References.....	113

CVB Translation: Lessons from the Polioviruses

J. M. Bonderoff and R. E. Lloyd(✉)

1	Introduction.....	124
2	Poliovirus and Coxsackievirus IRES Structure and Function	124
3	Proteins Required for Enteroviral IRES-Mediated Translation.....	127
3.1	Canonical Translation Factors	127
3.2	Noncanonical Translation Factors	130
4	5'-3' Interactions in Viral Translation	132
5	Shutoff of Cellular Translation	133
6	Shutoff of Viral Translation	136
7	Cell-Specific Restriction of Translation.....	138
8	Concluding Remarks.....	140
	References.....	140

**Preferential Coxsackievirus Replication
in Proliferating/Activated Cells: Implications
for Virus Tropism, Persistence,
and Pathogenesis**

R. Feuer and J. L. Whitton(✉)

1 Introduction..... 150

2 Enhanced Viral Replication in Proliferating Cells: A Recurrent Theme
Among Viruses 151

3 Cell Cycle Effects on Coxsackievirus Infection: Evidence from Tissue
Culture Studies 152

3.1 Cell Cycle Effects Are Observed for Viruses in Several
Different Picornavirus Genera 152

3.2 Several Lines of Evidence Show that Coxsackieviruses Interact
with the Host Cell Cycle in Tissue Culture 152

4 In Vivo Evidence that the Cell Cycle Affects the Outcome of CVB3 Infection..... 154

4.1 CVB Infection of Lymphoid Cells May Be Regulated by the Cells’
Activation State..... 154

4.2 Coxsackievirus Selectively Infects Neural Stem Cells In Vivo 155

5 Possible Molecular Mechanisms by Which the Host Cell Status Affects
the Outcome of Coxsackievirus Infection..... 156

5.1 Cell Cycle Effects on Virus Receptor 157

5.2 Cell Cycle Effects on Virus Entry..... 157

5.3 Cell Cycle Effects on Virus Gene Expression: The Internal Ribosomal Entry Site ... 157

5.4 Cell Cycle Effects on Virus Replication 160

5.5 Cell Cycle Effects on Virus Maturation and Release..... 162

6 The Biological Implications of the Relationship Between the Virus and the Cell Cycle.... 163

6.1 Implications for Cell Tropism..... 163

6.2 Implications for Transmission 163

6.3 Facilitation of Persistent/Latent Infection..... 164

6.4 Implications for Pathogenesis..... 165

References..... 167
