

CONTENTS

Preface	ix
List of Authors	x
Finite Point-Set Topology and Molecular Structure	1
R. E. Merrifield and H. E. Simmons	
Stereochemical Topology	17
D. M. Walba	
Qualitative Stereochemistry	33
J. Dugundji	
A Theory of Molecular Structure	40
R. F. W. Bader	
Algebraic and Topological Structure of Quantum Chemistry, Chemical Kinetics, and Pictorial Rules for Qualitative Deductions for Chemical Practice	57
O. Sinanoğlu	
Reaction Topology: Manifold Theory of Potential Surfaces and Quantum Chemical Synthesis Design	75
P. G. Mezey	
The Bonding Topology of Polyhedral Molecules	99
R. B. King	
The Shapes of Main Group Clusters: A Topological Approach to Skeletal Electron Counting	124
M. J. McGlinchey and Y. Tal	
Topological Properties of Sulfur-Nitrogen Compounds	141
A. G. Turner	
Should We Have Designs on Topological Indices?	159
D. H. Rouvray	
Topological Indices Based on Neighborhood Symmetry: Chemical and Biological Applications	178
V. R. Magnuson, D. K. Harriss, and S. C. Basak	
Ordering of Graphs as an Approach to Structure-Activity Studies	192
M. Randić, G. A. Kraus, and B. Džonova-Jerman-Blažić	
A Mathematical Model of Molecular Complexity	206
S. H. Bertz	
On the Distance Matrix of Molecules Containing Heteroatoms	222
M. Barysz, G. Jashari, R. S. Lall, V. K. Srivastava, and N. Trinajstić	
Canonical Labelling and Linear Notation for Chemical Graphs	231
W. C. Herndon	

Symmetry and Spectra of Graphs and their Chemical Applications K. Balasubramanian	243
The Automorphism Groups of Some Chemical Graphs G. A. Jones and E. K. Lloyd	252
The Reconstruction Problem W. T. Tutte	268
On the Use of Riemannian Surfaces in the Graph-Theoretical Representation of Möbius Systems	272
A. C. Day, R. B. Mallion, and M. J. Rigby	
The Global Dynamics of a Class of Reaction Networks H. G. Othmer	285
Logical vs. Continuous Description of Systems Comprising Feedback Loops: The Relation between Time Delays and Parameters	307
R. Thomas	
Qualitative Dynamics and Stability of Chemical Reaction Networks B. L. Clarke	322
Higher Chaos in Simple Reaction Systems O. E. Rössler and J. L. Hudson	358
Strange Attractors in Linear Period Transfer Functions with Periodic Perturbations	364
H. Degn	
The Use of Sensitivity Analysis in Determining the Structural Stability of Multi-Parameter Oscillators	371
R. Larter	
Electrical Network Representation of n-Dimensional Chemical Manifolds L. Peusner	379
Logic of Chemical Ideas P. J. Plath and E. C. Hass	392
The Multi-Dimensional λ -Model. A Graph Theoretical/Algebraic Approach to Describe Mechanistic Aspects of Complex Chemical Reactions	405
E. C. Hass and P. J. Plath	
The Classification of Chemical Mechanisms from a Geometric Viewpoint P. H. Sellers	420
Graphs, Polymer Models, Excluded Volume, and Chemical Reality D. J. Klein and W. A. Seitz	430
A Volume Function for Water Based on a Random Lattice-Subgraph Model L. V. Quintas	446
Topological Aspects of Enzyme-Substrate Recognition S. Swaminathan	454
Dynamics of RNA Secondary Structure Formation H. M. Martinez	462

A LISP Program for the Functional-Fragment Representation of Molecules
and their Geometry 473

C. Trindle and R. Givan

Subject Index 485
