CHAPTER ONE WHAT WE ARE UP TO	1
CHAPTER TWO AN INTRODUCTION TO	9
$SPECULATION \ 2.1  Introduction$	10
2.2 Contact and Friendship	10
2.3 Rocks, Lakes, and Rivers	17
2.3.1 A Model of the Model-Building Process	19
2.4 Responsibility Corrupts	21
2.5 The Case of the Dumb Question	25
2.6 The Case of the Smart Women	26
2.7 On Becoming a Social Scientist	29
2.8 The Politics of Population	34
2.9 Three Rules of Thumb for Model Building	40
CHAPTER THREE THE EVALUATION OF	
SPECULATIONS	51
3.1 Introduction	52
$\it 3.2 Truth$	52
3.2.1 Circular Models	56
3.2.2 Critical Experiments	<b>5</b> 8
3.2.3 The Importance of Being Wrong	60

3.3	Beauty	61
	3.3.1 Simplicity	61
	3.3.2 Fertility	64
	3.3.3 Surprise	67
3.4	Justice	73
3.5	The Search	78
CHAPTE	R FOUR CHOICE	85
	Introduction	86
4.2		89
7.0	4.2.1 Probability	90
	4.2.2 Expected Value	92
	4.2.3 Decision Trees	94
	4.2.4 Expected Value and Probability	-
	(Round II)	102
4.3	Explorations of Decision Trees	108
,	4.3.1 Decision Making Under Risk	109
	4.3.2 The Value of Information	113
	4.3.3 The Value of Control	116
	4.3.4 The Value of Insurance (Optional)	118
4.4	Maximization of Expected Utility	123
4.5		126
•	4.5.1 Traffic Routes as Choices	126
	4.5.2 College as a Choice	128
4.6	Alternative Decision Rules (Optional)	137
CHAPTE	$R \; FIVE \;\;\; EXCHANGE$	157
	Introduction	158
	Internal Exchange	159
0.2	5.2.1 Utility (Again)	160
	5.2.2 Indifference Curves	162
	5.2.3 Consumption Possibility Line	166
	5.2.4 Maximization of Utility	167
	5.2.5 Effect of Price Changes	168
	5.2.6 Effect of Budget Changes	173
	5.2.7 Summary of Utility Maximization Graphs	173
5.3	-	174
<i>9.3</i>	5.3.1 Trade-offs	174
	5.3.2 The Squeaky Wheel Theory of Value	180
	5.3.3 Men and Women	187
	O.O.O MEGIC WICK ALCHOOLD	701

5.4.1 How to Draw Indifference Curves 5.5 External Exchange 5.5.1 The Edgeworth Box (Optional) 5.5.2 Supply/Demand Analysis (Optional) 209 5.5.3 Derivation of Supply and Demand Curves (Optional) 229  CHAPTER SIX ADAPTATION 247 6.1 Introduction 248 6.2 The Basic Model 249 6.3 The Adaptation Equations 3.3 The Meaning of Probabilities in Adaptation Models 6.3.4 The Significance of a and b 6.3.4 The Significance of a and b 6.4.4 How the Model Works 6.4.1 The Effect of Reward Schedules 6.4.2 Learning Limits (Optional) 281 6.5.3 Explorations of T-Mazes 282 6.5 Superstitious Learning 294 6.5.1 Benign Worlds 6.5.2 Malevolent Worlds 297 6.5.3 Learning Limits (Optional) 6.5.4 Explorations of Superstition 6.6 Mutual Learning (Optional) 6.6.1 Mating 6.6.2 Hunting  CHAPTER SEVEN DIFFUSION 7.1 Introduction 7.2 A Set of Basic Assumptions 7.3 Intergenerational Diffusion 7.4 Some Models 7.4.1 The Idea of Rate of Change 7.4.2 A Model of Information Explosion 7.4 Some Models 7.4.3 A Birth Process with Limits 7.4.4 A Broadcast Process 7.5 Explorations of Social Diseases		5.4	A Formal Model of Internal Exchange	197
5.5.1 The Edgeworth Box (Optional) 203 5.5.2 Supply/Demand Analysis (Optional) 209 5.5.3 Derivation of Supply and Demand Curves (Optional) 229  CHAPTER SIX ADAPTATION 247 6.1 Introduction 248 6.2 The Basic Model 249 6.3 The Adaptation Equations a T-Maze 258 6.3.1 Adaptation Equations in a T-Maze 258 6.3.2 Expected Probability 263 6.3.3 The Meaning of Probabilities in Adaptation Models 269 6.3.4 The Significance of a and b 269 6.4.1 The Effect of Reward Schedules 276 6.4.2 Learning Limits (Optional) 281 6.4.3 