

CONTENTS

Preface xi

PAUL L. GARVIN

The definitional model of language 3

ROBERT P. STOCKWELL

*The transformational model of
generative or predictive grammar* 23

THOMAS A. SEBEOK

*The informational model of
language: analog and digital
coding in animal and human
communication* 47

W. KARUSH

*The use of mathematics in the
behavioral sciences* 67

MICHEL A. MELKANOFF

Computer languages 84

L. G. RAY

Programming for natural language 95

PAUL L. GARVIN

*A linguist's view of
language-data processing* 109

M. E. MARON

*A logician's view of
language-data processing* 128

H. P. EDMUNDSON

*A statistician's view of linguistic
models and language-data
processing* 151

*Three linguistic
models of language*

*Mathematics
and computation*

*Language-data
processing*
