

Contents

Section 1: Cardiovascular systems

Comparison between linear elasticity and large elastic deformation in the study of the contraction of the myocardium <i>R. M. Shoucri</i>	3
3D Fluid-Structure Interaction simulation of a bileaflet heart valve opening-closing cycle and comparison with experimental flow data <i>D. Palmieri, G. Vezzani, F. Lagasco & S. Pascale</i>	15
Calculation of stress and the absorption of Angiotensin in the left ventricle based on two dimensional echocardiograms and MRIs <i>A. K. Macpherson, S. Neti, M. Averbach & P. A. Macpherson</i>	25
Human cardiac wall stress analysis with patient-specific myocardial material properties <i>A. Chien, R. M. Shoucri, A. Mal & C. Montemagno</i>	33
Modelling of platelet aggregation in aneurysm <i>K. Shimano, T. Hayashi, H. Ujiie, T. Ono & Y. Enomoto</i>	43

Section 2: Biomechanics

Analysis, simulation and prediction of contact stresses in articular cartilage of the knee joint <i>A. Vidal, R. Lesso, R. Rodríguez, S. García & L. Daza</i>	55
Finite element analysis of prosthetic knee joint using ANSYS <i>C. Shashishekar & C. S. Ramesh</i>	65
Comparison of different knee states: intact, without A.C.L. and with a prosthetic using a kinematics simulator <i>A. Bouafia & J. Dimnet</i>	73

Coupled rotations in the lumbar spine – are these a consequence of passive spinal anatomy?	
<i>J. P. Little, M. J. Pearcy & C. J. Adam</i>	83

The effect of soft tissue properties on overall biomechanical response of a human lumbar motion segment: a preliminary finite element study	
<i>H. Cunningham, J. P. Little, M. J. Pearcy & C. J. Adam</i>	93

The effect of trabecular micro-architecture on vertebra biomechanics: a finite element investigation	
<i>K. McDonald, M. J. Pearcy & C. J. Adam</i>	103

Simulation of bone indentation	
<i>S. Kasiri, G. Reilly & D. Taylor</i>	113

Measuring and modelling arm dynamics to support studies into reducing tremor in individuals with multiple sclerosis	
<i>L. P. Ketteringham, S. A. Neild, R. A. Hyde, R. J. S. Jones & A. Davies-Smith</i>	123

Biomechanical dental implants comparison by means of numerical models and nuclear medicine	
<i>C. Bignardi, E. M. Zanetti, G. Lorenzon, G. Canavese & G. Bertuccio</i>	135

Section 3: Computational fluid dynamics

CFD investigation of respiratory flows in a space-filling pulmonary acinus model	
<i>J. Sznitman, S. Schmuki, R. Sutter, A. Tsuda & T. Rösgen</i>	147

Design of scaffolds with computer assistance	
<i>H. A. Almeida, P. J. Bártolo & J. C. Ferreira</i>	157

Section 4: Intracranial pressure dynamics

A comprehensive cerebrovascular simulation model for teaching and research	
<i>M. Ursino, M. Giannessi & W. B. Murray</i>	169

A mathematical model for the diagnosis and treatment of idiopathic intracranial hypertension	
<i>W. D. Lakin, S. A. Stevens, N. J. Thakore & P. L. Penar</i>	179

Modeling pathological intracranial pressure waveforms in idiopathic intracranial hypertension <i>S. A. Stevens, W. D. Lakin, N. J. Thakore, P. L. Penar & J. Stimpson</i>	191
--	-----

Application of integrative thermodynamic-hemodynamic-pharmacokinetic model to propofol anesthesia for hypothermic decompression <i>L. Gaohua & H. Kimura</i>	201
---	-----

Section 5: Exposure to electromagnetic fields (*special session organised by Professor D. Poljak*)

Simplified modeling of the human body exposed to power substation electric field using boundary element analysis <i>D. Poljak, N. Kovač, S. Kraljević & C. A. Brebbia</i>	213
--	-----

Electromagnetic modelling of a human eye exposed to conductive keratoplasty <i>A. Peratta</i>	223
--	-----

Computation of maximal magnetic field value generated by a power substation <i>N. Kovač, D. Poljak, S. Kraljević, N. Božić & N. Grulović</i>	233
---	-----

Human body exposure to fixed potentials surfaces in power substations <i>C. González, A. Peratta & D. Poljak</i>	243
---	-----

Section 6: Skin and membranes

Exclusive measuring system of constitutive parameters for living soft tissue and application to facial aging problems <i>T. Tsuta, T. Iwamoto & T. Fujimura</i>	255
--	-----

Depth sensitivity of the dielectric properties of human skin: simulations and measurements <i>F. Dewarrat, D. Huber, L. Falco-Jonasson, M. S. Talary & A. Caduff</i>	275
---	-----

Section 7: Data acquisition and analysis

EEG signal analysis and characterization for the aid of disabled people	
---	--

<i>M. B. I. Reaz, M. S. Hussain, M. I. Ibrahimy & F. Mohd-Yasin</i>	287
Techniques of FECG signal analysis: detection and processing for fetal monitoring	
<i>M. A. Hasan, M. I. Ibrahimy & M. B. I. Reaz</i>	295

Section 8: Computer simulation

A method of visualization of a brain neural pathway by using critical points and target regions	
<i>A. Doi, H. Fujimura, M. Nagano, T. Inoue & A. Ogawa</i>	309
Mathematical modeling in drug discovery and development	
<i>R. Miftahof & N. Akhmadeev</i>	319
Author Index	331