Explorations of T-Mazes 282 6.5 Superstitious Learning 294 6.5.1 Benign Worlds 294 6.5.2 Malevolent Worlds 297 6.5.4 Explorations of Superstition 300 6.6 Mutual Learning Limits (Optional) 305 6.6.1 Mating 307 6.6.2 Hunting 318  CHAPTER SEVEN DIFFUSION 341 7.1 Introduction 342 7.2 A Set of Basic Assumptions 343 7.3 Intergenerational Diffusion 351 7.4 Some Models 361 7.4.1 The Idea of Rate of Change 361 7.4.2 A Model of Information Explosion 364 7.4.3 A Birth Process with Limits 371 7.4.4 A Broadcast Process 375			5.4.1 How to Draw Indifference Curves	201
5.5.2   Supply/Demand Analysis (Optional)   5.5.3   Derivation of Supply and Demand Curves (Optional)   229		5.5	$External\ Exchange$	203
### S.5.3 Derivation of Supply and Demand Curves			5.5.1 The Edgeworth Box (Optional)	203
CHAPTER SIX ADAPTATION       247         6.1 Introduction       248         6.2 The Basic Model       249         6.3 The Adaptation Equations in a T-Maze       255         6.3.1 Adaptation Equations in a T-Maze       258         6.3.2 Expected Probability       263         6.3.3 The Meaning of Probabilities in Adaptation Models       268         6.3.4 The Significance of a and b       269         6.4 How the Model Works       274         6.4.1 The Effect of Reward Schedules       276         6.4.2 Learning Limits (Optional)       281         6.4.3 Explorations of T-Mazes       282         6.5 Superstitious Learning       294         6.5.1 Benign Worlds       297         6.5.2 Malevolent Worlds       297         6.5.3 Learning Limits (Optional)       299         6.5.4 Explorations of Superstition       300         6.6 Mutual Learning (Optional)       305         6.6.1 Mating       307         6.6.2 Hunting       318         CHAPTER SEVEN DIFFUSION       341         7.1 Introduction       342         7.2 A Set of Basic Assumptions       343         7.3 Intergenerational Diffusion       351         7.4.2 A Model of Information Explosion       364 <td></td> <td></td> <td>5.5.2 Supply/Demand Analysis (Optional)</td> <td>209</td>			5.5.2 Supply/Demand Analysis (Optional)	209
CHAPTER SIX ADAPTATION       247         6.1 Introduction       248         6.2 The Basic Model       249         6.3 The Adaptation Equations       255         6.3.1 Adaptation Equations in a T-Maze       258         6.3.2 Expected Probability       263         6.3.3 The Meaning of Probabilities in Adaptation Models       268         6.3.4 The Significance of a and b       269         6.4 How the Model Works       274         6.4.1 The Effect of Reward Schedules       276         6.4.2 Learning Limits (Optional)       281         6.4.3 Explorations of T-Mazes       282         6.5 Superstitious Learning       294         6.5.1 Benign Worlds       294         6.5.2 Malevolent Worlds       297         6.5.3 Learning Limits (Optional)       299         6.5.4 Explorations of Superstition       300         6.6 Mutual Learning (Optional)       305         6.6.1 Mating       307         6.6.2 Hunting       318         CHAPTER SEVEN DIFFUSION       341         7.1 Introduction       342         7.2 A Set of Basic Assumptions       343         7.3 Intergenerational Diffusion       351         7.4.2 A Model of Information Explosion       364			5.5.3 Derivation of Supply and Demand Curves	
6.1 Introduction 248 6.2 The Basic Model 249 6.3 The Adaptation Equations 255 6.3.1 Adaptation Equations in a T-Maze 258 6.3.2 Expected Probability 263 6.3.3 The Meaning of Probabilities in Adaptation Models 268 6.3.4 The Significance of a and b 269 6.4 How the Model Works 274 6.4.1 The Effect of Reward Schedules 276 6.4.2 Learning Limits (Optional) 281 6.4.3 Explorations of T-Mazes 282 6.5 Superstitious Learning 294 6.5.1 Benign Worlds 297 6.5.2 Malevolent Worlds 297 6.5.3 Learning Limits (Optional) 299 6.5.4 Explorations of Superstition 300 6.6 Mutual Learning (Optional) 305 6.6.1 Mating 6.6.2 Hunting 318  CHAPTER SEVEN DIFFUSION 311 7.1 Introduction 322 7.2 A Set of Basic Assumptions 333 Intergenerational Diffusion 344 7.3 Intergenerational Diffusion 351 7.4 Some Models 7.4.1 The Idea of Rate of Change 7.4.2 A Model of Information Explosion 364 7.4.3 A Birth Process with Limits 371 7.4.4 A Broadcast Process			(Optional)	229
6.1 Introduction 248 6.2 The Basic Model 249 6.3 The Adaptation Equations 255 6.3.1 Adaptation Equations in a T-Maze 258 6.3.2 Expected Probability 263 6.3.3 The Meaning of Probabilities in Adaptation Models 268 6.3.4 The Significance of a and b 269 6.4 How the Model Works 274 6.4.1 The Effect of Reward Schedules 276 6.4.2 Learning Limits (Optional) 281 6.4.3 Explorations of T-Mazes 282 6.5 Superstitious Learning 294 6.5.1 Benign Worlds 297 6.5.2 Malevolent Worlds 297 6.5.3 Learning Limits (Optional) 299 6.5.4 Explorations of Superstition 300 6.6 Mutual Learning (Optional) 305 6.6.1 Mating 6.6.2 Hunting 318  CHAPTER SEVEN DIFFUSION 311 7.1 Introduction 322 7.2 A Set of Basic Assumptions 333 Intergenerational Diffusion 344 7.3 Intergenerational Diffusion 351 7.4 Some Models 7.4.1 The Idea of Rate of Change 7.4.2 A Model of Information Explosion 364 7.4.3 A Birth Process with Limits 371 7.4.4 A Broadcast Process	CHAD	var ta t		0.47
6.2 The Basic Model 6.3 The Adaptation Equations 6.3.1 Adaptation Equations in a T-Maze 6.3.2 Expected Probability 6.3.3 The Meaning of Probabilities in Adaptation Models 6.3.4 The Significance of a and b 6.4 How the Model Works 6.4.1 The Effect of Reward Schedules 6.4.2 Learning Limits (Optional) 6.4.3 Explorations of T-Mazes 6.5 Superstitious Learning 6.5.1 Benign Worlds 6.5.2 Malevolent Worlds 6.5.3 Learning Limits (Optional) 6.5.4 Explorations of Superstition 6.6.5 Mutual Learning (Optional) 6.6.1 Mating 6.6.2 Hunting  CHAPTER SEVEN DIFFUSION 7.1 Introduction 7.2 A Set of Basic Assumptions 7.4 Some Models 7.4.1 The Idea of Rate of Change 7.4.2 A Model of Information Explosion 7.4.3 A Birth Process with Limits 7.4.4 A Broadcast Process 375	CHAP			
6.3 The Adaptation Equations in a T-Maze 258 6.3.1 Adaptation Equations in a T-Maze 263 6.3.2 Expected Probability 263 6.3.3 The Meaning of Probabilities in Adaptation Models 268 6.3.4 The Significance of a and b 269 6.4 How the Model Works 274 6.4.1 The Effect of Reward Schedules 276 6.4.2 Learning Limits (Optional) 281 6.4.3 Explorations of T-Mazes 282 6.5 Superstitious Learning 294 6.5.1 Benign Worlds 294 6.5.2 Malevolent Worlds 297 6.5.3 Learning Limits (Optional) 299 6.5.4 Explorations of Superstition 300 6.6 Mutual Learning (Optional) 305 6.6.1 Mating 307 6.6.2 Hunting 318  CHAPTER SEVEN DIFFUSION 341 7.1 Introduction 342 7.2 A Set of Basic Assumptions 351 7.4 Some Models 7.4.1 The Idea of Rate of Change 361 7.4.2 A Model of Information Explosion 364 7.4.3 A Birth Process with Limits 371 7.4.4 A Broadcast Process 375
